Vol. 22 No. 13 | Lancaster Farming, Saturday, February 12, 1977 | $4.00 Per Year

mith honored for 40 years of service

By SALLY BAIR

LANCASTER, Pa. - The ancaster County gricultural and Home conomics Extension ssociation surprised Senior ounty Agent M.M. Smith ith a tribute to his 40 years service to Lancaster ounty at their annual eeting Tuesday evening at e Farm and Home Center. Mark Bushong, ssociation president, said at March, 1977 will mark 40 ears since Smith began his ork in this county. In cknowledging appreciation Mr. and Mrs. Smith, ushong said, "Extension is mily and this outfit has een family to you and uth."

Bushong reminisced about s earliest 4-H experiences ith Smith and recalled that fter a show at the Third treet Market House in olumbia, he proudly pinned is ribbon on his overalls. mith spied him and said, Who won the ribbon, you or he lambs?" Bushong said, I never forgot that and I

Red Rose FFA degrees awarded to 56

By JOANNE SPAHR

LANCASTER, Pa. - Jefery Lynn Aungst, the son of Mr. and Mrs. Hiram Aungst, Elizabethtown R1, and Marty Hoover, the son of Mr. nd Mrs. Harry Hoover, tevens R1, have been amed the Future Farmers f America Star Red Rose Farmer and Star Red Rose Agribusinessman, respecively for Lancaster County. These honors were bestowed n the youths after they, long with 54 other Lancaster County members, received their Red Rose Degrees last Monday. The Red Rose Degree is a county egree, and the Star Red Rose awardees are the two utstanding county winners n production and gribusiness. Although hosen last week, the boys will officially receive their egrees at their chapter anquets to be held in the coming months.

In order to receive the Red Rose degrees, the candidates must be members in good standing of the local, county, state, and national FFA organizations and have held the degree of Chapter

McPherson is regional ag spokesman

By JOYCE BUPP
York Co. Reporter

NEW PARK, Pa. - Gail McPherson, Maple Lawn Farm, New Park R1, has been named winner of the national Agricultural Spokesman of the Year award, Eastern Region.

The annual competition, is sponsored jointly by Chevron Ortho and Farm Chemicals Magazine and carries a $250 cash award and a bronze Ag Spokesman trophy.

Mrs. McPherson and her husband, Paul operate Maple Lawn Farm, a large York County orchard and grain farm.

Although only a farm wife for four years, Mrs. McPherson has gained national acclaim for her agriculture promotional activities. In connection with her role as information director of the York County Farmers' association, Mrs. McPherson has developed a slide presentation depicting the wide range in Pennsylvania agriculture. The

Farm girl is Berks County correspondent

LITITZ, Pa. - Laurel Schaeffer, of 612 Penn Avenue, Sinking Spring, joins Lancaster Farming this week as the new Berks County correspondent.

Mrs. Schaeffer and her husband, Donald, presently farm 160 acres outside of Sinking Spring and maintain a herd of crossbred cattle. In addition, they raise swine.

A 1975 graduate of Delaware College of Science and Agriculture, Mrs. Schaeffer claims she became interested in agriculture as a result of a pony she had while growing up in Bucks County. She decided to prepare herself for a career in agriculture and consequently earned her degree in animal husbandry.

Regarding her years at Delaware Valley, the new Berks County correspondent says: "I tried to put special emphasis on the practical breeding and management of livestock, as opposed to research related areas." Since her marriage she has become an active farm wife

Delmarva Poultry

Wed. Feb. 9

Ready to cook movement continues good with offerings short of full call. Slaughter schedules fairly heavy though occasional plant not operating for lack of desirable birds. Todays LTL asking prices mostly 43 cents on plant and 44 cents on US Grade A. Advance interest slow in developing. Live supplies short of needs. Undertone very firm.

Current broiler-fryer negotiated prices for immediate includes mostly multiple-drop shipments to New York City from Delmarva.

Range - US Grade A 42-43½; Plant Grade 42-42½; Premium X US Grade A 44-48; Premium X Plant Grade 43-46. Wtd. Avg. - US Grade A 42.85; Plant Grade 42.05; Premium X US Grade A 45.68; Premium X Plant Grade 45.83.

X - Includes special services, selected competitive brands, etc.

Baltimore Eggs

Wednesday, Feb. 9, 1977

Market steady. Demand fair. Supplies of large adequate, mediums and small irregular.

Cartoned eggs: prices to retailers, state graded (min. one case sale) white.

Grade A Large 81-85; Grade A Medium 77-81.

Eastern Pa. & N.J. Poultry

Wednesday, Feb. 9

Prices light type hens unchanged. Demand fairly good for moderate offerings. Offerings of heavy type adequate for a fair call.

Prices paid at farm: light type hens 10-12 mostly 12 in Pa., mostly 12 in N.J.

Heavy Type hens TFEWR.

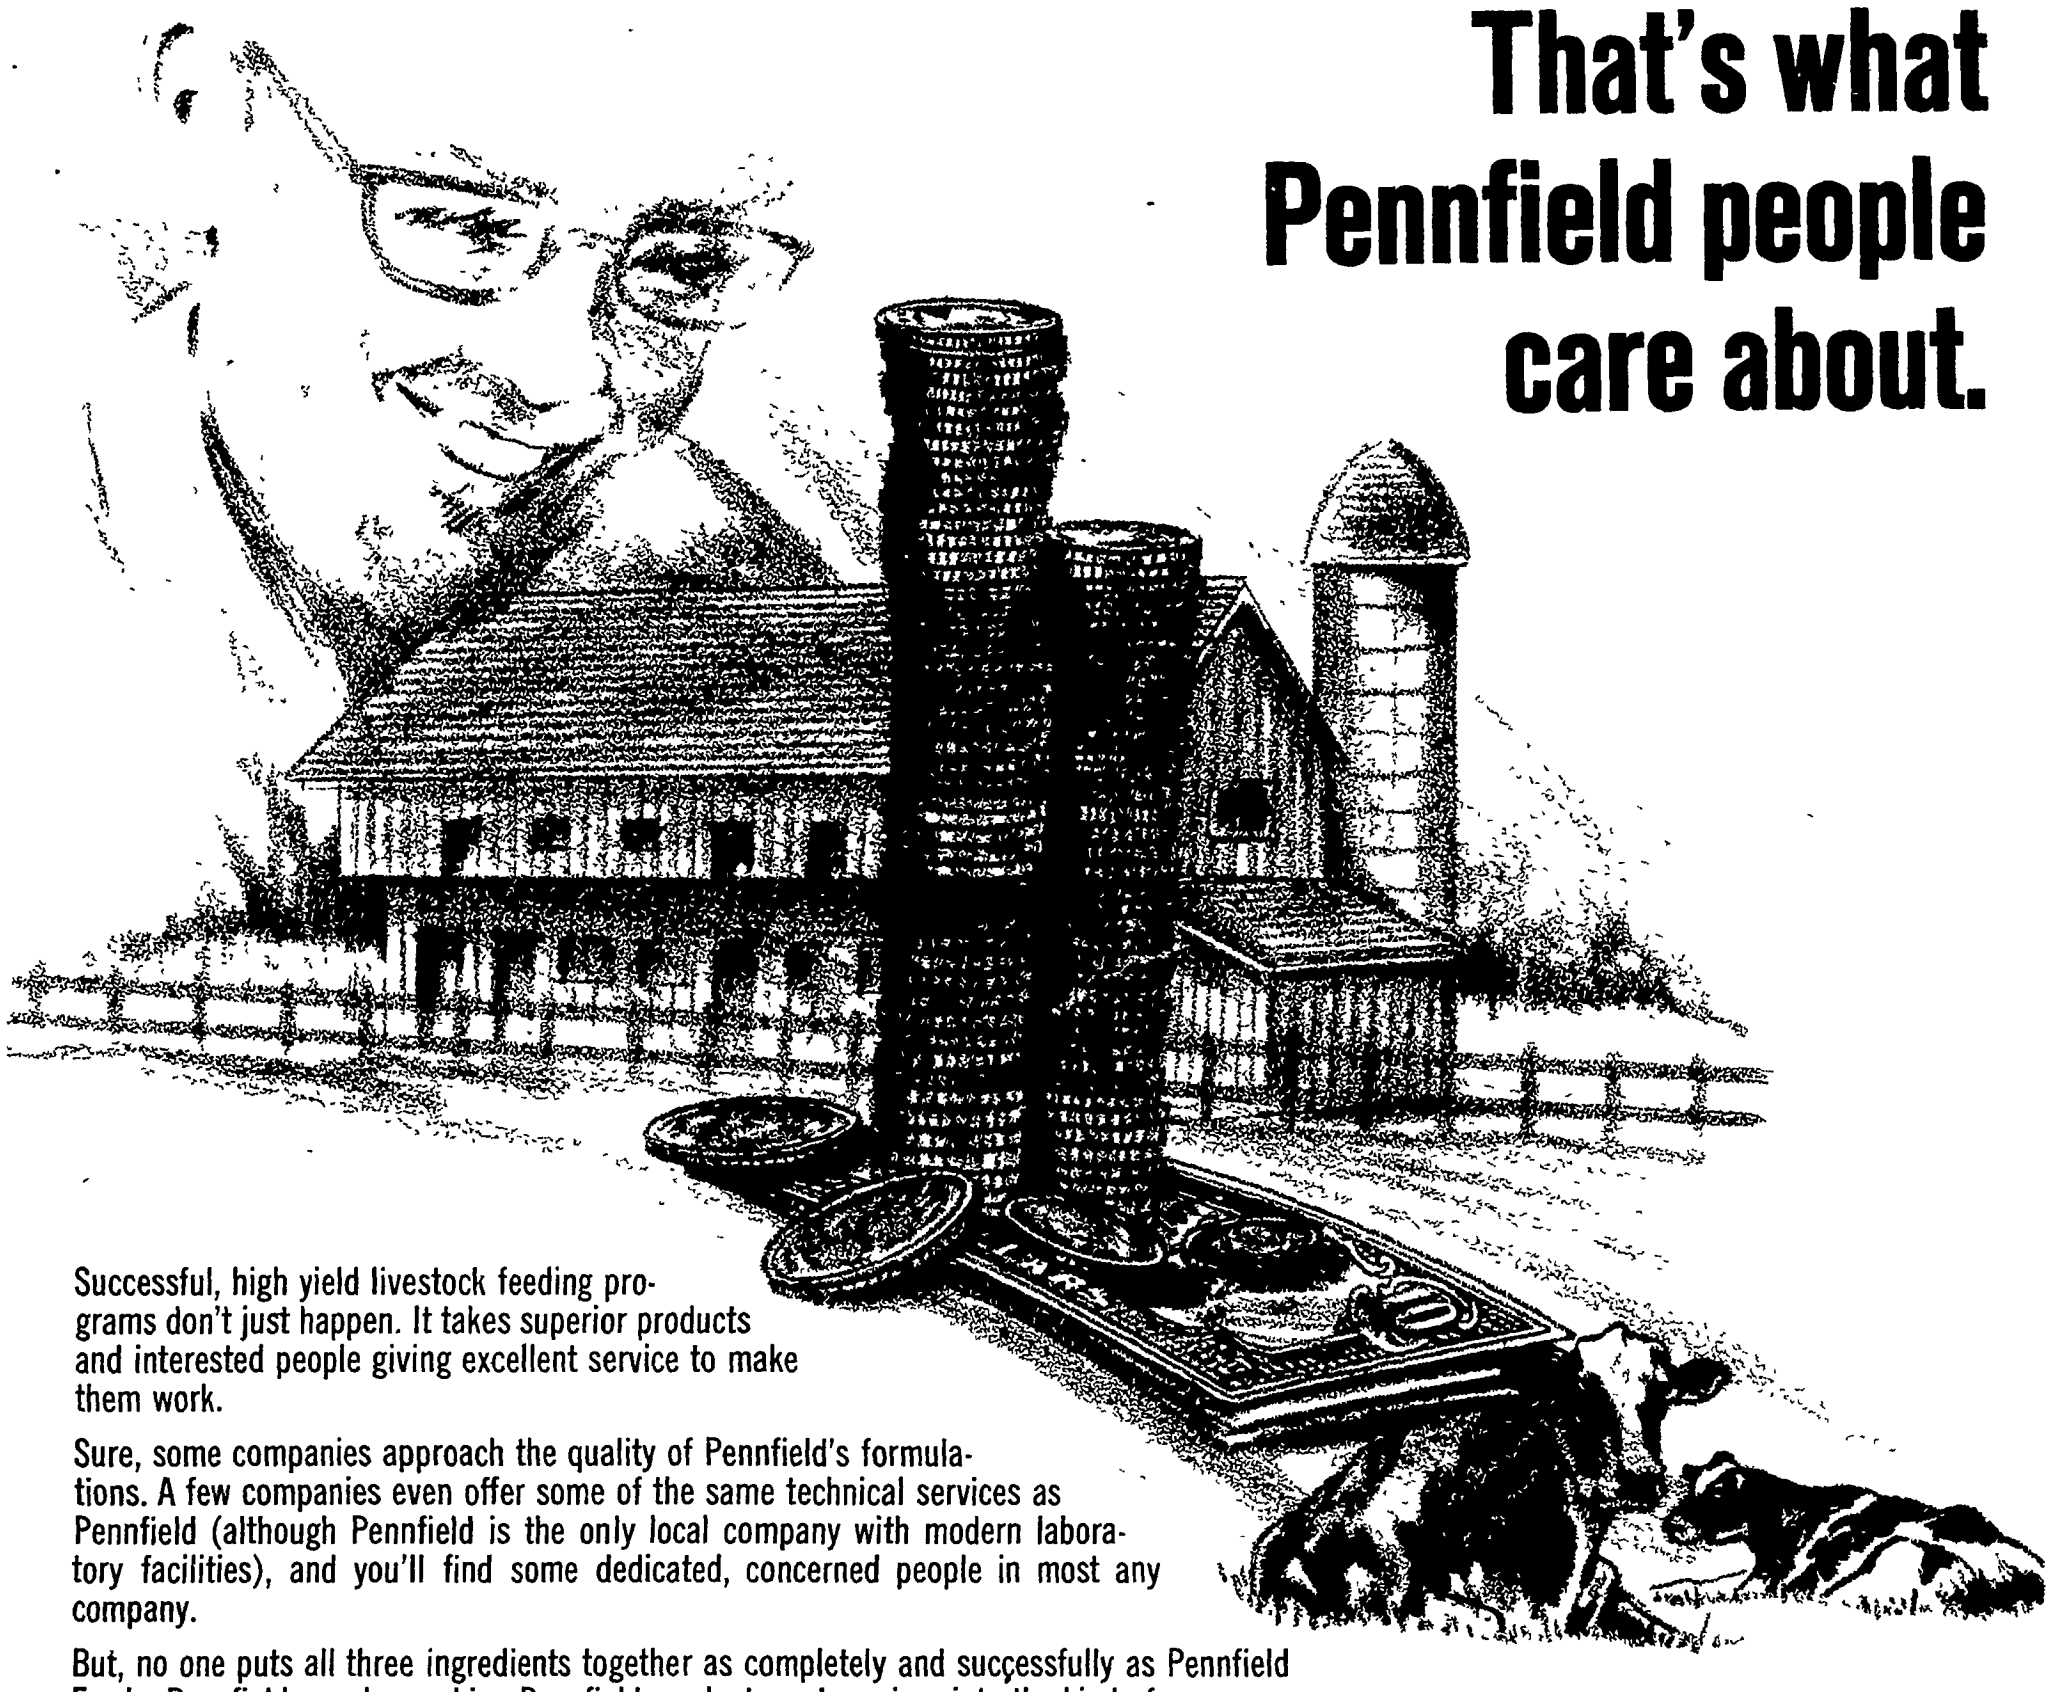
Your LIVESTOCK PRODUCTIVITY, your PROFITABILITY.

That's what Pennfield people care about.



Successful, high yield livestock feeding programs don't just happen. It takes superior products and interested people giving excellent service to make them work.

Sure, some companies approach the quality of Pennfield's formulations. A few companies even offer some of the same technical services as Pennfield (although Pennfield is the only local company with modern laboratory facilities), and you'll find some dedicated, concerned people in most any company.

But, no one puts all three ingredients together as completely and successfully as Pennfield Feeds. Pennfield people combine Pennfield products and services into the kind of complete livestock feeding and farm management programs that result in higher yields, planned growth, and increased profit for Pennfield customers.

Chemists, nutritionists, production personnel, veterinarians, computer technicians, business and marketing analysts, deliverymen, quality control specialists, financial experts, and more . . . led by your Pennfield Area Manager who can put them all together to develop and service a customized, profit-oriented program for you. These are Pennfield people. And, Pennfield people make Pennfield Feeds a better buy!

Feb. 10, 1977

Weekly 51 - Cattle - Compared with the previous weeks close -

Closing prices on Slaughter Steers and Heifers were steady to 25 cents higher. Cows were mostly steady, and bulls 1.00-2.00 higher. Four day receipts 14,300 as compared 12,300 previous week and 17,100 a year ago. As has been the case the past several weeks, the fed cattle trade followed a rather uneven pattern during the trading period. Prices were forced downward on the opening session, but fully recovered the decline on later days. However, late demand was generally dull as carcass prices again weakened, and there was an overall air of caution engulfing the live trade during the week, with most interests competing for immediate requirements. Much of the Steer and Heifer supply was good to average-choice and included several loads Choice and Prime 4-5 1350-1600 lb. Steers. Steers made up approximately 39 of the weeks total and Heifers 33. Cows comprised 15 and Feeders 10.

STEERS: at midweek high time, two loads Choice with end Prime 3-4 1150-1227 lbs. 39.15-39.25. Choice 2-4 975-1300 lbs. 38.00-39.00, load Choice and Prime predominantly 4 1286 lbs. 38.00. During week, several loads Choice and Prime 4-5 1350-1600 lbs. 34.00-36.00. Mixed Good and Choice 2-3 950-1275 lbs. 37.25-38.00, holsteins 1250-1350 lbs. 35.00-35.50. Good 2-3 these weights 34.00-37.00. Standard and Good 2-3 31.50-33.00.

Average of LS-214, detailed quotations, for Choice 900-1100 lb. Steers this week 38.18; Choice 1100-1300 lbs. 38.30. Average weight Steers first three days 1158 lbs. Compared 1163 lbs. previous week. Average weight Heifers first three days 992 lbs. as compared 996 lbs. previous week.

HEIFERS: Several loads and part loads Choice and Prime 3-4 998-1089 lbs. 37.40-37.50, part load 994 lbs. 37.75. Choice 2-4 850-1050 lbs. 36.00-37.50. Mixed Good and Choice 2-3 850-1000 lbs. 35.00-36.50. Good 2-3 31.50-34.50. Small lots Standard and Good 2-3 30.00-31.50.

COWS: Utility and Commercial 2-4 22.50-24.50, few to 25.00. Canner and Cutter 19.00-22.50, Mixed Cutter and Utility 22.75-23.00. Shelly Canner 15.00-18.00.

BULLS: 1-2 1400-1800 lbs. 29.00-32.50, Individual 1 33.00-34.00, several high dressing 35.00.

Greencastle

February 7, 1977

THE OLD FARMER'S ALMANAC

FEB. 14-20, 1977

Thank the highway crews, they're good news.

Did you forget your favorite valentine? (14th) Chinese New Year Feb 18 (Year of the Snake) New moon Feb 17 Average length of days for the week, 10 hours, 40 minutes Women first admitted to the Bar Feb 20, 1879 USS Maine blown up in Havana Harbor Feb 15, 1898 *What sunshine is to flowers, smiles are to humanity (Joseph Addison)*

Ask the Old Farmer: Do you know what a "canna' or "canni" pail is, and what the proper spelling for it is? In the old days, it was used to store sugar or flour O N, Minneapolis

The word is "cannikin," and originally referred to a wooden beer mug "Let me the cannikin clink," says Shakespeare Americans, detesting long words, shortened it to "canty " The real canty was a butter box of wood, with a wooden bail

Home Hints: Steam takes wrinkles out of velvet One way to steam a dress or shirt is to hang it in the bathroom while the shower is on Be sure to use a padded hanger

OLD FARMER'S WEATHER FORECASTS

New England: Flurries, cold snap and clear through Tuesday, flurries Wednesday through Friday, week's end brings 6-8" of snow

Greater New York-New Jersey: Clear and very cold through Wednesday, Thursday and Friday light snow, weekend sunny

Middle Atlantic Coastal: Week begins very cold with flurries and rain and freezing-rain by Wednesday through midweek, cold and flurries arrive for week's end

Piedmont & Southeast Coastal: Very cold with snow inland through Thursday, sunny and mild for remainder of week

Florida: Sunny and warm with showers and rain north starting Tuesday through Friday, clear over weekend

Upstate N.Y.-Toronto & Montreal: Very cold through Wednesday, then sunny and snow west, sunny for week's end

SHEEP 32. Choice 75-100 lbs. wooled slaughter lambs 46.50-54.00, Good 60-90 lbs. 30.00-39.00.

Import relief suggested for mushrooms

WASHINGTON, D.C. - The U. S. International Trade Commission has recommended to the President that import relief be provided to the U. S. mushroom industry. Three of the Commission's six members recommended the imposition of a tariff quota of 48 million pounds, allocated by country. Imports in excess of the quota would be assessed an additional ad valorem duty of 25 per cent during the first three years of the quota, an additional ad valorem duty of 15 per cent during the fourth year of the quota and an additional ad valorem duty of five per cent during the fifth year of the quota. Two other Commissioners recommended adjustment assistance, which provides for financial and technical aid for workers, firms, and communities, as the appropriate remedy for the mushroom industry. One Commissioner did not participate.

The Commission's investigation on mushrooms, its second since March 1976, was instituted following a request for an expedited investigation received from the Special representative for Trade Negotiations. The request from STR preceded a USITC determination that there was good cause for a reinvestigation within one year.

Slurry gun shown

LANCASTER, Pa. - A demonstration of the new slurry gun liquid manure pump was held February 8 on the Charnelle Manor Farm owned by Charles and Nelson Habecker, Lancaster, R2. Approximately 40 farmers and interested persons were present to see the demonstration.

In the Habecker system, a barn cleaner removes the manure from a dairy herd of about 60 cows to an underground holding pit outside the barn. When this pit is filled, the slurry is pumped to an above ground storage silo where it is stored until it is spread on the fields. The slurry gun can be used for all pumping operations in the farm system. And, with the pump's positive displacement, it can handle manure with more solids to reduce the number of spreader trips to the field. The farmers discussed their present systems and this idea in liquid manure handling over coffee and doughnuts.

A movie of the slurry gun operating in various installations in the U.S. and Canada was also shown.

The slurry gun is manufactured in Canada and imported by Delta Pump Company, Lancaster, Pa. Delta is the distributor of the pump in the Lancaster area and is marketing it on a national scale.

Hesston appoints Sam White

HESSTON, Kans. - Samuel W. White, Jr., a prominent leader in the farm equipment industry, has been appointed by Howard Brenneman, president of Hesston Corporation, as special assistant - marketing and business strategy.

White served as president of the Oliver Corporation, and executive vice president and director of White Motor at the time White Farm Equipment was organized. As a recognized industry spokesman, Sam White was president of the Farm and Industrial Equipment Institute (F.I.E.I.) in 1969-1970.

Jones on board

STRASBURG, Pa. - John W. Jones has been appointed to the Board of directors of the First National Bank of Strasburg. He is executive vice president of the bank.

His community activities include serving as Director of the Lancaster General Hospital, Chairman of Legislative Affairs for the Lancaster Chamber of Commerce, and Treasurer of the Fine Arts League of Lancaster.

LOVE

Being as proud a father as any, a recent father-son banquet was an event I tried hard not to miss. It was time for Daddy to do some babysitting again

Shy as usual, my two boys stood quietly by my side as we awaited to be seated. It wasn't long before everything was organized and the Lions began to sing.

"Roar Lions roar," the group sang loudly in unison

A few bars of that phrase left 2-year old Karl wondering whether he had come here to eat like Daddy had promised, or whether he might be eaten himself. His 4-year old brother, Paul, just stared across the table in silence.

A waitress planted a plate of food in front of Karl. The little fellow, who by this time looked like he was ready to go home, and had long ago scrambled onto Daddy's lap, quietly announced he didn't want to eat.

That was unusual. But it wasn't long before he changed his mind.

Daddy wanted to be good supporter of the dairy industry, so he ordered three tall and cold glasses of milk. Shortly after that was done, both boys whispered they preferred Cokes. So Daddy cancelled two milks and ordered two Cokes. But, lest dairymen become upset, I'll have to confess that I ordered a second glass of milk for myself

The meal went down well, and the boys enjoyed a performance by a magician. It was a fine evening.

We were putting our coats on and were ready to leave for home when Karl did a little dance with his feet and announced:

"Daddy, water comin' in the pants."

"Some months ago a proclamation like that always came too late, but there was no more need to panic - as long as we got to the rest room within the next couple of minutes.

When we got home, both boys, as usual, didn't want to go to bed. Lisa got them into their pajamas, and then, using their beds as trampolines, they hopped around and squealed with delight. For a while I joined them loving and hugging each one.

My wife, Lisa, considers both of them to be genuine chips off the old block, and when we're horsing around like that it's probably more obvious than ever

When I get off easy, both boys will eventually say something like: "I haf enuff luf now," while at other times it's request for "just one more" horsey ride or the likes.

My good fortune of being surrounded by love certainly doesn't end there. I've got two fine girls too. The one's my wife, the other is 7-week old Heidi.

Have a happy Valentine's Day!

— DIETER

THE WOMAN WHO CAME

Lesson for February 13, 1977

Background Scripture: Mark 2:1-12; Luke 7:36-50, Devotional Reading: Mark 2:1-12.

Many people remember the late actor Monty Wooly best for his title role in the motion picture, "The Man Who Came To Dinner." It is the story of what happens when an arrogant man comes to dinner, is injured in the course of the evening, and has to remain in the home for an extended period to recuperate. "The Man Who Came To Dinner" becomes the man who changes everyone's lives.

A tainted woman

In a sense this is what happened when a prostitute "crashed" a dinner party for Jesus that was being hosted by a respected Pharisee of a certain city. Luke does not name the Pharisee and tells us little about him or even where he lived. Yet, although we have little factual data about him, as the brief story unfolds, we get a pretty clear picture of what sort of man he was.

Let's try to picture the scene in Luke 7. The Pharisee is probably a prosperous man in the community, so we can envision a typical Palestinian house with a large courtyard and garden in the center. It is in this courtyard where the low table is spread. The custom is to recline at the table and we can assume that Jesus and the Pharisee are joined there by a few other guests.

Suddenly, the host is aware of the presence of a notorious woman. Almost oblivious of everyone else, she has entered quietly and gone directly to Jesus. Then, bending, she begins to anoint his feet with a costly ointment, weeping silently as she does, and from time to time kissing them.

The Pharisee says nothing aloud, but to himself he is expressing outrage and indignation. Almost with self-satisfaction, he tells himself: "If this man were a prophet, he would have known who and what sort of woman this woman is who is touching him, for she is a sinner" (7:39). It is interesting that the indignation is directed solely to Jesus rather than the woman. It is as if he is secretly glad to find that Jesus is not what people claim him to be.

She loved much

Up to this moment, no one has spoken a word. The host has kept his feelings to himself, but Jesus is gifted in reading people and he knows what is racing through the mind of his host. Calling the Pharisee, he tells him a parable and akss him to provide the answer for the question wih which it concludes: "Now which of them will love hime more?" (7:42).

The Pharisee could hardly fail to give the right answer: "The one, I suppose, to whom he forgave more" - (the "I suppose" probably indicates that he realized the point of the parable and knew he was incriminating himself). The question, Jesus was saying, is not who is the greater sinner - the woman was obviously way ahead on points! - but who is the most humbly contrite?

Up to this moment, the Pharisee had always thought of himself as an upstanding, righteous man who proudly - and smugly - kept the law in great detail. But now, because of this woman who had crashed his dinner party, his self-image could never again completely escape the humbling reproach of Jesus.

NOW IS THE TIME...

TO BE CAREFUL IN THAWING PIPES

This thought might be a few weeks late but is still worthwhile. Many folks have experienced a large number of frozen water pipes this Winter. This can happen again before Spring arrives. The use of electric welders and blow torches to thaw pipes is common but carries a high degree of fire hazard with them. Our Penn State engineers inform us that electric welders should not be used by others than experienced plumbers; also, blow torches will surely warm up a frozen pipe but may also start a fire in nearby wood, insulation, or in hay or straw in barns. Extreme care should be used with them and with perhaps a fire extinguisher nearby. The wrapping of a frozen pipe with a rag and pouring on hot water could be safer; or the use of a electric hair dryer blowing hot air on the pipe may also get the job done.

TO CONTROL LIVESTOCK PARASITES

The extremely cold weather during the past Winter has not given livestock producers much of a chance to dip or spray their animals for lice control. The use of dusts is possible but usually less control of the lice is experienced. We suggest spraying or dipping cattle with some of the lice killing materials when the weather is above freezing; the use of cold water rather than hot or warm water is very important. The cold water will not open the pores of the skin of animals and therefore not expose them to sickness and colds. Lice should be controlled for cattle comfort and efficient use of feed.

TO CREEP-FEED LAMBS

Sheep producers with lambs headed for the Easter market should make every effort to bring them along as fast as possible. The lamb market is usually at its peak during the Easter season. A feeder into which the small lambs can enter, and not the ewes, is suggested as a way to get more weight and more finish on the lambs. This will be in addition to the milk of the ewe. A simple mixture of cracked corn and oats will usually increase the weight of the lambs and kept before them at all times. Ewes nursing lambs should be fed extra grain in order to have more milk for their lambs; this is especially true with ewes nursing twin lambs.

TO BE CAREFUL WITH LIQUID MANURE PITS

When warmer weather arrives some livestock producers will be hauling their manure to the fields. In the case of the manure pit, there is need for extreme care in and about this pit when it is being agitated and emptied. Toxic gases are formed at this time and they can be deadly to both man and beast. If animals are on slats above the pit, they should be removed or given extra good ventilation. No one should enter the pit without a gas mask, or work near it alone. Too many folks have been killed or injured by these gases. We urge all producers to beware of this hazard.

30-H.P. LOADER ANNOUNCED

The Model L-425 is a new skid-steer loader from Sperry New Holland, which features a 30-h.p. gasoline engine combined with a 1,000-pound operating load (SAE).

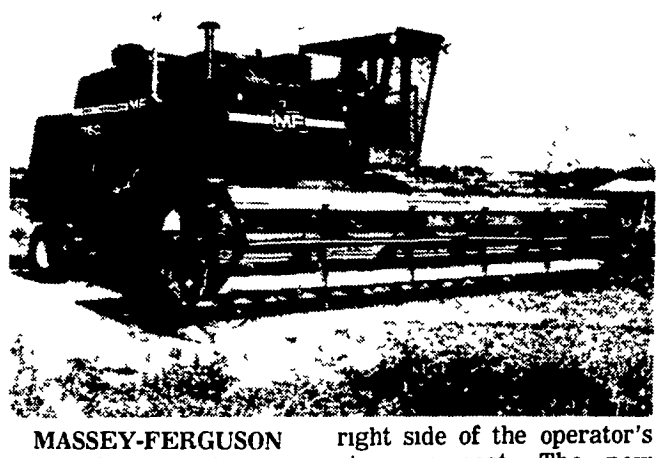
The new loader joins five other models in the Sperry New Holland line, which range from 18 to 62 h.p.

Pivoting in its own length, the L-425 can be operated in extremely tight quarters. Its low clearance height permits operation under a six-foot door or overhang.

The "425" offers the patented reach-riser boom found on all models in the line. This boom, which reaches out as it rises, provides each model with the greatest forward dump reach in its class.

Changing attachments is a fast and easy process, which is done without dismounting from the loader. A wide variety of attachments are available, including buckets, blade, forks and grapple.

The cab on the L-425, as on all models, is designed as an integral part of the loader, providing structural safety for the operator.



MASSEY-FERGUSON COMBINES

Several major improvements, including a new "Constant Mesh" transmission, have been made in the 1977 models of the Massey-Ferguson 750 and 760 combines. Most of the changes are designed to increase operator comfort and ease of operation.

The new, larger heavy duty "Constant Mesh" transmission is standard equipment on both the MF 750 and MF 760 combines. It is a two-range (HI and LO), two-speed (1 and 2) transmission. A heavy duty cable connects the two gearshift levers to the transmission. Levers are located on the right side of the operator's steering post. The new transmission can be driven with either the V-belt type or hydrostatic drives.

Other major changes include added sound-proofing inside the cab to reduce noise level, an electric-magnetic header throwout for all grain combines, a larger 90 gallon fuel tank on MF 760 combines equipped with Perkins diesel AV8 to 540 engines, and twin ram rear axle steering on MF 750 grain and all MF 760 combines.

Although the outside cab appearance is the same, the inside of the MF 750-760 combine cab has been changed to make it quieter and cleaner. Perforated black vinyl covering with polyurethane foam backing has been installed on the inside cab roof, control box on right side, area behind the operator and left door panel.

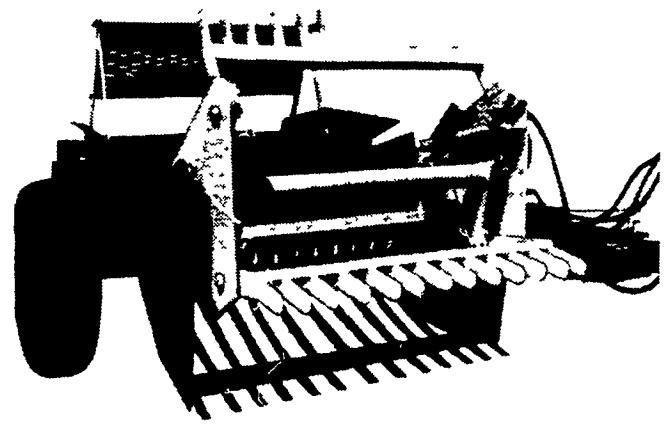
The cab deck has been covered with a rubber floor mat with sisal backing. All openings for control levers have been sealed with rubber boots or plastic-type seals.

Cab controls are the same as current models except for the transmission shifting levers and the new hand-operated parking brake which replaces a foot brake. The seat is now covered with black vinyl. International control symbols are used for gauges and combine function controls.

The electro-magnetic header throwout, formerly available on rice combines only, has been released for all grain combines.

For easier steering, the rear axle is equipped with twin hydraulic rams on the MF 750 grain combine and all MF 760 combines. Located on the ends of the rear axle, the twin hydraulic cylinders will eliminate hard steering.

Two extra headlights, one grain tank light and one unloader spout light, have been added to standard equipment of the MF 750-760 combines. Two other accessories, the unloader spout boot and the universal table adjusting wrench, have been added to standard equipment.



ROCK PICKER

Westgo Industries has introduced a Rotary Rock Picker that hauls nearly two tons of rock at one time, according to the West Fargo, N.D. manufacturer.

The rock picker handles rocks 2½ to 24 inches in diameter, according to Westgo. Capacity rating is 3,500 pounds.

Westgo claims the hydrostatic-driven rock picker is designed so the operator can control operation from the tractor seat.

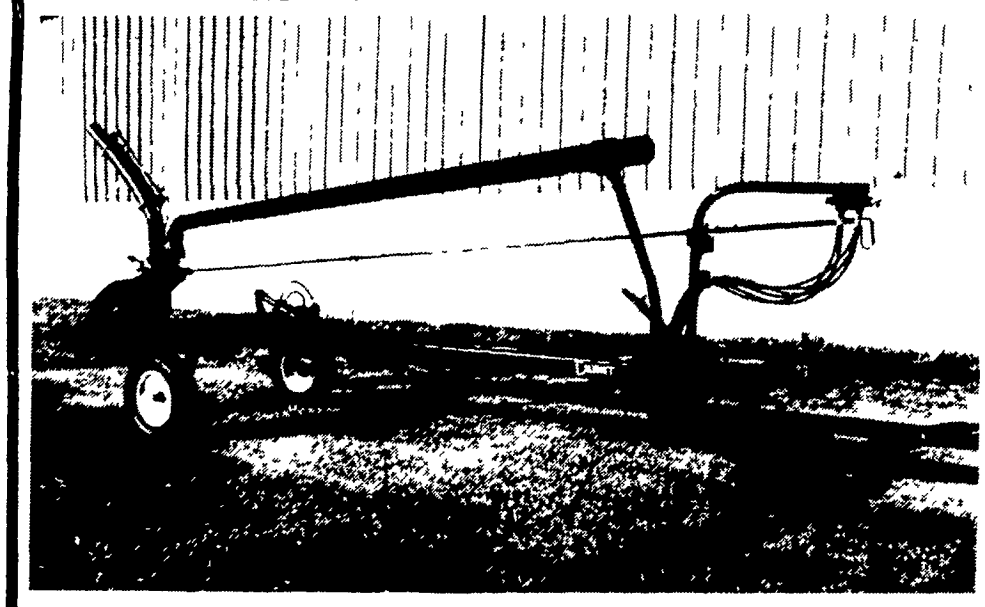
The bucket and 50-inch wide fork work independently with a rope trip and selector valve. Both the bucket and fork cylinders are double acting.

An expanded metal floor and backstop allow dirt to sift through without collecting in the bucket, according to Westgo.

The heavy-duty Westgo Rock Picker frame is constructed from 5-inch by 5-inch square steel tube. Teeth on the fork are constructed from 1¼-inch by 1¼-inch carbon steel.

Further information about the Westgo Rotary Picker is available by contacting Bruce Manzey at Westgo Industries in West Fargo, N.D.

NEW CALUMET LAGOON PUMP



This is the Lagoon Pump you have been asking for
Designed and Built for the Farmer who demands the finest in quality and workmanship

CALUMET FEATURES . . .

- Trailer Mount for easy hookup and unhooking
- Enclosed driveshaft for long bearing life
- Complete hydraulic controlled agitator spout (up, down and sideway)
- 25" Impellor for fast agitation
- Only one hydraulic circuit needed on tractor

Warwick adult ed. slates pesticide class

LITITZ, Pa. - The adult education program of Warwick High School will be offering a 10-week course beginning March 1 on the application and licensing of pesticides. Thomas Arehart, vocational agriculture instructor, will teach the classes to be held in the high school ag shop from 7 to 9 p.m. Upon completion of the course, certified pesticide applicators licenses will be issued.

Registration fee is $11. Anyone wishing to take part in the course should contact David Hilbert, Warwick adult education director, by phone at the Warwick Middle School, and remit a check for $11 to the same by mail. Registration deadline is February 22. Twelve people must enroll in order for the course to be offered. In case of cancellation, all checks will be refunded.

Hilbert will also be in the lobby of the Warwick High School on Thursday, February 17, from 7:30 - 8:30 p.m. for those who would like to register at this time.

Mrs. McPherson

(Continued from Page 1)

Gail McPherson

program was toured over 100 times in 1976, alone.

She originated the idea of a peach blossom festival and Peachilicious Weekend which have brought thousands of non-farmers out into the orchards.

Sensing a need for a peach industry cookbook, she almost singlehandedly compiled a 200-page "Passion for Peaches Cookbook" which has become a best seller at the Maple Lawn Farm Market.

Paul McPherson is president of the National Peach Council, and as the first lady of the industry, Mrs. McPherson has helped to organize NPC activites.

She coordinated the women's promotional education seminar during the NPC convention in Hershey last March and has helped re-structure the organization's finance committee.

Her talents for creativity led her to name the recently formed national coalition of farm women commodity promotion group, which was christened American Agri-Women.

Gail now serves on their goal setting committee and was a speaker at the AAW's first national convention in Kansas City last November.

She has now begun touring her lively, informative speech, "The Case for the Professional Farm Wife," as a result of media reprints of the speech. Mrs. McPherson spoke in January to the Nebraska Ag Progress convention in Lincoln.

She is currently coordinating a national ag day display planned for the York Mall on March 18 and 19. The educational display is a project of the women's committee of the York County Farmer's Association.

Tuesday, she will speak in Gettysburg at the Pennsylvania Roadside Marketing Conference on the variety of marketing techniques which have been successful at Maple Lawn Farms.

She and her husband have two children, Gretchen, 4 and Hugh, 2.

Protects 4 more miles of corn between hopper refills

Dyfonate® 20-G insecticide does it. At 30 pounds of rootworm insecticide per hopper, Dyfonate protects 15 miles of corn row from rootworms. Compared to 7 miles to 11 miles for most other rootworm insecticides.

Dependable Dyfonate 20-G has other important benefits

- Economical—lower cost per acre than most rootworm insecticides.
- Granules of Dyfonate don't wear out metering equipment.
- Dyfonate doesn't have an offensive odor. And it's easy handling.
- Dyfonate controls rootworms for sure in early and late-planted corn.
- Dyfonate also controls symphylans—tiny soil pests that destroy much corn in this area.

Get better corn yields without lodging. Use Dyfonate for rootworm and symphylan control. Always follow label directions carefully. See your Stauffer supplier now. Stauffer Chemical Company, Agricultural Chemical Division, Westport, Connecticut 06880.

Tree seedlings available

LANCASTER, Pa. - Lancaster Countians, who want to plant trees, but find the idea too costly, will get some help in April from the Lancaster County Conservation District.

The Lancaster County Conservation District is offering ornamental evergreen and hardwood tree seedlings at low cost to County residents.

As in previous years, the District's goal in this project is to improve the environment. There is no requirement or restriction as to how the trees shall be used. They may be planted for windbreakers, privacy, or in erodable areas to aid in the establishment of adequate cover and prevent erosion of valuable soil. Also, they may be planted for Christmas trees. Trees add beauty and aesthetic values to the surroundings of a home.

Tree seedlings offered are the evergreens - Norway Spruce, Blue Spruce, White Pine and Douglas Fir. Hardwoods available are... Sugar Maple, Red Oak, Scarlet Oak, and Flowering Dogwood (white). The seedlings range from six inches to eighteen in height, depending on the species.

Evergreen seedlings will be priced at 1 packet of 10 for $1.50 and Hardwood seedlings will be priced at $1.00 each.

All orders should be mailed, along with a check made payable to the Lancaster County Conservation District at the following address: Farm & Home Center, Room 6, 1383 Arcadia Road, Lancaster, Pa. 17601. Further questions should be directed to the District Office at 299-5361.

The tree seedlings must be picked up at the J.C. Penney Mall, Park City, Lancaster, on April 16, 1977, between 10:00 a.m. and 2:00 p.m.

The District is not responsible for trees not picked up on Saturday, April 16, 1977.

TREE SEEDLING ORDER BLANK

Please Print, Complete All Blanks. Submit order with check or money order to Lanc.Co.Cons.Dist. by March 21.

Seedlings shall be picked up at the J.C. Penney Mall, Park City, between 10:00 a.m. & 2:00 p.m., April 16, 1977. District not responsible for seedlings not picked up.

Think more corn profit/acre.
Think Unipel® 20-10-10 fertility.

Across the Corn Belt, more and more farm operators know that a corn fertility program including Ortho's Unipel 20-10-10 pays off consistently with higher corn profits per acre

Late Winter and early Spring preplant applications of Ortho Unipel 20-10-10 have helped increase returns over fertilizer investment up to $86 an acre more than blends and up to $40 an acre more than a liquid program

Five key ingredients in each pellet of Unipel 20-10-10 benefit corn with an uninterrupted season-long flow of Nitrogen, Phosphorus and Potash Both Nitrogen and Phosphorus are present in quick and sustained feeding forms to provide both immediate and continued nutrient feeding And adequate Potash rounds out the balanced Unipel diet to develop strong roots, sturdy stalks and leaves

You can make unique, pelleted Unipel 20-10-10 your complete corn fertility program, or just part of it, depending on your yield goals and soil conditions

We'll recommend the best Unipel fertility program for you to make the big difference in your corn profits per acre

One of the farms which Larry Weaver operates is this one, owned by his father, Lester. The hog barn is on the left, steer facilities on the right, and an elaborate shop for repairs in the center.

Pennsylvania Jaycees choose top farmer

Positive attitude keeps Weaver on success track

By DIETER KRIEG

NEW HOLLAND, Pa. - For ten years, Larry Weaver has gone through the ups and downs in farming. Anyone who has raised hogs and steers during the last ten years knows there have been some bumps, bruises, and scratching to do. And then there are taxes, inflation, urban sprawl, and the ever-present cost-price squeeze to contend with.

But Larry Weaver hasn't let any of that get him down.

He can't afford to.

Consequently he has maintained a positive attitude about his chosen profession and he continues to look forward in an optimistic way - living, planning and working to do his best.

Perhaps the New Holland Jaycees noticed that when they chose him as their outstanding young farmer earlier this year. For years some Jaycee members had been urging the young farmer to enter the program, but he always modestly declined. This year the 31-year old beef, hog, and corn producer decided to give it a try.

The New Holland R1 farmer won the contest and went on to participate in the state contest, which was sponsored this year by the Quaker State Oil Company.

Last Saturday Weaver found himself in a fancy meeting room of a King of Prussia, Pa. hotel. Approximately 800 people filled the room. It was time to present the Outstanding Young Farmer Award to one Pennsylvania farmer.

Weaver received the high honor, becoming the second Lancaster Countian within two years to win the award. Last year's winner was Charles Rohrer of Paradise. Aside from young men being honored at the luncheon, the state Jaycees also presented brief slide shows about the winners' operations and duties.

Placing second in the contest was Jerry Burkin, a young farmer from Martinsburg, Blair County. In third place was another Lancaster Countian - Ken Zurin from Salunga.

In Weaver the Jaycees found a young farmer who takes his downs along with the ups. They're a part of life and work. Interested in farming for all of his life, Weaver never did expect things to come easy. It's a career which he knew would take lots of hard work, long hours, risks, high investments, and low returns. It's a field in which corners can't be cut, where careful management is a must and where dedication is as

Laurel Schaeffer

Farm girl

[Continued from Page 1]

and until recently was also employed at the Country Acres Farm Stores. While at college, she spent one of her Summers working on a farm. "I did such things as feeding cattle, and field work," she told Lancaster Farming.

While in school, Mrs. Schaeffer served as secretary of the Block and Bridle Club for two years. Her extracurricular activities included field hockey. Her interests besides agriculture include skiing, skating, and swimming. She also enjoys gardening, the outdoors and meeting people.

In working for Lancaster Farming the new correspondent hopes to be of service to the paper and the Berks Countians it serves. "I also believe I will be learning more about agriculture at the same time," she says.

Berks Countians who have news to pass on to Lancaster Farming are asked to do so by contacting either Mrs. Schaeffer, 612 Penn Avenue, Sinking Spring, Pa. 19608; Phone 215-678-4262; or the newspaper directly at Box 266, Lititz, Pa. 17543; Phone 717-626-1164.

What's New

NEW UTILITY PUMP

A handy, portable gasoline-engine driven pump model for general dewatering purposes, identified as model 2GSP, has been introduced by Peabody Barnes, Mansfield, Ohio. The pump features a trim, compact design mounted on pan-type base. A built-in carrying handle makes it easy to take this self-priming centrifugal model wherever it's needed.

The pump offers two inch suction and discharge openings, cast iron body and impeller, and semi-open impeller design that permits pass-through of small solids. Seal is stainless steel, self-lubricating mechanical type with ceramic-carbon face.

Widely flexible in potential

applications, this Peabody Barnes unit will deliver approximately 90 GPM in moving water at relatively low heads. It can also be used effectively for high head applications such as pumping out basements, dewatering pits or other low lying areas where the pump itself must be located some distance above or away from the water level.

ENJOYING ELECTRONICS

Tips To Help You

You can enjoy your audio tape recorder more if, before you start recording, you clean the recording head as recommended by the manufacturer A clean machine makes for a clear high fidelity recording

You can re-use and re record on an old tape Most tape recorders will erase as they record But the Electronic Industries Association suggests you don't allow the tape to move forward accidentally while your machine is not in a recording mode, or it will retain the original recording

* * *

If you are thinking about buying a new tape recorder, decide which format—cassette, cartridge, open reel or mini cassette best meets your needs

essential as anything. Debt is a necessary part of life.

Asked what the key to success in agriculture might be, the bearded young man answered: "You've got to be an efficient operator - be a little better than the average guy."

He believes there's a good future in farming, but adds that: "A guy just about has to put everything he has into it - you've got to be born into it and be really dedicated. you have to like long hours and hard work - there are no quick schemes to get rich."

Speaking about young men who want to get started in farming in particular, Weaver commented: "The young farmer has a rough road to hoe - inflated machinery costs, etc., and unless he receives a real break from someone, he'll have a tough time getting started."

The outstanding young farmer received his start in the Fall of 1966 when he took over his father's farm. He is a 1963 graduate of Garden Spot High School and credits his keen and sustained agricultural interests to his vo-ag instructor, Dr. Robert Herr.

Prior to entering farming, Weaver worked for 3½ years for either his father or a New Holland agribusiness.

The young man presently farms 195 tillable acres, of which 150 are in corn with the remainder split up for alfalfa, small grains and tobacco. He owns one farm himself and rents a second property from his father, Lester.

Two hundred head of steers, 100 sows, and 500-600 pigs for fattening complete the livestock inventory on the Weaver farms. In addition, he markets between 800-900 head of feeder pigs per year.

Weaver says he was born and raised on a farm and has always liked it. Asked if he ever had any regrets about his decision to go into agriculture, the award recipient grinned broadly and referred to experiences which frustrate or annoy any farmer. Still grinning, but giving a more serious answer, Weaver expressed considerable satisfaction with his chosen profession.

Weaver's farm is very close to housing areas, and is, in fact, adjacent to a trailer park. This has created some awkward situations at times, but the young farmer has been able to adapt to that too. Some examples follow.

One evening he was out plowing after dark. A neighbor called to complain. Another time he finished his field work at three o'clock in the afternoon and went to the barn to do some other chores. A neighbor called that evening to protest about his not having plowed the field he had just finished picking corn from. The neighbor was concerned about corn husks blowing over his yard. These are occasional problems which catch Weaver from both sides.

Even so, Weaver looks on the brighter side of things. He believes the public is becoming more aware of the value of agricultural land and expresses some confidence in the ability of the zoning boards to make the right decisions. He is also very conservation minded and strives to make the area around him be pleasant to all who live there.

The Jaycee Outstanding Young Farmer Award is given on the basis of 1. rate of financial growth in the farm business, 2. conservation practices, and 3. community activities and leadership.

Weaver and his wife, the former Carol Ann Hess of Strasburg, keep extensive records on their farming operation and use the accounting services of the Pennsylvania Farmers

LIFE on the farm

By Dieter Krieg

As if by some magical spell, the ugliness of winter had turned into something which was breathtakingly beautiful. The day - the countryside - looked as fresh and pretty as a young bride.

Robed in white, the trees and shrubbery appeared to be out of this world. Everything looked so soft, fluffy, and pure. What a sight to behold!

This was no day to wash the windows in the barn, curry the cows, or work on production records All that could wait! This was a day to really appreciate the beauty of Nature

With that, I grabbed my camera and loaded it with black-and-white film, and began hiking through the pasture towards the woods.

The scene I was eventually surrounded by was stunningly beautiful. Every snowflake was placed with such precision! I could never have imagined such beauty Walking through the snow very slowly, I admired the white "carpet" beneath my feet and the "canopy" above my head The texture of the "carpet" included tall weeds and grasses, tree stumps, twigs, and fallen leaves. Everything was blanketed by snow in a majestically artistic fashion. The canopy abo was branches and twigs, all dressed in white

Silence reigned throughout the woods, and it seemed to be appropriate within this masterpiece of purity.

No, this was not the first time I had seen snow add its charm to the countryside. Nor was it the last. But like the coming of Spring each year, the birth of a new baby, or the return of Autumn colors, it was a sight which one can appreciate each and every time one sees it. You just don't ever get tired of that sort of overpowering beauty.

I remember walking along the edge and into the woods that day, and my only regret was that there was no way I could do the scenery justice with a camera. Not even with a classic Zeiss-Ikon from Germany. The beauty had to be observed in real life and in three dimensions. It also had to be felt, because the air was refreshing and standing in the middle of it all could make one feel as though he was allowed to walk into a very special kingdom.

Trying to capture all that on film was impossible.

It was an experience which I suppose could be classified as one of the "simpler" things in life.

I needed no tickets, and no transportation besides my own legs. I came dressed in barn clothes and didn't bother about making an appointment. All I had to do to partake of this "simple" pleasure was to put the chores aside for a while and open my eyes.

Life on the farm wouldn't be complete without such occasional excursions.

THIMET® 15-G Soil and Systemic Insecticide has been helping growers control corn rootworm for 14 consecutive years And the reason corn growers depend on THIMET is because it does the same effective job every year
Thimet works! It can be applied easily in a band at planting at low per-acre cost
THIMET is easy on equipment, too It flows freely Won't clog or wear applicator parts And THIMET treated corn can be used for grain or silage
See your dealer for THIMET It'll work for you this year as it has for the past 14
Use pesticides effectively Read and follow label directions carefully

THIMET means dependable, economical corn rootworm control.

American Cyanamid Company Princeton New Jersey 08540

The Grassland Future Farmers of America's 9th Grade Chapter elected the above students to serve as officers for the coming year. Left to right they are: Ron Fox, sentinel; Owen Hartz, reporter; Gerald Fox, treasurer; Joe Good, vice president; Chris Herr, president; Clifford Hurst, secretary, and Bob Weaver chaplain. The group is currently involved in a seed sale to raise funds for their activities including a summer trip for members and parents. They are also planning to get involved in several contests and go to a hockey game and baseball game during the year.

The 12 to 18 hour forecasts of the weather bureau are considered 85 percent accurate today.

Weaver

[Continued from Page 19]

Association, of which they are members.

Weaver doesn't look at agriculture as a big bed of roses by any means. He is concerned about urban people and businesses moving out into the country and taking away valuable agricultural land. "Cities ought to grow where corn doesn't grow," he told Lancaster Farming. "In time, this urban sprawl could be as big a threat to agriculture as anything," he added. "Also, city folks like to live in the country with all of the city conveniences, but without country displeasures." Another problem which he foresees deals with environmental groups and regulations. With his conservation programs, he's trying to prepare for the future as best he can.

The Jaycees picked Weaver as a winner because they undoubtedly realize that with farmers such as him everybody becomes a winner. Pessimistic men in any business don't get far. Weaver is progressive and totally dedicated to his profession. That adds up to continued supplies of food and fibre.

As winner of the Pennsylvania contest, Weaver and his wife will go to Bismarck, N. D. on March 18 to compete for national honors. That event will be sponsored by John Deere. Weaver will enter the contest along with 46 other state winners from all over the country.

Nutrena Controlled Release CLS— so different, it's patented

Your cattle will like Nutrena Controlled Release CLS and you'll like the benefits behind this new development in liquid supplements. The patented process controls the release of protein-building ammonia nitrogen in the rumen compared with a conventional urea-based liquid supplement. This improves the feeding efficiency of the urea. And, the slow-down means an extra margin of safety from urea toxicity—that's important when self-feeding liquid supplement.

Nutrena Controlled Release CLS liquid supplement—a product of Cargill research. It's great for dairy herds as well as beef cattle on range, pasture, stalks, stubble or in the feedlot.

Tank mixing of pesticides detailed

Tank mixing pesticides is a practice that has gained widespread acceptance in recent seasons. Time and labor savings are two of the obvious benefits, but certain precautions must be taken when using this practice to insure proper control. A recent survey conducted by Stauffer Chemical Company points up some general guidelines to get the most out of this system and limit possible mistakes.

First and foremost to remember before attempting any tank mix is to read the labels. The information contained may be long and involved, but it is there for a purpose: to help you make the best use of the material. Follow directions carefully regarding mixing, method of application, dosage, soil characteristics and other applicable information.

Recent EPA guidelines permit the use of non-registered tank mixes until Oct. 1977 if dosages do not exceed label instructions for any product in the mix used singly for the same pests on the same crops, and if labels do not explicitly instruct against such a mixture.

According to Dr. Douglas Murphy, agronomist with Stauffer Chemical Company, "before you mix any pesticides, first do a test for material compatibility. Many pesticides may not form a stable mixture causing layering or formation of precipitates. Application of a mixture of non-compatible materials will cause excessive rates of each chemical in separate parts of the field resulting possibly in crop injury, poor control, residue problems or feed contamination."

An easily performed compatibility test involves the following procedures:

First place one pint of the carrier, usually water or liquid fertilizer, in a quart jar. Then add each pesticide to be mixed, one at a time, and shake well between each addition. When adding the pesticides be sure to use the material in the same volume proportion as to be used in the field according to label recommended dosages and your soil conditions.

The usual order for pesticides to be added for proper mixing is: wettable powders first followed in order by flowables, water solubles, surfectants and emulsifiable concentrates. These are general recommendations and label information may give more specific directions.

After the materials are added and agitated thoroughly, let the jar stand for approximately one hour while inspecting for any separation by layer or precipitate formation. If there are any precipitates formed, or relatively quick separation into layers, the mixture is incompatible and should not be used.

"The amount of separation permitted depends somewhat on the agitation capabilities of the field spray tank. Generally, however, minor separating after 30 minutes is tolerable if field sprayer agitation is good," Dr. Murphy adds.

Compatability tests should be performed each time you fill the spray tank even if using the same formulations. The same analysis of fertilizer may vary in mixing qualities from batch to batch and manufacturer to manufacturer, and untested mixes of the same material may cause problems.

Make sure you have good spray tank agitation. Even somewhat unstable mixtures may be possible if agitation is sufficient to keep them in suspension.

When mixing in the field sprayer, put the carrier in prior to addition of pesticides and allow time for thorough mixing between each material addition. Shortcuts may save you a few minutes, but the penalties can be exacted in yield and dollars.

Apply the fully agitated mixture as soon as possible after formulation to prevent possible separation, precipitation or caking. Do not allow mixtures to stand overnight without constant agitation.

Consult label information carefully regarding temperature and humidity data which may apply before mixing or if application is delayed.

If you are trying an unknown combination, test it out first on a small scale at varying rates and under different conditons before large scale use. Check with extension agents for information concerning university test data on new mixes or local water conditons which may affect mixtures.

Don't mix pesticides which require different application methods. "Using foliar insecticides like Imidan, for example, with soil incorporated herbicides like Sutan+ or Eptam, will cause improper placement of one or both of the materials," Dr Murphy explains.

Don't hesitate to seek help from your farm chemicals dealer or manufacturers representative for advice if problems crop up. Many times they will have access to information you might not know exists.

Do not exceed or underrate dosages of registered tank mixes. Registration is granted only after exhaustive testing under all possible conditions to assure proper control. Varying these rates may result in crop injury or pesticide non-performance.

Due to impressive fuel economy, Jøtul is an investment that can pay for itself over the first winter.

Honey production up 34 per cent

HARRISBURG, Pa. - Pennsylvania honey production during 1976 totaled 2,883,000 pounds, an increase of 34 per cent over last year. The yield per colony during 1976 averaged 31 pounds, a six-pound increase over the previous year.

Honey stocks on hand for sale in mid-December totaled 923,000 pounds, compared with 645,000 pounds a year ago. Beeswax production for 1976 was 46,000 pounds, an increase of 3,000 pounds from 1975 production.

Sales of honey in Pennsylvania in 1976 indicated that an average price of 61.5 cents per pounds was received. This is 2.6 cents per pound more than the 1975 price of 58.9 cents per pound.

U.S. honey production during 1976 totaled 199.8 million pounds, an increase of one per cent over the 1975 crop. While production showed a slight increase, yield per colony decreased from 47.3 pounds per colony in 1975 to 46.4 pounds per colony in 1976. The 1976 honey crop was produced by 4.3 million colonies, an increase of three per cent from the previous year.

The production value of the 1976 honey crop was slightly below the 1975 crop value at $99.8 million, but was six per cent above the 1974 crop. The 1976 average price received, at 49.9 cents per pound, was 0.7 cents below the 1975 price. These prices relate to all wholesale and retail sales, extracted chunk and comb honey from all apiaries.

Extracted honey in wholesale lots sold for an average price of 45.0 cents per pound, 0.7 cents below the 1975 price. Unprocessed bulk honey in 60 pound containers averaged 49.0 cents per pound compared with 49.9 cents per pound in 1975.

Processed bulk honey averaged 50.2 cents per ound in 1976, 2.3 cents above a year earlier, while processed packaged sales averaged 62 cents per pound compared with 63 cents in 1975.

Milk prices $10.97 in March

ALEXANDRIA, Va. - Middle Atlantic Order Market Administrator Joseph D. Shine announced a March 1977 Class I milk price of $10.97 per hundredweight last week. Shine stated that this price is down six cents from February and is 71 cents below the March 1976 class I price. Order No. 4 prices are announced for milk testing 3.5 per cent butterfat, f.o.b. plants located within 55 miles of Philadelphia, Pa. and also within 75 miles from the nearer of Washington, D. C. or Baltimore, Md. There is also a six-cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia.

Shine also announced a Class II milk price for January 1977 of $8.24 per hundredweight and a butterfat differential of 10.4 cents for each tenth of a pound of fat.

These class prices are based on the January 1977 Minnesota - Wisconsin manufacturing milk price of $8.19 per hundredweight adjusted to 3.5 per cent butterfat.

The USDA reported the wholesale price of Grade A butter at Chicago during January was 90.82 cents per pound and the nonfat dry milk price was 62.53 cents per pound f.o.b. plants in the Chicago area.

Charolais officers chosen

GETTYSBURG, Pa. - The Pennsylvania Charolais Association at its January meeting elected new officers and directors for 1977. The new officers are President: Raymond Bratton of McVeytown, Vice President: Roger Mitschele of Morris, and Secretary-treasurer: David Simpson of Gettysburg.

The directors for the association are: Wilson Tegg of Gettysburg, Doug Keyser of Greensburg, Harold Heintzelman of Mt. Pleasant Mills, Dave Seamans of State College, Jim Wentzel of Selinsgrove, and Dick Shidemantle of Conneautville.

The new mailing address for the Pennsylvania Charolais Association will be: The Pennsylvania Charolais Assoc. c-o Mr. David Simpson, Secretary-treasurer, Box 366A, Gettysburg, Pa. 17325, phone: 717-334-7758 or 717-334-3197. Mrs. David Simpson will be handling calls and correspondence for the Association.

State watches firewood sales

HARRISBURG - Pennsylvania's Acting Agriculture Secretary Kent Shelhamer on Tuesday urged vendors of firewood to abide by state law in selling to consumers. The Agriculture Department's Bureau of Weights and Measures has the responsibility of enforcing the law.

Shelhamer said that Section 23.107, Title 70 of the Pennsylvania Code specifies "...wood used for fuel shall be sold by the cord of 128 cubic feet, or a fraction thereof..." and the buyer or his designee must be given a statement or invoice certifying the amount sold at the time of delivery or billing.

Shelhamer said his Department had no choice in enforcing the law and that dealer advertisements offering firewood by, "the face cord, home cord or truckload" did not meet compliance requirements.

The Cabinet official stated he was sure many vendors were unintentionally in violation but that other cases constituted "rural gouging" of the consumer. He added that the law existed for consumer protection and that he had every intention of enforcing the applicable provisions.

Weights and Measures inspectors are issuing "Pink Slip Notices" to advertisers or vendors who offer firewood for sale by the truckload, pile, piece or any measurement other than the cord. Shelhamer warned those who ignored the Departmental notices, which clearly indicate relevant sections of the law, would be held in violation.

Shelhamer asked consumers to request firewood, "by the cord or fraction of the cord" and called attention to the fact that a cord of wood is a stack four by four by eight feet so that buyers would have some general guidelines.

He said that complaints about sales of firewood should be directed to any regional office of the Department of Agriculture or to the Bureau of Standard weights and Measures, Department of Agriculture, 2301 North Cameron Street, Harrisburg, Pa. 17120. Phone complaints may be directed to any regional office or to 717-787-9089.

Price Index up

HARRISBURG - The January 15, 1977 Index of Prices Received by Pennsylvania farmers increased three per cent from the previous month but was down to two per cent from a year earlier, according to the Crop Reporting Service.

Higher prices for most commodities more than offset lower prices for milk cows, turkeys and eggs. The purchasing power of prices received in January was one percentage point above December, but five percentage points below January 1976.

Nationally, the Index of Prices Received increased two per cent from December, but was two per cent below a year ago. Contributing most to the increase since mid-December were higher prices for corn, hogs, soybeans, broilers and commercial vegetables. Lower prices for eggs, potatoes, cotton, oranges and milk were partially offsetting. The purchasing power at the U.S. level was one percentage point below December and six percentage points below January 1976.

Potatoes up 28 pct.

HARRISBURG - Pennsylvania potatoes in storage on January 1 are estimated at 3,550,000 hundredweight (cwt.), 28 per cent more than a year ago, according to the Pennsylvania Crop Reporting Service.

The potatoes represent 50 per cent of the state's fall potato production estimate. Stocks last year at the same time amounted to 41 per cent of the 1975 production.

Disappearance since harvest equals 3,590,000 cwt. of which 950,000 took place after December 1.

In the U.S., stocks of potatoes for all uses held in storage by growers, local dealers and processors in Fall production areas totaled a record high 169.2 million cwt. on January 1. This figure is 12.2 million cwt. above the 157.0 million cwt. on hand a year ago, an increase of eight per cent.

Disappearance of the 1976 Fall potato crop totaled 128.3 million cwt. (excluding Nevada), up 12 per cent from the 114.9 million moved during the same period a year earlier.

Stocks in the eastern states on January 1 totaled 25.9 million cwt., down four per cent from th 27.0 million cwt. on hand a year earlier.

THE GOOD WORD from the Bible

Some people are of little faith They believe only what they see with their own eyes They accept nothing at face value

Such were the Pharisees and Saducees who came to Jesus asking for a sign from heaven They had heard if they had not witnessed the miracle of the loaves and fishes They had been told many times of the wondrous things Jesus had performed But they wanted more If they were really to put any credence to the idea that Jesus was the one they wanted special treatment They would ask for some great sign and watch Jesus in a sense, perform

With some modern-day Christians it is pretty much the same story They accept Christianity they outwardly profess but they would feel much better if they could see just one little miracle

What they forget as Jesus reminded is that the whole universe the very gift of life everything that we see feel and know evidences the miracle of God s love

Co. FFA project books scored

MANHEIM, Pa. - The Lancaster County Future Farmers of America held their yearly project book evaluation last Monday evening at the Manheim Central High School Agriculture Department. Out of 119 books scored from the six schools participating, 23 gold medals, 18 silver, and 20 bronze medals were awarded. These award-winning books, along with others of top quality will now go onto state competition. This competition will be held at Penn State on February 14.

The Cloister FFA of Ephrata High School took the largest number of gold medals. They had a total of seven golds out of 34 entries. Following close behind was Solanco High School with six out of 23 entries.

The production enterprise books were judged on a total of 140 points. Forty points were based on the total labor or net income; 40 on efficiency factors in production; 20 on accuracy; 20 on completeness; 10 on neatness; and 10 on improvement projects.

A listing of the winners from each school follows.

SINGLE ENTERPRISE BOOKS

OFF-FARM WORK EXPERIENCE

Gary L. Eberly, Ephrata, gold; Jeff Gehman, Ephrata, gold; Steven Hull, Ephrata, silver; Reuben L. Auker, Ephrata, silver; Daniel Witwer, Garden Spot, bronze; David B. Martin, Ephrata, bronze; J. Martin Hoover, Ephrata, bronze

FFA CHAPTER SCRAP BOOK

Manheim FFA Chapter, gold; Grassland Environmental FFA Chapter, silver; Garden Spot FFA Chapter, bronze.

Roasting Rules

For a perfect loin roast — tender juicy and delicious — follow these rules 1 Place roast, fat side up on a rack in an open roasting pan 2 Insert roast meat thermometer so the bulb is centered in the thickest part, making certain it does not rest on fat or bone 3 Do not add water 4 Do not cover 5 Roast in a slow oven (325 degrees F) until the meat thermometer registers 170 degrees F — which is well done

☐ Hoffman Formulas are the modern, practical approach to getting bigger crops of high-quality forage. They combine and blend leading varieties of grasses and legumes to give you broad spectrum performance. Help you still make a good crop when adverse weather strikes . . . when soils or climate conditions are less than the best. Or when disease is a problem. And their built-in high yield potential really blossoms under good conditions.

Every one of the 14 Hoffman formulas is designed to produce top results for specific uses under northeastern conditions. See your Hoffman Seed Man, or write for a copy of our new catalog.

Cumberland County 4-H Baby Beef Club

Trophies given to young cattlemen

By DIETER KRIEG

MECHANICSBURG, Pa. - An estimated 270 people gathered here at the Citizens Fire Hall on Thursday evening to award trophies to Cumberland County's top 4-H'ers with baby beef projects.

The 51st such event to take place in the County, the program brought together scores of people from rural and town areas. The Mechanicsburg Area Chamber of Commerce sponsors the event. In charge of this year's progra was John M. Hulse, a Mechanicsburg insurance man w serves as president of the Chamber of Commerce and chairman of the baby beef committee.

Several top awards were presented to the 4-H'ers.

Capturing the Senator George M. Wade Memorial plaque was 16-year old Judy Long. The award is given annually "to the member of the Cumberland County Baby Beef Club whose activities best exemplify the high ideals of integrity, leadership, and citizenship to which the late Senator Wade dedicated his life."

Miss Long is a 7-year 4-H member who has gone to the State Farm Show three years. She lives with her parents on a beef and hog farm.

Betty Deitch of Carlisle R5 received a tall trophy for the tall job she did last year with her steer "Travis." She showed the animal to county grand champion honors. Her grand champion steer came from a farm in Kentucky, the 16-year old Miss Deitch told **Lancaster Farming.** She lives on a dairy farm and would like to be a secretary

Bret Ritter, 18, hails from a dairy farm in the Boiling Springs area. Active in 4-H for a number of years, the tall youth has been successful with both beef and dairy projects. At Thursday night's banquet, he was given a trophy for having had the reserve grand champion steer in Cumberland County last year. The animal, named "Buck," came from Montana. Bret has a career as a dairy farmer in mind.

Showmanship awards were presented to Deb

[Continued on Page 37]

Winners in the Cumberland County 4-H Baby Beef Club award program, sponsored by the Mechanicsburg Area Chamber of Commerce, were, left to right, Bret Ritter, Judy Long, Betty Deitch, Deb Nailor and Tammy Hoy.

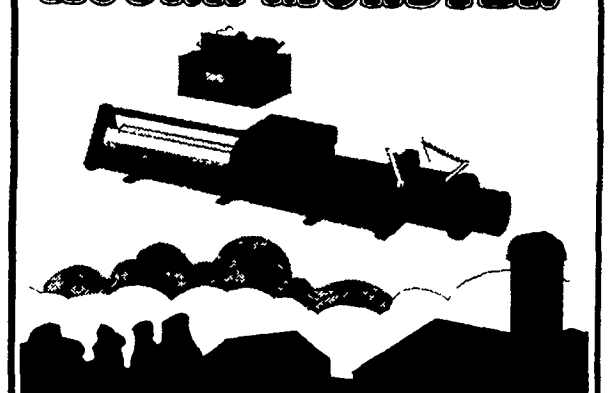
THE NO. 1 BESTSELLER YOU'VE BEEN WAITING FOR!

ACORN IS ON THE MOVE!

acorn

ACORN MONSTER



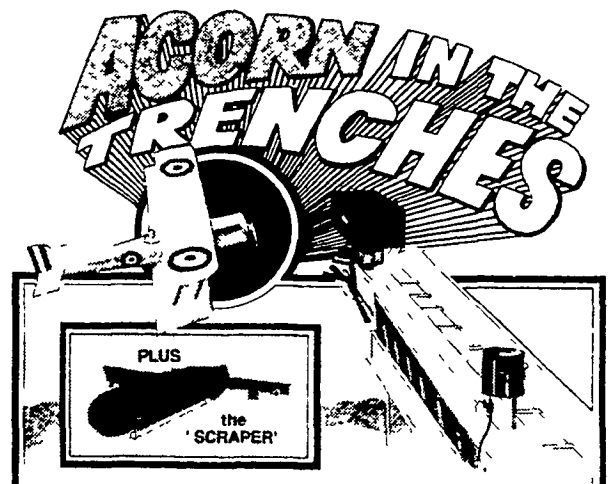
Acorn's monstrous hydraulic manure pump moves chunky manure and bedding — wet or dry

- Massive piston — 10½" dia x 41½"
- Manure drops **ahead** of the piston for most positive action
- Pump forces manure up and into remote pile — retaining valuable nitrogen reducing odor and flies
- Eliminates daily hauling — can reduce fertilizer costs with proper management

Acorn's Monster — fully backed by a no nonsense 1-year warranty

Four unloaders for silos 12' to 30' each with the most wanted features for high capacity, long life.

ACORN IN THE TRENCHES



Put Acorn in your barn clean up platoon and start winning manure battles

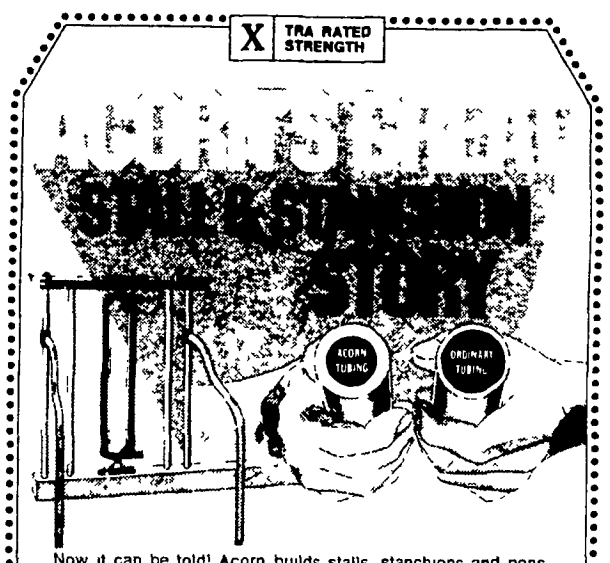
- **Super 600 Chain Gutter Cleaner** — moves manure at 23 ft per minute Long life 11-ga galvanized elevator
- **Liqui-Matic Cable Gutter Cleaner** — for smaller operations Paddle train operates at 140 ft per minute
- **Mark II Alley Scraper**—totally automated Special tip up scraper blade wipes alleys cleaner faster and at less cost than other makes

All Acorn equipment backed by no-nonsense 1-year warranty

GO WITH THE INNOVATOR OF FARMSTEAD EQUIPMENT, NOT THE IMITATOR . . . "FOR INFORMATION CALL TOLL FREE 800-528-6050 EXT. 741 24 HOURS A DAY, 7 DAYS A WEEK"

X TRA RATED STRENGTH

ACORN'S STALL & STANCHION STORY



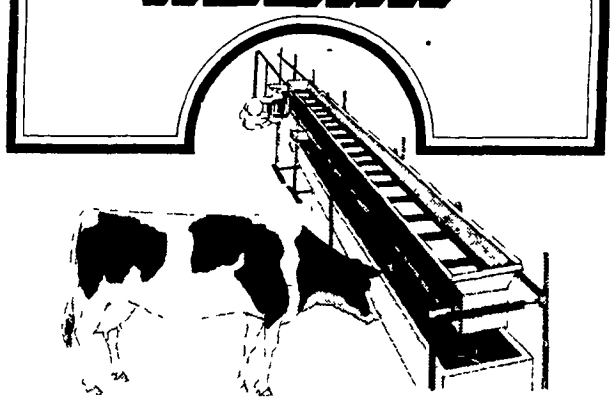
Now it can be told! Acorn builds stalls stanchions and pens tough enough to get an X-tra Strength rating

- **Acorn tubing exposed!** Stronger 1⅝" OD tubing 140 wall thickness
- **Lifetime partitions!** Special copper bearing tubing fights rust corrosion Lasts twice as long as ordinary partition steel
- **Free sneak preview!** No-charge planning service for your barn

ACORN'S STALL AND STANCHION STORY—A GREAT PERFORMANCE!

Give your livestock a healthy climate all year 'round with Acorn's Airstream ventilation system

MIDNIGHT ACORN



Automatic feeding—daylight or midnight—with Acorn's Overflite Feeder

- Fills 250 ft bunk in 5 minutes
- Unique fast-lock snap-together assembly
- Galvanized construction
- One-year no-nonsense warranty

Handle tough layouts with Acorn's do-it-all line of belt and auger feeders plus a single-chain conveyor that does it all with one low-horsepower motor

Hort club plans year

Plans for the coming year were made at an executive meeting of the York County 4-H Horticulture Club. The meeting was held at the home of president Broke Palmer.

The list of activities for the year include programs on soil testing, the makings of a corsage, slides of the National Junior Horticulture convention, and a program about the 4-H horticulture, vegetable and flower judging teams. Plans are being made for a trip to Longwood Gardens and a tour of a York County fruit farm.

The next meeting will be February 21 at 7:30 p.m. at the 4-H Center. The program will be soil testing and garden preparations by Timothy Markovits, assistant county agent. All 4-H members, 4-H Leaders and persons interested in all aspects of horticulture are invited to attend.

Poultry meeting set

LANCASTER, Pa. - The Lancaster County Poultry Association and the Penn State Extension Service are sponsoring a meeting for poultrymen at the Farm and Home Center, Lancaster, on Thursday, February 17, at 7:30 p.m. The program will consist of three topics: "Poultry Health for Broilers, Layers, and Turkeys," discussed by Dr. Robert Eckroade, director of New Bolton Center Diagnostic Lab; "Using Eggs for Developing Vaccines" by Dr. Dave Malinzak, supervisor of Production Development Division, Wyeth Laboratories; "The Energy Cost of Food," a slide presentation.

Crops Day slated

WEST CHESTER, Pa. - The Cooperative Extension Service of Chester County has scheduled a Crops Day for this coming Wednesday, to be held at the Stone Barn, two miles west of Unionville.

Topics to be discussed during the program, which begins at 10 a.m., include: Corn Standability, choosing corn hybrids, coping with the problems of early planted corn, Johnsongrass, keeping the weeds out of alfalfa, why herbicides fail to work, controlling those hard-to-kill weeds in corn, nitrogen fertilizers, liming and lime quality, and hay preservatives.

Speakers are: Joseph McGahen, Penn State agronomist, Willis McClellan, Penn State agronomist, Wayne Hinish, Penn State agronomist, Lynnn Hoffman, manager, Penn State Research Farm, William Kjelgaard, Penn State Agricultural engineer, and area farmers.

Abe Diffenbach Manager

We carry a complete line of all natural organic fertilizer competitive with chemical fertilizer in price and production, but also builds your soil - a product called Sure-Grow.

Watch for a Sure-Grow meeting soon Speaker - Phillip Wheeler, a soil consultant from Nature's Way Farm in Michigan.

Our outstanding minerals, enzymes and organic fertilizer prepare the soil for water holding capacity like you never saw anything before. They break up hard clay and sub-soil to hold excess rain, then like a soft wick release it upwards in a drought Reports are they more than double the income or profit of vegetables in test plots and some nearby Plus insect, blight and fungus resistent. A sick orchard revived and gave three tons Ann Arbor cherries per acre We have natural insecticides if you need them There is no excuse for not going organic We now have the products to make quality and quantity, better keeping quality and flavor.

ORGANIC CENTER

381 A East Jackson Street, New Holland, Pa. 17557

Opening about February 8 but write now for details And we have the market for your quality produce Scores and scores of stores want it now that they know where to buy a load of variety at one place - our warehouse There is no excuse for growing something that is toxic to the body, a slow poison

5 TONS OF CARROTS wanted a week by one distributing company Most everything in the catalogue is wanted in large quantities, by the truckload. They can't afford to come a distance for just a little More growers needed Please tell those who have working age children and some land They may not see our ads

We ll handle it for just a small commission if you buy your soil needs from us to help pay the expenses and rent etc We'll handle first year organic but no premium prices like the other Dealers are Weaver Hurst R D No 2 Buchland Road, Narvon and Samuel B Stoltzfus, R D No 2 Peters Road, New Holland

Dealers wanted in other counties and states It is a business that will grow and be appreciated in adverse weather and economic conditions People and soil are getting too sick to battle out the obstacles!

Red Rose

(Continued from Page 1)

Farmer for one year or presently hold the degree of Chapter Farmer. Several other requirements must be met, as well, depending on whether the award is a two or four year degree. Approximately six per cent of the active membership of the county receives this degree, and this year every individual who applied for the award met the requirements.

At the same time the Red Rose applications are sent in, each school also selects one of its members to represent the school in one or both of the star agribusiness and star farmer competitions. These candidates are judged separately, and the winners receive a trophy and $100 toward a trip to The National Convention in Kansas City for the following year.

Aungst, chosen Star Red Rose Farmer, is a member of the Elizabethtown FFA Chapter, where he has held the offices of assistant sentinel, sentinel, and president of the chapter. He is also a Keystone Farmer. Awards he has received include honors in dairy judging, and a third place award in the county small engine contest. In the state project book contest last year, he received a gold medal.

Aungst's projects are two dairy cows, four dairy heifers, corn and wheat.

The Star Red Rose Agribusinessman, Marty Hoover, is a member of the Cloister FFA Chapter of Ephrata High School where he is presently serving as vice president. He has participated in meat judging, a milk contest, small engines contest, and livestock judging. Special awards he has won include a chain gilt, forestry proficiency award, honors in the Ephrata hog show, and in the Lancaster hog show. He is presently employed at Hollinger's Farm Market

In the Star Red Rose Farmer competition, James Breneman, Columbia R2, from Penn Manor High School, took second, and Charles Groff, Quarryville, from Lampeter-Strasburg High School, was third. In the Star agribusiness competition, Charles Blevins, Kirkwood R1, from Solanco High School, was in the second place.

Jeffrey Aungst

Marty Hoover

Other Red Rose Degree winners from the different schools include:

Elizabethtown High School

John Seward, Elizabethtown R3; and Robin Becker, Elizabethtown R3.

Ephrata High School

Sheryl Bollinger, Lititz R4; Thomas Brower, 37 Bethany Road, Ephrata; John Cramer, Forest Road, Denver R2; Jay Foltz, Ephrata; Ronald Frey, Lititz R1; Jeff Gehman, Denver; Willard Good, Denver R2; Dale Martin, Ephrata; Dennis Martin, Stevens R1; Steve Strauss, Ephrata R1; Rick Sweigert, Akron; and Ronald Martin, Ephrata R3.

Lampeter-Strasburg High School

Charles Groff, Quarryville; Joseph H. Witmer, Strasburg R1; Arthur Mellinger, Strasburg R1; Robert Duvall, Lancaster.

Manheim Central High School

Jay Gainer, Manheim R4; Dean Ziegler, Manheim R3; Gerry Kready, Manheim R6; Dale Balmer, Manheim R2; James Sweigart, Manheim R3.

Pequea Valley High School

Michael Martin, Honeybrook R2; Harry Kreiser, Gap R2; Steve Diener, Intercourse.

Garden Spot High School

Daniel Witwer, East Earl R2; Bill Hughes, East Earl R1; Larry Fox, New Holland R1; Gary Snader, East Earl R1; Robert Patterson, Morgantown R1; Elvin Huyard, New Holland R2; Linford Weaver, Reinholds R2; Lamar Messner, East Earl R1; and Ben Martin, East Earl R1.

Penn Manor High School

James Breneman, Columbia R2; David Charles, Columbia R2; Jay Neff, Millersville R1; Bob Bachman, Millersville R1, Ray Caldwell, Millersville R1; Carl Lindeman, Conestoga R2; John Mylin, West Willow, R1; Douglas Zimmerman, Millersville R1; Richard Falk, Millersville R1; and Steve Shertzer, Millersville R1.

Solanco High School

Ronald Clark, Quarryville R2; Charles Blevins, Kirkwood R1; Daniel Hershberger, Quarryville R1; Les Hershey, Kirkwood R1; Sam Long, Peachbottom R1; David Ramsay, Peachbottom R1; Brent Hess, Quarryville R2; Steve Weidman, Christiana R1; and John Groff, Christiana R1.

Top corn growers announced

TAMAQUA, Pa. - Bertram D. Leiby, who farms near here, has won the Pennsylvania Project:200 corn growing program with a yield of 183.8 bushels per acre.

Project:200 is sponsored annually by The Producers of Funk's G-Hybrids and is the largest corn growing program of its kind in the nation.

The national winners were Paul and James Corkle, O'Neill, Nebraska, with a yield of 337.7 bushels per acre. The Corkles won the title last year also, winning both times with Funk's G-4507.

Only eight corn yields have ever been recorded over the 300 mark. Seven of those were made with Funk's G-Hybrids.

Leiby used Funk's G-4321A in his high-yielding plot. His fertilizer program consisted of 164 pounds nitrogen, 102 pounds phosphorous, and 72 pounds potassium. He used AAtrex-Lasso for weed control.

Planted on May 10 in 40-inch rows at 27,000 plants per acre, it was harvested on November 4. His official yield was converted to 15.5 per cent moisture content.

Ralph R. Lankford, of Pocomoke City, Md., won the Project:200 corn growing contest in his state with a yield of 182.3 bushels per acre.

Henry F. Carey II, of Dover, won the Delaware Project:200 corn growing program with a yield of 163.3 bushels per acre.

Simpson-Trader Farms, of New Church, won the Virginia Project:200 corn growing program with a yield of 161.1 bushels per acre.

Paulsen Platform

When comedian Pat Paulsen ran for President he campaigned on the STAG (Straight Talking American Government) platform with these basic tenets "I think I'm a pretty good candidate, because first I lied about my intentions to run and I've been consistently vague on all the issues and I'm continuing to make promises that I'll be unable to fulfill"

Check our deal on corn herbicides

When you're ready to plan for this year's corn crop, come see us. We'll work with you to lay out a program to help you grow a good crop. Picking the best herbicide has got to be at the top of your list.

Chances are the best herbicide for you is liquid AAtrex® 4L. It's so easy to use, and so dependable. Gives you the kind of weed control you're after.

Of course you shouldn't overlook cost per acre, especially this year. That's why we think you should check our liquid AAtrex 4L program before you put your money on the line.

We think we've got a deal you won't turn down. Ask us about it.

Smith honored

[Continued from Page 1]

never wore another ribbon my animals won."

Mrs. Dorothy Fry told the Smiths, "It has always been a pleasure working with you." Making an analogy, she said, "Cast your bread upon the waters and let your light so shine . . ." and presented them with a lamp.

In acknowledging the tribute, Smith said, "It doesn't seem like 40 years. Time has flown awfully fast. We have a lot yet to do, and hope to stick it out and accomplish our goals."

In the business meeting, the following directors were elected to serve three year terms: James M. Eshelman, Mount Joy R 2; Raymond H. Stoner, Eden Road, Lancaster; Mrs. Chester Eshleman, Willow Street R1; Mrs. William Dean, Strasburg R 1; and P. Robert Wenger, Quarryville.

Bushong thanked the retiring members of the board who have seved six years. They are: Lewis Bixler, Marietta R 1; Donald Trimble, Peach Bottom, R 2; Dorothy Fry, Stevens; and Carl Brown, Lancaster. Mrs. Melvin Groff, Lancaster; R6 is retiring after serving one three-year term.

The Extension staff report was given by N Alan Bair who used slides to tell of the Association's accomplishments during 1976. He noted Lancaster County's enviable production record with a total value of all agricultural products in 1976 at $335 million. The dairy industry provided $83 million of that and a growing poultry industry provided over $73 million.

Bair said the work of the Extension Service is carried out on a one-to-one basis, in meetings and demonstrations and through mass communications. Four members of the staff write regular weekly news columns and the staff provides five daily radio programs, six days a week.

Mr. and Mrs. Smith (right) show off the lamp they received while President Mark Bushong and Board member Dorothy Fry look on.

Eleven full time nutrition aides are carrying the word of good nutrition, and financial and home management to families throughout the county.

In a percentage breakdown of staff time, 27 per cent is spent on farm products, 32 per cent on youth, 13 per cent on family living, eight per cent on professional training and six per cent on nutrition. The other 14 per cent is distributed between Extension organization, environment, home grounds, marketing, and community development.

In 1976, Bair said there were 3027 youth enrolled in the 4-H program, with teen and more than 300 volunteer leaders supervising the work of the individual projects.

Bair advised the group of two growing concerns for the County - land use and environmental concerns.

Marion Deppen, assistant director for the Capitol Region, added his thanks to the work of the staff and offered greetings from the University staff.

Speaker was Gilbert D. McKlveen, professor of audio-visual education at Kutztown State College, whose topic was "Growing Old Gracefully." He used humor in verse and prose, both borrowed and original, to make his point.

He also provided the musical entertainment through a group called, "Two Guys and a Gal - Mark X". It was a story of young love in song, provided by Susan Slusser, Northampton; Don Gergel, Allentown; and John Wienszezak, Allentown. The conclusion of the program was a series of slides set to the music of "America the Beautiful."

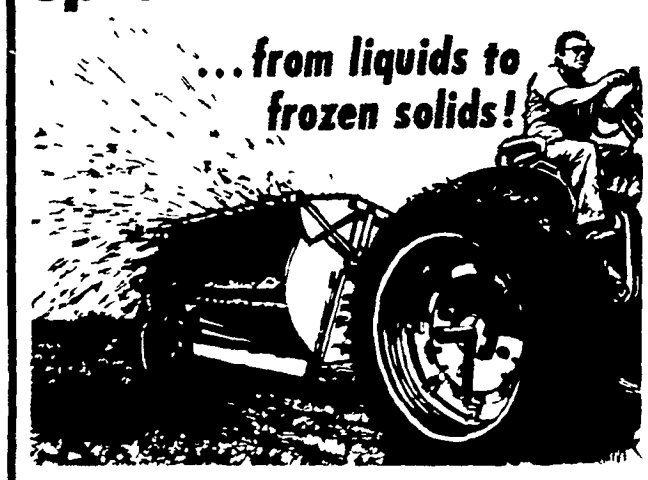
Spread ANY MANURE



STARLINE ROTASPREADER

Whether it's frozen or hard packed beef manure, cow manure with high straw content or heavy liquid hog or poultry manure, Starline Rotaspreader spreads it fast, evenly and at any desired density. Smashing chain flails pulverize all material, eliminating piles and chunks. Liquid tight body keeps mess off loading area and drives. Body is heavily galvanized to resist manure acids.

- No manure trails
- Ends freeze-ups
- Timken roller rotor bearings
- Choice of manual or hydraulic lid opener

GO Zero Concord
FROM TEAT TO TANK!
NEW MODEL 70 s
Zero Concord
TWIN VACUUM PIPELINE
MILKING SYSTEM
WITH COW MONITOR
It's a combination of a new, revolutionary pipeline milking machine and the ZERO Completely-Automated Vacuum Bulk Milk Cooler.

The ZERO CONCORD is the only system that provides stable milking vacuum at the teat end — in parlor or stanchion barn — with a low or high, short or long pipeline — and without injecting air into the milker units to move the milk Only with stable vacuum and no air injection can you hope to reduce leucocyte counts up to 65% — increase milk production as much as 20% — and prevent off-flavor and rancid milk

The safe, stable vacuum is made possible by a patented, scientific principle TWIN-VACUUM whereby one vacuum milks the cows, and a different vacuum moves the milk through a separate pipeline into the bulk tank In addition — thanks to ZERO's patented SPATTER-SPRAY Automatic Washer and new, improved, high-capacity, transparent milker unit — you have built-in, "push button", visible self-cleaning and sanitizing of the entire system — without disassembling And there are many other advantages

Zero — PIONEER OF FARM BULK MILK COOLERS

Dr. Earl Cook

Hard Hat History

The requirement that construction workers wear hard hats on the job goes back more than 1.600 years When the Egyptian obelisk was being erected in Rome's Circus Maximus during the reign of Constantine the Great (288-337), the foreman ordered his work crews to wear metal battle helmets for protection against falling masonry

Good milk is sold, poor milk is not

By DIETER KRIEG

QUARRYVILLE, Pa. - "Good milk is sold, poor milk is not sold," that, in a nutshell is the message Dr. Earl Cook had for members of Inter-State Milk Producers Cooperative, when he spoke here at the annual dinner meeting of District 12.

Cook is director of the Quality Control Laboratory, Inc., which was recently acquired by Inter-State. The dairy cooperative and the laboratory are located on adjoining properties in Southampton, Pa.

Cook, who has been involved with the laboratory for approximately 30 years, aimed his talk at the quality control problems in the dairy industry and how they could be combatted. He noted early in his speech that there were sharp increases in the number of violations during deer season.

The Quality Control Laboratory, which is now a wholly owned subsidiary of Inter-State, is not just a laboratory for testing milk. Technicians at the modern facility also concern themselves with the analysis of water, ecology and medical devices. Cook himself is a graduate of the University of Pennsylvania's School of Veterinary Medicine.

The goal for all dairymen should be to produce a product which is absolutely above reproach, said Cook. To achieve that end, Cook advises dairymen to be careful of their own foolishness. He cautioned them against having water or drugs in the milk they ship to market. "The presence of antibiotics in milk is a constant problem," he emphasized.

Some individuals do not understand, Cook explained, that drugs in milk could cause death in some cases since some people are allergic to such foreign substances in milk. He therefore urged dairymen to take extra care in this regard and re-emphasized the penalties which are involved if violations take place.

Cook noted that the Quality Control Laboratory recently spent $155,000 to upgrade its equipment. Aside from tests for water and drugs, the laboratory is also set up for determining leucocyte counts. Although the presence of the latter in milk is normal and not harmful, great amounts of leucocytes are an indication of infection or irritation.

Quality Control aims at eliminating as many factors as possible which might possibly cause milk to be off-flavor or otherwise lacking in quality.

"If you wish good production, I strongly urge you to have a close eye on mastitis - but remember that the lab receives only a composite sample," Cook said.

On rancidity, Cook commented that it is not harmful, but unpalatable. Again, the aim is to produce the best flavored milk possible. During this time of year that includes being extra careful in the ways milk is stored during emergencies, said Cook. Milk cans, for example, should be thoroughly checked and cleaned to insure that they will not have a detrimental effect on milk quality.

With better quality milk to sell, Cook believes sales can remain a bit stronger. He noted that sales trends were on an upward swing again, after having dropped noticeably following last Fall's adverse publicity on radiation as it is related to milk. Cook explained that milk has always been a vanguard for controls, and that it's in the news along with radiation simply because it is used as a handy medium for tests, and not because it absorbs radiation more readily than other foods.

An election of officers was held following Cook's presentation. Elected in the Christiana local were: Calvin Beiler, president; Donald Ranck, vice president; Charles Groff, secretary-treasurer; Ivan Bowman Jr. and J. Ray Ranck, delegates; and James Bowman and Roy Neff, alternate delegates.

In the Quarryville local, the following were given the nod for office: Karl Herr, president; Dale Herr, vice president; and James G. Kreider, treasurer. Voted to be delegates were Dale Herr, Robert Kreider, Richard Maule, and P. Robert Wenger. Alternate delegates were Kenneth DeLong, Robert C. Groff, James Kreider and Scott Mull.

Three 4-H'ers in the area were recognized for their achievements. They were: Doug Hershberger, Linda Akers, and Charles Groff.

A SIGN FROM HEAVEN

The Pharisees also with the Saducees came, and tempting desired him that he would shew them a sign from heaven

He answered and said unto them, When it is evening ye say, It will be fair weather for the sky is red

And in the morning, It will be foul weather today, for the sky is red and lowring O ye hypocrites, ye can discern the face of the sky, but can ye not discern the signs of the times?

St Matthew 16 1-3

READ LANCASTER FARMING FOR FULL MARKET REPORTS

Ephrata dairymen study sire analysis and selection

By DIETER KRIEG

EPHRATA, Pa. - Meeting here for the third consecutive week last Tuesday, Ephrata Area Young and Adult Farmers brushed up on how to become more efficient in their cattle breeding. With sire summary analysis and sire selection as their main topics, the Young Farmers capped an educational program which in previous weeks centered on dairy cattle breeding and physiology and reproductive problems.

Clarence Stauffer, who works full-time for the Holstein-Friesian association of America, and is a dairyman himself, explained how data in official sire summaries can be used to upgrade breeding programs. American Breeders Service representatives Dan Rush and Darvin Yoder provided additional information on mating guides as well as production and type proofs.

Stauffer advocated the use of one good proven bull in a herd, rather than several. He pointed out that the use of one bull will bring out uniformity of type. He also noted, however, that total performance indexes should be evaluated carefully by breeders to determine what kind of a job a bull might do on a particular cow or herd.

The better bulls of the Holstein breed are in A.I. studs, Stauffer commented, citing sire summary data as proof for his statement.

Among the advantages Stauffer mentioned in using better bulls is that their offspring sell so much better in sales, should the owner decide to have a dispersal. the key is using bulls with a high predicted difference, the Holstein association staff member said.

Also a part of the evening's presentation was Ray Zimmerman, representing the Ephrata-based Raytec company which manufactures the Cowculator and Sowculator breeding charts. Zimmerman demonstrated use of the device to interested farmers and commented that the products are now being made available to distant parts of the world such as Australia and South America.

In discussing sire proofs and mating guides, Rush and Yoder suggested that dairymen look at the figures closely. A bull's proof may not be exactly what it appears to be on first glance, Yoder said. Some of the helpful information in sire data which is often overlooked includes: number of daughters, number of herds, number of records per daughter, herdmate performance, and number of states the daughters are dispersed in. All that could very well have a bearing on how a bull performs in an individual's herd, the dairy breeding specialists pointed out.

Throughout their discussions, Stauffer, Yoder and Rush used either visual aids or hand-outs to illustrate their points.

For those interested in attending similar meetings, Rush announced that such events will take place at the Lancaster Farm and Home Center on Feb. 21 and again on March 7. The latter program will focus on heat detection.

The next meeting of the Ephrata Area Young and Adult Farmers is scheduled for next Tuesday evening. The topic will be Credit and Finance. On Feb. 17 the group will hold a session on farm shops and emergency power generators. On Feb. 24 members will gather at the high school to visit a variety of farms in Lancaster County.

U·S· grade standards revised for butter

WASHINGTON, D.C. - Revisions in the U.S. grade standards for butter announced by the U.S. Department of Agriculture will eliminate the lowest butter grade - U.S. Grade C - leaving three butter grades, AA, A, and B.

Improvements in recent years in the quality of butter manufactured prompted USDA's Agricultural Marketing Service (AMS) to revise the butter standards. Another change eliminates the use of alternate grade terms, such as "U.S. 93 Score," in line with the AMS move toward uniform grade terminology.

Additional changes in the grade standards modify requirements for U.S. Grade AA, A, and B butter to more accurately reflect flavors found in butter produced today. Flavor is one of the important quality factors in the U.S. Grade Standards for Butter. Changes also clarify and redefine flavor characteristics found in butter.

The AMS dairy division develops official grade standards for butter and other dairy products. These standards provide measures of quality and are based on attributes important to consumers. The U.S. butter grades are determined by flavor, body, color, and salt characteristics. Under the revised standards, butter failing to meet the requirements of U.S. Grade B will not be given a U.S. Grade. Dairy inspection and grading services are available on a voluntary basis, and are paid for by the user.

Copies of the revised standards are available on request from the Dairy Division, AMS, USDA, Washington, D.C. 20250.

New owner for Clauser firm

Benj. W. Clauser, owner of Benj. W. Clauser Farm Machinery Service at Wescosville, Pa. has announced his retirement effective January 1, 1977. His son, Ernest B. Clauser will assume responsibilities of the firm.

Established in 1937 by Clauser, and in continuous operation since that time, the Lehigh County business features Case parts, farm machinery service and sales and service of lawn and garden equipment.

The name of the firm will be changed to Ernest B. Clauser, Farm Machinery Service.

What's new

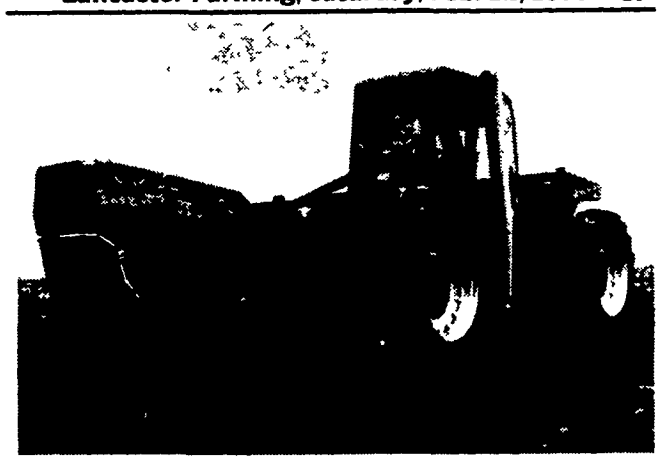
LELY INTRODUCES NEW TRACTOR CONCEPT

Lely Southwest Inc. of Temple, Texas announces the introduction of an entirely new concept of farm tractor - the Lely Multipower 420.

The Lely tractor is equipped with two 210 horsepower engines. The front engine drives the front axle, and the rear engine drives the rear axle. Driving the two axles direct and separately has the advantage that the axles cannot be overloaded since there can never go more than 210 hp through each axle.

In order to more efficiently transmit the 420 engine hp into drawbar horsepower, the Lely tractor is equipped with triple 18.4 x 38 tires on front and rear axles. The unit can also be operated with duals.

Further equipment includes Cat III and Cat IV 3-point hitch, 13-4 inches



diameter 1000 rpm P.T.O. shaft, 45 gpm hydraulic pumps, six external hydraulic connectors; 10-speed manual transmission and two front and rear floodlights. The swing drawbar is also height adjustable, so that drawbar load can be adjusted during operation.

The 3-point hitch is equipped with top link sensing draft control.

The "Lely Whisper Cab" features a quiet environment, large glass areas and basic "cone shape design". Further equipment includes telescoping steering wheel, swivel seat with arm rests, buddy seat, three cubic foot refrigerator, CB radio, AM-FM Stereo, cigar lighter, outside amplifier and dual controls.

The special design of the tractor is providing room for triple tires on front and rear (standard equipment) without causing it to be much wider than conventional tractors with duals. Total width is 13 feet 10 inches.

The turning radius (outside) is 21 feet. Since each axle is driven direct by one engine, there is no drive line through the articulating point.

The Lely Multipower 420 is equipped with two fuel tanks with a total capacity of 500 gallons.

For work with large P.T.O. driven tillers such as the Lely Roterra, etc. the rear engine can be used for P.T.O. drive while the front engine can be used to drive the tractor.

For lighter jobs or over-the-road transport, one engine may be used only, thus using the same unit as a 210 hp tractor.

The Lely Multipower 420 is an original Lely design and is presently being manufactured in the new Lely facilities in Temple, Texas.

Shipping weight of the tractor is 32,800 lbs.

Trophies

[Continued from Page 28]

Nailor and Tammy Hoy. Miss Nailor, 18, won the senior division contest, while Miss Hoy captured the same honor for the junior division.

A girl with five years of showmanship experience behind her, Miss Nailor believes 1976 may have been her last year in 4-H competition. She is employed as a secretary for Shaffer Trucking of New Kingston and now has less time for 4-H activities. She lives on a steer farm at Mechanicsburg R5.

Tammy Hoy, 17, was the only individual to receive a high honor Thursday night who does not live on a farm. She became interested in 4-H as a result of her friends being entered in the program. She selected her project steer herself and spent a minimum of one hour per day with it to prepare it for various shows. How does she like being a 4-H'er? "I love it," the petite young lady beamed.

Trophies and related expenses for the banquet were provided by the following businesses in the Cumberland County area:

Cumberland County Cooperative, (grand champion trophy; Keefers' IGA, Agway, and J&R Ford Tractor Co., trophies; Commonwealth National Bank, carnations; Susan Walmer, Biddle's, centerpieces; and John Hulse, insurance and tickets.

Guest speaker for the evening was H. Louis Moore, from Penn State's ag economics department, who spoke on the "Future of Beef Production in Pennsylvania."

PROTEIN vs AMINO ACIDS

There always seems to be confusion about the value of specific protein levels in poultry rations. A nutritionist used this analogy recently. Protein in feeding a chicken has about the same value as a dollar bill does in "feeding" a parking meter. The dollar bill has to be broken down into individual coins to feed the meter. Further, not every coin is useful and some give us more "time on the meter" than others.

The same is true for protein in a poultry ration. To be beneficial, it must be broken down into individual amino acids. Some of these amino acids are not very useful while others are required for the specific performance we want to achieve.

In feeding the meter, it wouldn't make any difference whether we had a 5, 10, or 20 dollar bill, it's the individual coins that count. In feeding laying hens, it doesn't make any difference whether we have a 15, 17 or 20 per cent protein ration, it's the individual amino acids that makes the performance difference.

BIO LAYENA INTAKE GUIDES

BIO LAYENA [1]	PRE PEAK [2] (18-28 wks) In House Daily Maximum Temperature	POST PEAK [2] (28 wks.+) Feed Intake Lbs/100 Hens/Day
Bio Layena 100	Below 60°F	Over 25.0
Bio Layena 107	60-70°F	23.4 to 25.0
Bio Layena 114	70-80°F	21.7 to 23.3
Bio Layena 121	80-90°F	20.0 to 21.6
Bio Layena 128	Above 90°F	Under 20.0 lbs.

[1] The numbers after the Bio Layena rations indicate the Purina Bio-Rating. Each subsequent ration contains 7 per cent extra amino acid, vitamin and mineral fortification over the previous one. For example, Bio Layena 114 contains 7 per cent more fortification than Bio Layena 107 and 14 per cent more than Bio Layena 100.

[2] Values are guides only since feed use varies due to wastage, strains, etc. Use local judgment as when to change rations.

Ephrata Young Farmers hold banquet

By DIETER KRIEG

MOUNT AIRY, Pa. - At least one member couple of the Ephrata Area Young and Adult Farmers came to the group's eighth annual banquet by snowmobile. Road conditions were anything but good, but in spite of the drifting snow and gusty winds, approximately 150 persons were in attendance. The event was held here last Saturday evening at the Durlach-Mount Airy Fire Hall.

Outgoing president Tom Zartman opened the meeting and served as toastmaster throughout. Of the estimated 150 in attendance, several dozen were guests, leaving the group's total membership of 117 well represented. EAYF advisor Charles Ackley, commented later in the program about members having strived for and meeting challenges in their farming programs and that getting to the banquet that blustery night was a challenge in itself.

Numerous awards were presented during the evening, including trophies for outstanding young farmer in two different categories and FFA American Farmer Degree winners.

Vernon Leininger, Denver, who was selected as a

[Continued on Page 39]

Ephrata Area Young Farmers bestowed recognition of service awards to, left to right, Mr. and Mrs. Elmer Boyd, Debbie Moyer, and Robert Benson.

Broilers still up

HARRISBURG, Pa. - Placements of broiler chicks in the Commonwealth during the week ending January 29, 1977 were 30 per cent above the corresponding week a year earlier.

The placements totaling 1,696,000 were two per cent less than the previous week. Average placements during the past 10 weeks were also 30 per cent higher than a year ago.

In the 21 key poultry producing states, placements were 64,198,000. The placements were one per cent higher than the previous week and six per cent more than the same week in 1976.

Average placements in the 21 key poultry states during the past 10 weeks were five per cent above a year ago.

N·E· turfgrass school set for Wilkes-Barre

WILKES-BARRE, Pa. - The second annual Northeastern Pennsylvania Turfgrass School has been scheduled at the Master Host Inn, Routes 115 and 309, Wilkes-Barre with registration beginning at 8:30 a.m. on February 24.

According to County Agent, David L. Kantner, the program will begin at 9:00 a.m. and conclude at 4:00 p.m. Details regarding preregistration may be obtained at the County Agricultural Extension Office.

The school should be of interest to golf course, cemetary, park, school and college turf superintendents and maintenance personnel, nurserymen, garden supply dealers, and others who deal with lawns and turfgrass establishment and maintenance.

Kantner points out that each registrant will receive a notebook of educational materials at the time of registration. This packet, a certificate of participation and a noon luncheon will be included in the registration fee. This program is sponsored by the Penn State Cooperative Extension Service in cooperation with the Pennsylvania Turfgrass Council, Inc.

Imports up

WASHINGTON, D.C. - U.S. agricultural imports for November totaled a near-record $971.7 million, mainly because of the highest value of coffee imports in two years, according to Foreign Agricultural Trade of the United States released last month by the U.S. Department of Agriculture's Economic Research Service. Total agricultural imports jumped 20 per cent over October's level, with green coffee imports valued at $295 million. Sugar imports sank to $52 million, the lowest level in two years.

Young Farmers

(Continued from Page 38)

Master Farmer earlier this year by Pennsylvania Farmer magazine and the Penn State Extension Service, received the outstanding young farmer distinction for members over 30 years of age. Leininger operates a well known and widely acclaimed poultry and beef farm in northern Lancaster County. Sharing in the honor was his wife.

The distinction of outstanding young farmer - under 30 years of age - went to Earl Stauffer, a young Holstein breeder and dairyman from the Ephrata area. He and his wife accepted the trophy from outgoing treasurer Melvin Holt.

Recognizing the two American Farmer Degree winners was Ackley, who noted that the two young men were the fourth and fifth Cloister FFA graduates to have won the prestigious award. Honored were Robin Ginder and Russel Kline, both from the Denver area.

Mr. and Mrs. Elmer Boyd of Ephrata received this year's award for outstanding community service. They have served the Lincoln community as 4-H leaders for 23 years. EAYF appreciation awards were given to Debbie Moyer of the Ephrata High School office staff and Robert Benson, president of the school board. Vernon Leininger praised both of the recipients for having shown exceptional interest in the EAYF program.

Other awards were presented for specific agricultural achievements, as follows:

Ike Eby was singled out for having recorded the biggest increase in production in DHIA. His production jumped by 1575 pounds in milk and 66 for fat. Tom Zartman placed second in the milk production increase category, 1003 pounds. Dan Fox won the second spot in the butterfat improvement contest with 33 pounds.

Nelson Martin was honored for having had the high herd for both milk and butterfat production - 16,291 pounds of milk and 603 of fat.

Galen Crouse was recognized for having the top cow in last year's DHIA testing year. A record of 27,083 pounds of milk and 1089 of butterfat made the award for him.

New officers were installed during the meeting.

Region II vice president, Earl Stauffer, announced that a leadership training school would be held Feb. 28 at the Brownstown Vo-Tech School.

Dairy awards at the EAYF banquet last Saturday were presented to, left to right, Galen Crouse, Nelson Martin, Tom Zartman, Dan Fox, and Isaac Eby.

Special recognition was given to four EAYF couples for outstanding achievements in farming. They were, left to right: Mr. and Mrs. Earl Stauffer, outstanding young farmer under age 35; Mr. and Mrs. Robin Ginder, American Farmer Degree recipient last Fall; and Mr. and Mrs. Vernon Leininger, outstanding young farmer over age 35. Leininger last month was named a Master Farmer by Pennsylvania Farmer magazine and the Extension Service at Penn State. Absent for the picture taking was Ephrata's other 1976 recipient of the American Farmer Degree, Russel Kline and his wife.

YES you can

You can pay for a Harvestore with the money Harvestore saves you.

Admit it — you don't have anything against the money you could make with a Harvestore it s the thought of paying for a Harvestore that turns you off

Yet there s a good chance you re already paying for a Harvestore Paying for it with field and storage losses Paying for it with the sweat and strain it takes to lug, buck and feed baled hay Paying for it with the poor results you get from feeding lower quality forages And paying for it with the high cost of store bought protein

The truth is you may be paying for a Harvestore you just don t have one Give your Harvestore dealer a call He ll give you names of dairymen near you who decided since they were paying for a Harvestore — they d like having one

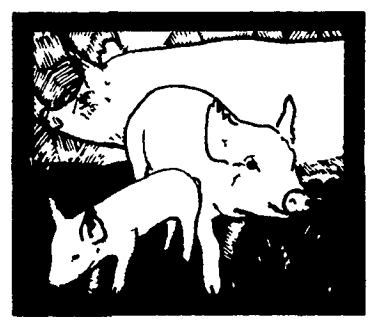
WAYNE®

IRON RICH! BOOST'N IRON

Patent Pending ™



Wayne® Boost 'N Iron is an outstanding source of nutritional iron for swine.

Boost 'N Iron is a chelated iron proteinate created by a patented process. Unlike most other iron products, all of the iron in Wayne Boost 'N Iron is chelated with protein.

Directions for use, when supplemental iron is desired:

Starting Feeds - Mix 5 lbs. Wayne Boost 'N Iron per ton of Wayne Mix ration and self feed as the sole ration.

Growing - Finishing Feeds — Mix 5 lbs. Wayne Boost 'N Iron per ton of Wayne Mix ration and self feed as the sole ration.

Sow Feeds - Mix 5 lbs. of Boost 'N Iron per ton of Wayne Mix ration.

- From 30 days prior to farrowing until 7 days before farrowing feed 6 lbs./head/day
- From 7 days before farrowing to 14 days after farrowing full feed with a minimum 8 lbs./head/day
- From 10 days prior to breeding to 10 days after breeding feed 8 lbs./head/day
- From 10 days after breeding to 30 days prior to farrowing feed 4-5 lbs./head/day

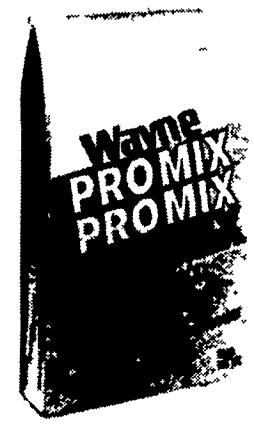
YOU CAN'T FIND AN EASIER WAY

Join the ranks of satisfied hog producers. Ask the Wayne Feeds dealers listed below for Wayne Boost 'N Iron.

The Wayne Feeds dealers listed below also offer you an assortment of fine horse and dog food products.

WAYNE PRO-MIX

Provides complete and balanced nutrition for your dog.



WAYNE FRONT RUNNER HORSE KRUNCH

Front Runner furnishes ample vitamins, minerals and protein. Pure cane molasses provide flavor that horses love.

Mrs. Kitty Shertzer made most of these bargello pillows as gifts. The one she is holding in her hand is in the pomegranate pattern which accompanies this article.

Working on bargello is an excellent form of relaxation for Mrs. Shertzer.

Bargello is a fun craft for beginners, and a challenge for the experienced

By JOANNE SPAHR

MILLERSVILLE, Pa. - Mrs. Kitty Shertzer, Walnut Hill Road, Millersville, is a farm wife. She knows what it means to do barn work, help in the fields, raise four children, and keep a roomy farm house clean. She also knows what it means to need a pleasant diversion now and then from the sometimes monotonous task of getting all her responsibilities done day after day. What is her choice of relaxation and variety in life? Bargello.

Bargello is a type of needlework done on a canvas in which all the stitches are parallel to the threads of the canvas, vertically or horizontally, with the thickness of the yarn covering the threads. As compared to simple needlepoint, each stitch of bargello covers two or more canvas threads, and all stitches in one piece of bargello art work are usually worked over the same numbers of canvas threads throughout. Another recognizable characteristic is that colors are usually worked in five to seven shades of one color, most frequently going from light to dark.

Most of the patterns in bargello are built upon one row of stitches. Once the first row is established, it is a simple task to fill in the rest of the design.

Although it may sound complicated, Mrs. Shertzer says the opposite. According to her, "bargello is enjoyable because it is easy for the beginner, challenging for the experienced, and above all, fun to do."

"Really, once you have established your first row for the pattern, it is simple to fill in the rest of the design," she explains.

How long does it take to do a bargello pillow, purse, chair seat, or rug?

"Well, that's hard to say, "Mrs. Shertzer admits. "It all depends on your project, how fast you work, and how much time you have to do it."

Mrs. Shertzer does her work in her "spare time."

"Oh, I know, you say, 'How does a farm wife get spare time?' Well, I think you always make time for the things you want to do," she asserts.

For Kitty Shertzer, spare time comes in between working part-time in the kitchen of a restaurant in Millersville, the Barn Door, caring for her four children, and redecorating her home. Three years ago, she and her husband, Melvin, began the project of redoing their farm house in colonial Williamsburg style.

"Actually," she says, "it's not so much a definite style as just what we wanted."

At any rate, they used all Williamsburg colors - green and antique white - and came up with an interior resembling a colonial style, decorated with antiques and hand crafted furniture. When they were doing the work, which they did mostly in the Winter before they had a tobacco crop, as they do this year, Melvin stripped the woodwork and chair railings while Mrs. Shertzer painted.

"We're almost done," Mrs. Shertzer noted after naming the rooms they had finished, "all we have left is the bathroom upstairs."

Fortunately for her, her four children, Jay, 18; Stephen, 17; Kay, 14; and Scott, 12, are old enough to take over the chores that used to be her responsibility in the 70 head dairy barn so that she now has more time to fit some extras in - like doing bargello.

Sitting on a plush tapestry loveseat in her redecorated living room, Mrs. Shertzer glanced over at the variety of designs on the seven or eight pillows adorning a matching sofa and laughed.

"You know," she said, gesturing to the one multi-patterned pillow, "I only have that one pillow for myself, the rest I gave as gifts and I just gathered them up from everyone as examples of the different types of bargello that you can do." Continuing her thought, she explained, "I usually give all my pillows as gifts - I don't know why that is - but I give them at Christmas and birthdays.

The answer to why she gives them as gifts is simple - they are lovely and treasured items to share with others.

"But, they're expensive gifts," she cautions. Since she has always had a seamstress make her bargello canvasses into complete pillows, the different gifts have cost her as much as $20 or $25 a piece to make.

"But, if you can make the bargello into pillows yourself, you could make them for $10 - $15," she explained.

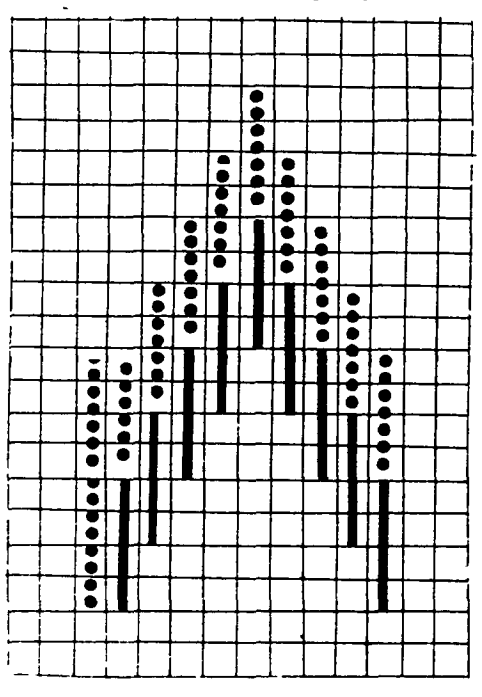
The expensive materials used in this art are single thread canvas, otherwise known as mono-canvas, and Persian wool. The thread has to be of good quality, so Persian wool is suggested because it is the longest-lasting of the wool fibers and is available in a wide variety of colors.

The history of bargello is somewhat vague. Its origins seem to be European, possibly derived from Hungary, Italy, or both, and it is often referred to as Florentine canvas work, or Hungarian point.

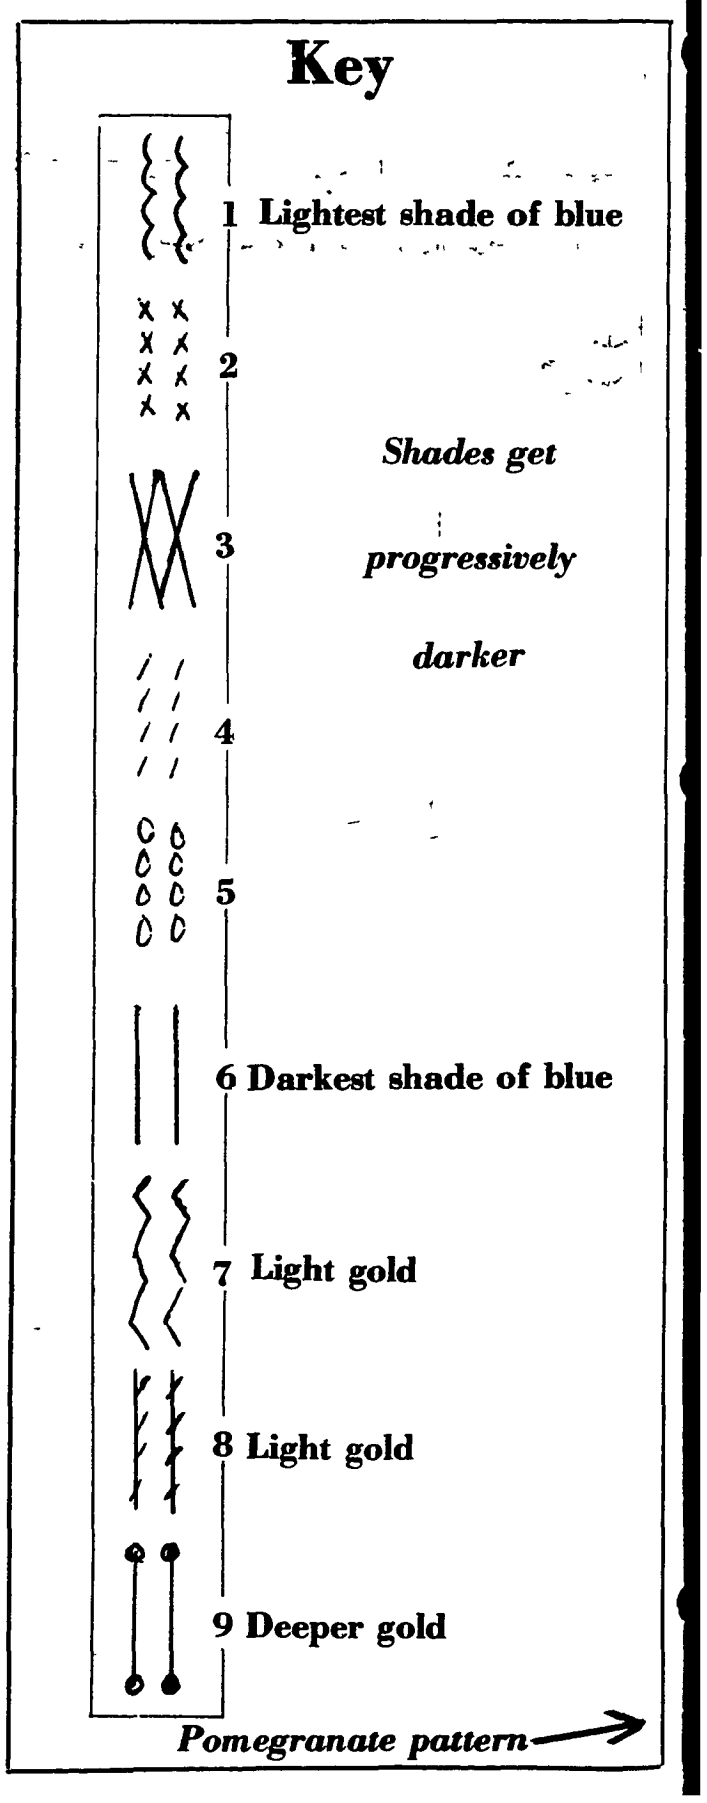
"Call it what you will, - bargello, Florentine canvas work, or Hungarian point - but call it exciting," Mrs. Shertzer notes.

[Continued on Page 44]

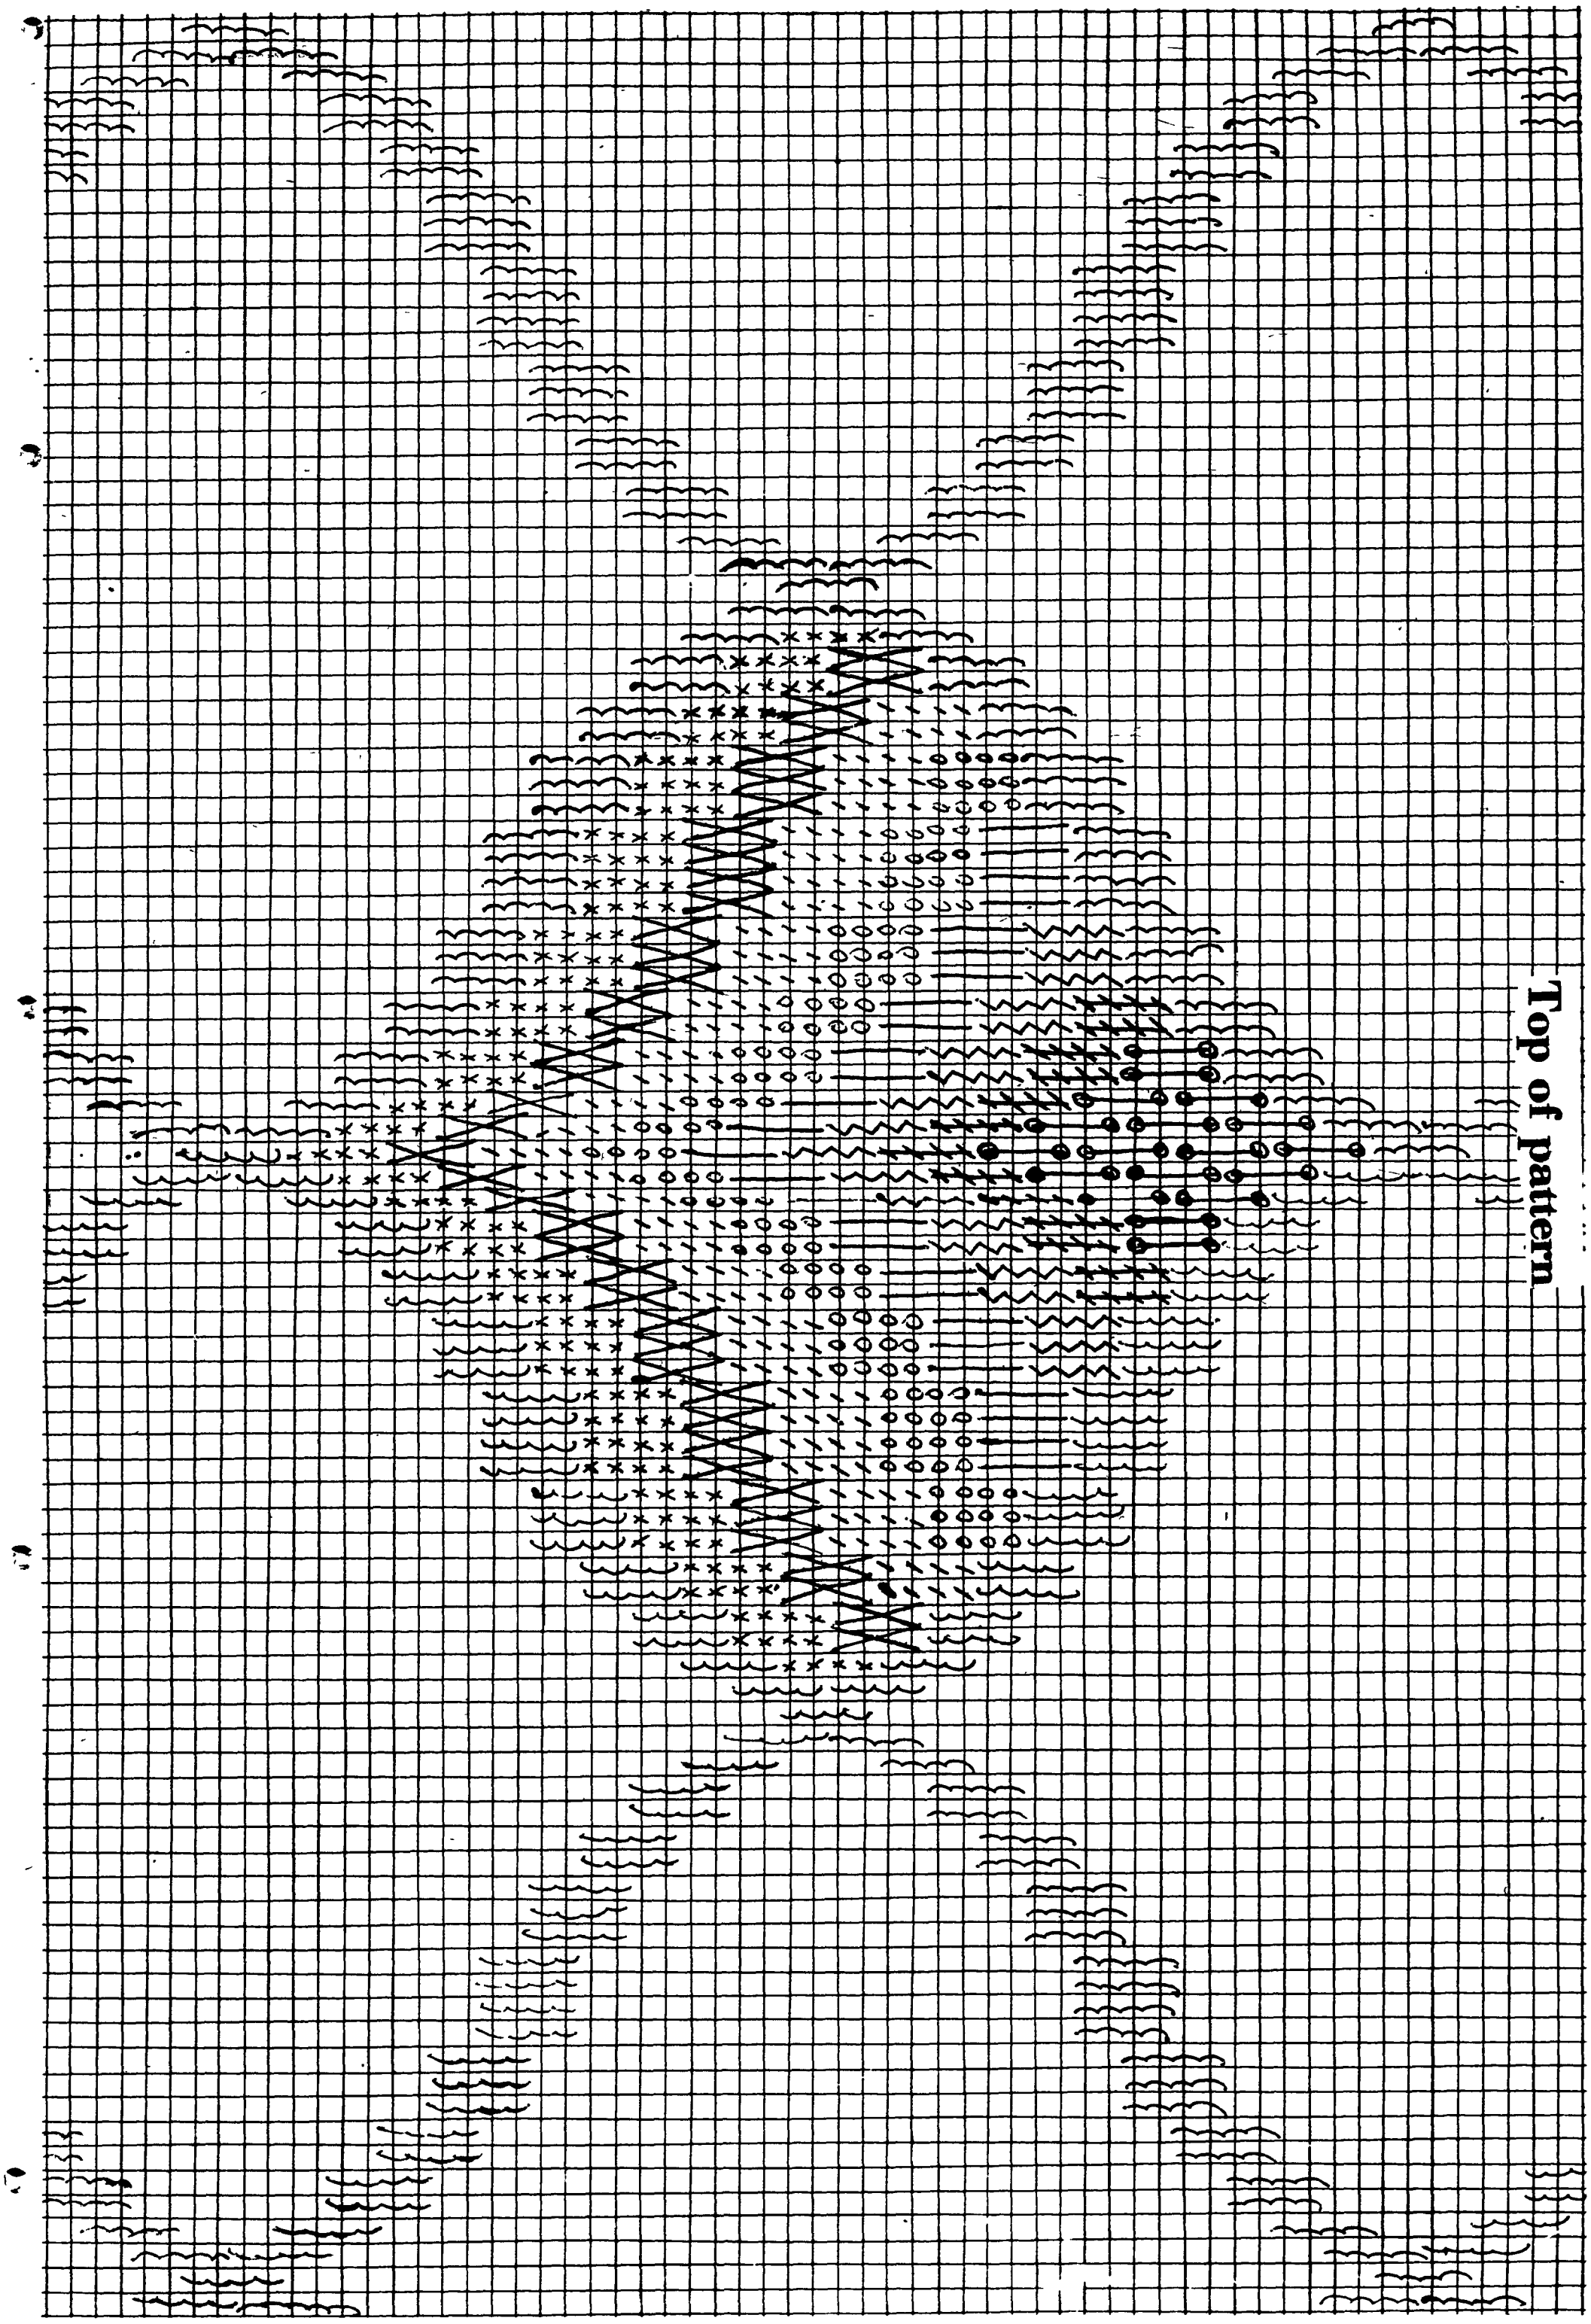
HOMESTEAD NOTES



Close up, this is how the pomegranate pattern is worked out over four threads of canvas.



Top of pattern



Bargello is

[Continued from Page 42]

For those readers desiring to try some bargello, Mrs. Shertzer has prepared directions for one of the oldest known bargello patterns - pomegranate. This pattern is frequently found in Early American collections and has been used for purses, pillows, and chair seats, but would also be excellent for small rugs.

This particular pattern is worked over four canvas threads.

Materials

The first material needed is mono-canvas made of a specific-sized mesh. The "mesh" refers to the numbers of threads per inch, and ranges anywhere from three to 40 threads per inch. Fourteen threads to the inch is referrred to as 14 mesh, and 14 mesh is the size used for bargello.

Persian wool in three-thread strands is also needed.

Another key tool which a craftsman must have to do bargello is a tapestry needle. This type of needle is distinguished by its blunt point and elongated eye. The size ranges from 24 to 16. The larger the number the smaller the needle.

Although the pattern printed with this article is not actually drawn onto the canvas, it should be reproduced in yarn on the mono-canvas. Mrs. Shertzer cautions the beginning craftsman to center the pattern. This centering can be done by either counting the threads to find the middle or by folding the canvas in half vertically and then in half again horizontally. This will clearly define the focal pont from which to start. On the pomegranate pattern, the darkest shade of blue wool is used as the centering point.

This particular pattern is worked in eight different shades of wool. Each row on the pattern printed with this article is marked with a different design. To understand the shading, refer to the key printed beside the pattern.

Two different colors are used with pomegranate - blues and golds. Six shades of blue are needed from very light to very dark, and two shades of gold are also needed.

Working in rows on the pattern, with number one as the main design (this should be the lightest shade of blue), the pattern is built with gradually deepening shades of blue ending on row six, which is the darkest of the blues. Row seven and eight are filled in with the lighter shade of gold, and the center diamond is filled in with the darker golden shade.

This pattern is repeated until the bargello is complete, and all it takes once the first pattern is established is time, patience, and the desire to complete the whole piece.

For those who try this craft and find it an enjoyable passtime, the pomegranate pattern and others can be found in the Elsa S. Williams book entitled, "Bargello, Florentine Canvas Work."

Spice a room with brilliant ripple pillows — bold star (12") and square (17"). Crochet both of rug yarn in variations of popular ripple stitch. Pattern 7167: directions.

Recipe themes announced for Spring

By JOANNE SPAHR
Women's Editor

Beginning in March, "Home on the Range" will have specific, preplanned themes for all contributors to follow when sending in recipes. To insure that all recipes can be thoroughly checked and all corrections made Lancaster Farming will have to receive them in the office 10 days prior to publication.

We will also be running a column entitled "Recipe Swap" for those recipes you would really like to share that do not follow a basic theme, or for those you request.

If you would like a recipe for a special type of cookie or a food that you tasted at a good friend's surprise wedding anniversary party, for example, send in your request to "Recipe Swap," Lancaster Farming, Newspaper, Box 266, Lititz, Pa. 17543.

"Recipe Swap" will also be an outlet for all those new and delicious concoctions you come up with in your experimentation, whether on your own or guided by a recipe from some other source. Either way, we'll be glad to print them.

The theme calendar for spring is as follows:

MARCH

March 5 - "Lancaster Farming's Favorites"

Since the deadline for sending in the recipes for the first week in March would be nearly impossible to meet, Lancaster Farming's staff will supply you with their favorites from their own recipe files at home. These will be everything from pizza recipes to fattening desserts which the men will contribute, since they don't have to watch their weight.

March 12 - "St. Patrick's Day Favorites"

These recipes can be Anything at all that comes to mind when you think of St. Patrick's Day family get-togethers or St. Patrick's Day Farm Women's meetings, or any other type of get-together where you have to take foods with this special day in mind. Perhaps a punch, finger food, main course dish, or dessert recipe can save someone else a lot of hard thinking when they are asked to bring this type of holiday food to a meeting. Deadline for publication is March 2.

March 19 - "Sassy Spring Salads"

With the advent of the Spring Equinox only one day away from March 19th's publication, we need some sassy salad recipes to prepare readers for the revival of gardens, working outdoors, and most of all - shedding those layers of clothing to find some hidden pounds to take off. So, the 19th is a good day to start thinking about eating a lot of salads before the summer comes and catches you unprepared.

For this theme, any kind of salads will be accepted. If you have a good egg salad, garden vegetable salad, macaroni or potato salad, or fruit salad, send it in to Lancaster Farming's Office. This deadline is March 9.

March 26th - "On short notice"

These recipes are dedicated to the farm woman who is the extra hired man, bookkeeper, and housewife all in one, who finds that her hired man and bookkeeping chores often keep her so preoccupied that she's caught having to make a meal for hungry men on shorter notice than she had planned for. Everyone has a recipe they rely on when they look up to find that it's five after twelve and the men will be in to eat in a couple of minutes. This will be the week to share all of those old reliables for every other woman in the same position. Deadline is March 16.

APRIL

April 2 - "Outrageous Recipes for April Fools"

For April Fools Day we will be printing all those terrible sounding recipes that fool you in the end and taste terrific. For instance, Sauerkraut Cake. Now, that sounds like something only a die-hard German with no taste buds would like. But, not so - like mayonnaise chocolate cake, it turns out to be one of the moistest chocolate cakes you will find.

So, if you have any real foolers that you would like to share, send them in to Lancaster Farming by March 23 so they can be published on the first Saturday of April.

April 9 - "Two Easter Favorites - eggs and ham"

Although you don't usually think of eating eggs and ham on Easter, you do think of Easter eggs and a traditional ham dinner. So, to celebrate this special holiday, we will be printing recipes containing eggs and ham. If you have any Easter favorites, send them in by March 30 so they can be processed for publication on April 9.

April 16 - "Taste-Great Leftovers"

Leftovers are usually a sufficient meal, when there's nothing else to serve but they can often times become more appetising if you dress them up and make them taste like a new dish. If you have any make-overs that your family particularly relishes, send it in to Lancaster Farming by April 6.

April 23 - "Italian Week"

Although many of the original settlers in Pennsylvania were of German descent, modern cooking has leaned toward favoring the spicier cooking traditions such as Italian and Mexican. So, as a result, almost everyone has a favorites pizza, ravioli, or lasagne recipe in their file. On April 23, we will be publishing all Italian recipes, so if you have any type of Italian recipe, whether a main dish, salad, dessert, or bread, send it in. Deadline for publication is April 13.

April 30 - "Crock pot cookery"

By now the crock pot craze has slowed down and those who bought this device have settled into comfortably using it. At the time when crock pots first came on the market, many recipe books were published with all sorts of recipes for use in the slow cooker. As was to be expected, some turned out to be good and some turned out to be not so good. So, the week of April 30 will be the week to share all those which you found to work the best in your crock pot. The deadline for publication on the slow cooker recipes is April 20.

MAY

May 7 - "Low Calorie Meat Recipes"

For the first three weeks in May, Lancaster Farming will be concentrating on low calorie foods in preparation for the quickly approaching summer month of June. The first week will be low calorie meat recipes. Deadline for getting them in to Lancaster Farming is April 27.

May 14 - "Easy on the Waistline Desserts"

Even though you may be trying to loose weight, if you are used to eating desserts, it's hard to cut them out completely. So, "Home on the Range," will be featuring a week for low calorie desserts which you know to be good. Many times when you try a weight-loss recipe from a magazine you wish you would have tried to lose the recipe rather then the weight. However, with home tested recipes, the odds are good that the dessert will be tasty. Deadline for these recipes is May 4.

May 21 - "Conscience-easing vegetables"

Vegetables, alone, can make a delicious and satisfying meal when you are trying to lose weight. They key is in knowing how to prepare them with other low cal, complementary ingredients. If you know a

HUD urges flood insurance purchase

WASHINGTON, D.C. - Housing and Urban Development Regional Administrator Russell Byers recently urged homeowners to consider buying federally subsidized flood insurance as soon as possible.

"The ice in the rivers and all the snow on the ground must go somewhere when the weather gets warmer," he said. "We are very concerned about the possibilities of serious flooding this spring."

Byers explained that HUD offers federally subsidized flood insurance that affords homeowners in flood-prone areas the opportunity to protect themselves from severe flood losses. Flood damage is not covered by usual homeowners' policies.

The Flood Insurance program is administered by the Federal Insurance Administration, a part of HUD. The program enables individual property owners to acquire insurance coverage at affordable rates. The rate for residential coverage is only $.25 per $100 of value. Thus, to protect a home valued at $20,000, for example, would cost a homeowner only $50 per year. This low rate is made possible by a federal subsidy

Owners of single family homes can obtain up to $35,000 in flood coverage plus $10,000 on household contents. The policy covers residential, farm, and business structures and contents, but does not cover automobiles.

To be eligible for this insurance protection, a community must apply to HUD; show that flood control procedures are in effect, and be accepted into the program. After a community qualifies for the flood insurance program, policies may be purchased from any licensed property and casualty insurance agent or broker.

Byers urged that people contact their local insurance agent and apply for coverage well before the Spring thaw "Coverage is effective 15 days after the date appearing on the completed application, provided that a check has been forwarded to the National Flood Insurance Association," he said.

Further information can be obtained from an insurance agent, from HUD in Philadelphia (215) 597-9581. A toll free number is 800-424-8872.

Grange week is approaching

WASHINGTON, D.C. - Over 5,500 local chapters of the nation's oldest farm organization, the National Grange, will celebrate Grange Week, April 24-30.

Organized in 1867, the Grange has been a steadfast spokesman for family farmers. During its 110 year history its base has broadened to include both rural and suburban interests. It is the country's only fraternal farm group and was the first organization of any kind to admit women on an equal basis with men.

In reviewing Grange history, National Master John W. Scott, said the Grange is best known as a family organization. He said the Grange has consistently supported the family farm concept which has achieved unparalleled efficiency in the production of agricultural products.

Among the Grange's first major accomplishments was obtaining cabinet level status for the Secretary of Agriculture and the subsequent establishment of the U.S. Department of Agriculture. Also initiated by the Grange were federal anti-trust laws, rural free mail delivery, agriculture extension service, Farmers Home Administration and it was one of the original supporters of the Interstate Highway System. It is the only general farm organization with headquarters in Washington, D.C.

Currently the Grange is seeking further legislation to fully utilize the efficient productivity of family farmers and at the same time assure consumers reasonable and stable prices and farmers a reasonable and stable income. The Grange will also be active in other legislative and regulatory areas such as land use planning, tax reform, food stamp program, communications, conservation and transportation.

Local Grange activities scheduled during Grange Week will include radio and television shows, open houses, displays and special community programs to emphasize their current activities and future plans.

What's new

POST PULLER

A new mechanical post puller designed to be operated from a standard 3-point tractor hitch, has been announced by Rink Manufacturing Company, Pender, Neb.

The Rink mechanical post puller is claimed to be the ideal for category 1 and 2 tractors...with a capability of pulling both wood and steel, square or round posts, ranging in diameter from 1 inch to 10 inches. Length of pull is limited only by height of lift of tractor.

Goat club expands

The Del Mar Penn Dairy Goat Club has launched into its 1976-77 year with new officers and expanded membership. The organization continues to be dedicated to its original aim which is to be instructive. Monthly gatherings begin with covered dish supper for families followed by brief business meetings and then instruction on the scheduled topic. Members come from four states including those people with no goats or small herds to large herds. The dairy goat of today is becoming increasingly popular in the United States while we continue to discover its assets. As our populations expand and there is more competition for land, dairy goat numbers increase as they have in most other countries of the world. The animals are ideal for the small rural dweller and produce besides superb milk, cheese, butter, meat, mohair and leather, says Mrs. John A. Smith, a club member from Townsend, Del.

Anyone interested in joining should contact one of the following: Joyce Bohmier, New London, Pa. 19360, (302) 368-7542 and (215) 869-2449 or Mary Smith at (302) 653-7132 or Joyce Kamka at (301) 557-7191

Ida's Notebook

Ida Risser

The winter of 1977 will be one that is remembered by many people for many reasons. My father often told of the time in 1948 when he had to break the ice on the Conestoga River everyday for six weeks so that his steers could drink water. This winter Philip also breaks the ice daily for our 10 big heifers. And, we've been watering the calves with a hose for weeks as the water pipe has frozen.

It seems as though everyday the animals get bolder and venture farther out on the ice. First our neighbor's animals came across the ice to our meadow and they tried to chase them back. However, one heifer was stubborn and would not go down the steep bank. Finally the Amish boys gave up and went home, leaving one animal in our meadow. They had barely reached the other side when the obstinate creature dashed across after them.

Not too long afterward, our heifers visited another farm up the river by simply walking across the very thick ice. When we brought them home, we put up a temporary fence.

On weekends many people walk on the Conestoga and many more skate on it. There was a group of 40 Amish boys skating near our home the other Sunday afternoon. At night, they use gas lanterns and we can watch their silhouettes as they glide back and forth on the glassy surface.

This morning, on my way home from the school bus stop, I stopped to gather pussy willow and forsythia branches to force them into blooming indoors. It was worth the effort of wading through a four foot drift to get them, as now I can anticipate beautiful yellow blossoms in a few weeks.

Deadline approaching for sewing courses

WEST CHESTER, Pa. - The Chester County Cooperative Extension Service will hold a course on men's knit jackets on Wednesday, February 23, March 2, 16, 23, 30 from 9:30-11:30 a.m. Learn to sew a man's or boy'ssportcoat. The course will include simplified methods for tailoring techniques. A person with average sewing skills can master these techniques. Deadline for registration is February 15.

A course in sewing children's clothing will also be held on Tuesdays, March 8, 15, 22, 29 from 10 a.m. - 12 p.m. Techniques to be included are the use of multi-size patterns, sewing on knit, and woven fabrics, use of appliques and other special trims that are decorative and functional. A person with limited or average sewing skills can also master these techniques. Deadline for registration is February 28.

The courses will be held at the Extension office, 235 W. Market St., West Chester. A small registration fee is required. Enrollment is limited and accommodated on a first come - first served basis. For further information call the Extension Office at 696-3500.

My Thoughts

By JOANNE SPAHR

Only one thing is on my mind right now - knees.

Knees are something you never know you have until you fall on them. Ask me, I know. I've got two black and blue shiners on both my kneecaps that shout out, "You Klutz!" every time I move.

Klutz - maybe. But, it's really not my fault - the stretch of lane between the barn and house is out to get me Really.

It all began when I was 10 years old. One day I was meandering around in the barn, playing with the kittens and jumping rope with baler twine, when suddenly, there she stood - the hollow-eyed, fire-breathing heifer. We looked at each other for a second and I knew I was in for it - she was going to eat me.

My instincts took control of me then, and like a flash, I was heading toward the house. Unfortunately, my instinct was stronger than my coordination and I ended up on the gravel, ripping the skin off my knee as I bounced and slid over the loose stones.

That wound never did heal properly. I still yelp when I go into the doctor and have my reflexes checked.

Five years after my unforgetable tangle with the heifer, I was speeding in toward the house on the same patch of land after parking my dad's hot '63 Starfire under the forebay.

Of course, I was nearly flying along as I ran, feeling the exuberance of it all - when, wham, I was face down on the ground with my foot stuck in a rotted out tree stump. This time it was a swollen ankle and a fractured bone or two

And, of course, to top off the perils of the persimmon flats as I call it because of a persimmon tree that grows along the wayside, last week I took another charming and ever so graceful spill in the exact same spot. Only this time, it was ice that got me Nobody told me there was an excess of water in this spot, of course, so when I went running in toward the house through the stretch in the dark to get out of the sub-zero weather, I suddenly found myself in my usual position when it comes to the persimmon flats - on my hands and knees, sliding and bumping along for dear life. That might be a humorous and even fun activity when you have a sled or an old washing machine cover under you, but when it's just plain knees and no long johns under the pants to soften things up a bit, it's bad news.

Of course, that may be all the sledding I'll get in this year, as far as that goes. But I don't think I'll make this kind of sledding a habit

Vegetable workshop offered

YORK, Pa. - Now is your chance to attend a vegetable gardening workshop; and get a jump on the gardening season ahead.

The York County Extension Service is offering a workshop on vegetable gardening, instructed by Timothy Markovits, asst. county agricultural agent. Topics to be covered include choosing vegetable varieties, soil testing, and preparation and planning of the garden.

The workshop is offered at four different times and sites over the county. They are: Wednesday, February 23, at 1:00 p.m. at the Dillsburg CPC Building; Monday, February 28, at 7:30 p.m at the Shrewsbury Borough Building; Monday, March 7, at both 1.00 p m and 7:00 p.m. at the York Mall Community Room; and Tuesday, March 8 at 7.30 p.m at the Hanover Grange.

Junior Cooking Edition

This week we have a wide selection of recipes to choose from. For those of you who need a good recipe for a busy day when you don't have a lot of time to cook, there's "Wash Day Dinner," and for those who like a good potato soup, we have a hearty potato chowder recipe to try.

Carmel corn is a favorite snack for many people, and this week a reader sent a terrific recipe into Lancaster Farming for all pop corn lovers to test.

And, of course, a week never goes by that some delicious dessert recipes don't make their ways into the office.

So, whether you are looking for a meal, a dessert, or a snack to make you have your choice this week.

ITALIAN CREME CAKE

1 stick margarine
½ cup shortening
2 cups sugar
5 egg yolks
1 teaspoon vanilla
2 cups flour
1 teaspoon soda
Dash of salt
1 cup buttermilk
1 cup coconut
1 cup nuts (chopped)
5 egg whites, beaten stiffly

Mix together margarine, shortening, sugar, egg yolks, and vanilla. Add flour, soda, and salt mixture alternately with buttermilk. Stir in coconut and chopped nuts. Fold in last five egg whites, beaten stiffly.

Pour into 2 (10 inch) or 3 (9 inch) pans. Bake at 350 degrees F. for 30 minutes. Frosting:

1 (8-ounce) package cream cheese
½ stick margarine
1 teaspoon vanilla
2-½ cups confectioner's sugar

Beat above together until smooth. Frost cake when cool.

Naomi M. Stoltzfus
Madisonburg, Pa.
Age 13

xxx

CARAMEL POPCORN

7 quarts popped corn
1 cup margarine
2 cups brown sugar
½ cup white corn syrup
1 teaspoon vanilla
½ teaspoon soda
Pinch of salt

Combine sugar, butter, corn syrup and salt in a pan. Bring to a boil for five minutes.

Remove from heat. Stir in vanilla and soda. Pour over popped corn. Mix and bake at 250 degrees F. for 30 to 45 minutes. Pour into flat pan stirring occasionally. Cool.

Fannie M. Stoltzfus
Madisonburg, Pa.
Age 15

xxx

WASH DAY DINNER

½ stick of butter
Onions
Potatoes
2 tablespoons flour
1 teaspoon salt
1 quart tomato juice
Sausage

Melt ½ stick of butter in a large flat pan. Put a generous layer of onions in pan. Put a very generous layer of thin sliced potatoes on top. Sprinkle two tablespoons of flour and one teaspoon of salt on top. Pour one quart of tomato juice over mixture. Cover with a thick layer of raw, thin sliced sausage. Bake at 375 degrees F. for 2-½ to three hours.

Anna Fox
Ephrata, Pa.
Age 13

xxx

POTATO CHOWDER

1-½ cups sliced onion
½ cup diced celery
¾ cup sliced carrots
1 clove garlic, crushed
3 tablespoons butter or margarine
4 cups diced potatoes
2 cups water
2 chicken bouillion cubes
1-½ teaspoons salt
¼ teaspoon pepper
¼ teaspoon tarragon
¼ cup chopped parsley
2 cups milk
½ cup grated cheddar cheese

Saute' onion, celery, carrots, and garlic in butter until onion is transparent, about 10 minutes. Add potatoes, water, and bouillon cubes. Stir until cubes dissolve; add seasonings; cover and simmer until potatoes are tender (12 to 15 minutes). Add milk and heat without boiling. Serve, sprinkled with grated cheese. Makes eight servings.

Marian Martin
Ephrata, Pa.
Age 8

xxx

FAMOUS OATMEAL COOKIES

¾ cup shortening (softened)
1 cup firmly packed brown sugar
½ cup granulated sugar
1 egg
¼ cup water
1 teaspoon vanilla
1 cup sifted all purpose flour
1 teaspoon soda
3 cups oatmeal, uncooked

Mix above together. Makes five dozen. Heat oven to 350 degrees F. Bake 12 to 15 minutes.

Mary Ann Hoover
Ephrata, Pa.

xxx

PINEAPPLE FLUFF

1 pound marshmallows
½ cup pineapple juice
1 pint whipped cream
1 cup crushed pineapple
20 graham crackers
¼ cup margarine

Melt marshmallows and ½ cup pineapple juice in a double boiler. Cool until it starts to thicken. Add one pint whipped cream and one cup crushed pineapple.

Finely roll 20 graham crackers. Add ¼ cup margarine and mix. In a glass dish make layers of graham cracker crumbs and pineapple pudding ending with pudding.

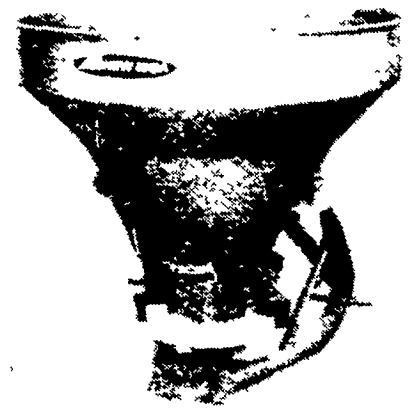
LOOKS EVEN BETTER AFTER YOU USE IT.

This is the business end of a factory-fresh Avco New Idea 10-Ton Manure Spreader. One glance tells you it's a rugged, high-quality machine.

But until you own one, and spread a couple thousand tons of manure with it, you won't really know how good one of our spreaders can look. Because after you work it good and hard, you'll see how tough it *really* is, and how long it's going to last.

That's when you'll appreciate the rugged durability of tandem axles, A-frame hitch, steel flareboards and extra-heavy-duty gearbox. And, with exclusive Penta-treated wood box and five unloading speeds, our spreader's bound to look better when you look for real value.

Especially after you've spread a few years' worth of manure with it.



Avco New Idea's a leader in spreaders for other materials, like fertilizer and seed. And they're just as tough as our big manure spreaders, for the same kind of long-life service.

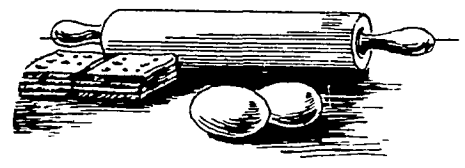
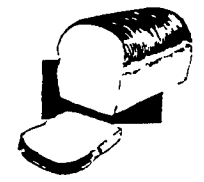
Home on The Range





This week we have a pot pourri of desserts. You've got your choice of cookies, cobblers, or gelatin desserts. Hope you enjoy trying some of them.

Last week we published several requests from readers, and this week another request has made its way to the Lancaster Farming office. This time, the contributor would like a recipe for macaroni salad without a cooked dressing. She's sure that someone out there can give her the recipe.

Send all recipes to "Home on the Range", Lancaster Farming Newspaper, Box 266, Lititz, Pa. 17543. And, don't forget your name, address, and phone number.

BROWN SUGAR COOKIES & ICING

2 cups brown sugar
1 cup melted margarine
2 eggs
½ cup buttermilk
1 teaspoon vanilla
½ teaspoon salt
1 teaspoon baking soda
1 teaspoon baking powder
3 cups flour

Combine and drop from teaspoon on greased cookie sheet. Bake at 350 degrees F. for 10-12 minutes.

Icing:
½ cup margarine
1 cup brown sugar (packed)
½ cup milk
1 teaspoon vanilla
2 cups 10X sugar

Melt ½ cup margarine; add brown sugar. Boil for two minutes; then add milk. Bring to a boil. Add 1 teaspoon vanilla. Cool. Add 10X sugar. Mix well and ice cookies.

Anna Joyce Martin
East Earl, Pa.

xxx

KRIS KRINGLE COOKIES

1 cup shortening
Two-thirds cup sugar
1 egg
1 teaspoon vanilla
3 cups flour
1 teaspoon baking powder
½ teaspoon salt

Combine and form in rolls. Wrap in wax paper and chill, slice thin. Bake at 350 degrees F. 10 minutes or until done.

Mrs. Luther Jones
Hemlock Creek, Pa.

xxx

BRAZIL NUT ICEBOX COOKIES

2 cups bread flour or
2-¼ cups sifted pastry flour
2 teaspoons baking powder
¼ teaspoon salt
½ cup butter
1-¼ cups dark brown sugar
1 egg
1 cup chopped brazil nuts
1-½ teaspoons vanilla

Combine and shape in rolls, wrap in wax paper, chill, slice thin. Bake at 350 degrees F. 10 minutes or until done.

Mrs. Luther Jones,
Hemlock Creek, Pa.

xxx

STRAWBERRY LONG CAKE

½ cup sugar
4 cups sliced frozen strawberries
2 cups of flour
4 teaspoons baking pwoder
6 tablespoons sugar
¾ teaspoon salt
One-third cup shortening
1 large beaten egg
Two-thirds cup milk
¼ cup soft butter
¼ cup sugar
3 tablespoons flour

Sprinkle sugar over sliced strawberries. Let stand at room temperature. Sift together 2 cups flour, baking powder, 6 tablespoons sugar, and salt. Cut with pastry blender or two knives. Combine shortening, beaten egg, and milk. Stir into flour mixture and blend well. Spread dough into well-greased 7 x 12 inch pan which is 1-½ inches deep. Spread the sweetened strawberries and juice over the top of the dough. Next, cream together the soft butter, ¼ cup sugar, and 3 tablespoons flour. Drop occasionally over strawberries. Bake at 400 degrees F. for 35-40 minutes. Serve warm with cream. Makes eight to 10 servings.

Mary Ellen Weaver
Ephrata, Pa.

xxx

CHOCOLATE CHIFFON CAKE

1-¾ cups flour
1-¾ cups sugar
3 teaspoons baking powder
1 teaspoon salt
½ cup cooking oil
7 egg yolks
¾ cup boiling water
½ cup cocoa
2 teaspoons vanilla
7 or 8 egg whites
½ teaspoon cream of tartar

In small bowl, combine boiling water and cocoa. Let cool. Sift together flour, sugar, baking powder, salt, and make a well. Add, in order, cooking oil, egg yolks, cooled cocoa mixture, and vanilla. Beat this with a spoon until smooth. Add egg white, and ½ teaspoon cream of tartar, which have been beaten very stiff. Bake at 325 degrees F. for 55 minutes and 350 degrees F. for 10 minutes.

Anna Joyce Martin
East Earl, Pa.

xxx

MOCHA CHIFFON CAKE

1 cup egg whites (7 or 8)
2 teaspoons instant coffee
½ cup sifted unsweetened cocoa
¾ cup boiling water
1-¾ cup sifted cake flour
1-¾ cups sugar
1-½ teaspoons baking soda
1 teaspoon salt
½ cup salad oil
7 egg yolks
2 teaspoons vanilla extract
½ teaspoon cream of tartar

In large electric mixing bowl, let egg whites warm to room temperature - about one hour. Meanwhile, preheat oven to 325 F. Combine coffee and cocoa in small bowl. Add boiling water, stirring until smooth. Let cool. Sift flour with sugar, soda, and salt in large bowl. Make well in center. Pour in salad oil, egg yolks, vanilla, and cooled coffee mixture. With spoon or portable electric mixer, beat just until smooth. Sprinkle cream of tartar over egg whites; with mixer at high speed, beat until very stiff peaks form when beater is slowly raised. Do not underbeat. Pour batter over egg whites; with rubber scraper or wire whisk, using an under-and-over motion, gently fold into egg whites just until blended. Turn into ungreased 10-inch tube pan; bake 60 minutes or until cake tester inserted in center comes out clean. Invert pan over neck of bottle; let cake cool completely - about 1-½ hours. With spatula, carefully loosen cake from pan; remove. Serve plain, or frost as desired.

GELATIN PEACH DESSERT

2 packages peach flavored gelatin

[Continued on Page 51]

Recipes needed

The American Agri-Women, a coalition of farm women from across the United States who are working for understanding between the farmer and consumer, are compiling a cookbook. To fill this book, they are seeking good, home-tested recipes from farmers' wives across the country. Anyone wishing to contribute, should print or write a recipe with the complete preparing directions on a 5 x 7 inch paper. The group is asking that the contributor s name, address, and any interesting notes about the recipes be enclosed with the recipe and sent to Mrs. Harold Gross, Manchester R2, Pa. 17345. The deadline is April 1. The book will make its debut at the annual convention to be held on November 9, 10 and 11 in Green Bay, Wis.

York Co. Farm Women make plans for '77

A Spring Rally, a county picnic, and a church night are just three of the many events planned for 1977 by the York County Society of Farm Women under the leadership of Mrs. Charles Bupp. These plans were made at a recent countywide board meeting.

The Spring Rally will be held in Memorial Hall, York Fair Grounds, May 11. The program and dinner will be arranged by the executive committee. All tickets are to be ordered from Mrs. Hazel Snodgrass, Delta R1.

The Society of Farm Women will again man the Snack Shacks for the Hospital Fete on Friday evening, May 19 and Saturday May 20. Each group is requested to send at least three names of workers to the county president. Sixty-six workers are needed.

On July 27 the county picnic is scheduled for the 4-H Center at Bair and on April 17, the Society will sponsor Church Night at the Hametown Lutheran Church.

Ethel Gross also reported to the group of approximately 50 women present, that the organization is considering reordering the cookbook the Society compiled, since the demand is high and there are no books available at the present time.

Mrs. Charles Bupp also reported that any boy or girl majoring in home economics and whose mother is a member of Farm Women is eligible for a scholarship from the county organization before May 1. Applications should be sent to Mrs. Charles Bupp, Glen Rock R2.

Lions Club honors farmers

STEWARTSTOWN, Pa. - The Stewartstown Lions Club observed its annual farmer's night at a dinner meeting with Stewartstown area farmers as guests.

Daniel Wolf served as program chairman for the meeting and introduced County Agent John Smith and his assistant Tim Markovitz. Markovitz presented a film entitled "The Unfinished Miracles" concerning the work done by the agricultural experiment stations at the state universities.

xxx

BANANA DESSERT

3 bananas
1 box graham crackers
3 cups milk
2 tablespoons butter
3 eggs
¾ cup sugar
3 tablespoons flour
1 teaspoon vanilla

Heat milk to scalding. Cream eggs, sugar, flour, and ¼ cups milk. Add this mixture to hot milk until it thickens. Take from heat and add flavoring and butter, then cool. Next, line a 1-½ quart casserole or dish with graham crackers. Alternately layer with bananas, then sauce, then graham crackers. Top with whipped cream, if so desired.

xxx

FRUIT COBBLER

3 cups fruit
1 cup sugar
2 tablespoons flour
Two-third cup water
4 tablespoons butter
DOUGH:
2 cups flour
3 teaspoons baking powder
One-third teaspoon salt
5 tablespoon shortening
Two-third cup milk
6 tablespoons sugar

Blend fruit and sugar and flour. Pour into 9 x 13 cake pan. Dot with butter and add water. Cover with dough. Dough: Combine flour, baking powder, and salt. Cut in shortening with knife and add milk slowly. When soft dough forms, pat out and cover fruit. Sprinkle sugar over dough. Bake at 400 degrees F. for ½ hour or until dough is baked.

CHESTER COUNTY HIGH DHIA HERD FEEDS BROWN'S . . .

CONGRATULATIONS . . .

JEFFERSON D. YODER, Elverson RD1, for winning the 1976 Chester Co. DHIA High Herd Butterfat and Milk Production Award.

18,304 LBS. MILK
728 LBS. FAT
54 COWS

HERD RECORD:

Mr. Yoder's 1976 herd average of 18,304 lbs. milk and 728 lbs. fat has set a new ROCKY-SIDE herd high for both Milk and Butterfat production. This is the fourth straight year Mr. Yoder has won the High Herd Butterfat Award for Chester County with records as follows:

	Milk	Fat	Cows
1973 —	17,353	696	51
1974 —	17,386	688	53
1975 —	18,286	719	54
1976 —	18,304	728	54

FEEDING PROGRAM:

Mr. Yoder feeds his milking cows 35 pounds of corn silage, all the hay (mixed legume-grass) they can eat and BROWN'S 16 ROYAL on a 3 to 1 basis. Dry cows are fed mixed hay free choice plus 2 pounds of BROWN'S 38 MILKMASTER. No Corn Silage is fed to Dry Cows.

★★★★★★★★★★★★★★★★★★★★

WE ARE PROUD of our customers' fine cows, skilled management and achievements. Records such as Mr. Yoder's are a source of pride to us. We are pleased with the part that BROWN'S FEEDS and SERVICES had in helping to attain these records. We shall continue to strive in 1977 to give farmers the best quality feed and nutritional service possible.

Hempfield seamstresses take honors in sewing

By JOANNE SPAHR

EAST PETERSBURG, Pa. - In a different type of garment judging from the Farm Show competition in which they did so well, the home economic students from Hempfield High School were rated on their sewing abilities last Tuesday evening at the Creative Women's Night of the East Petersburg Women's Club. This special evening sponsored by the club is held in every one of the 21 women's organizations around the county. Those girls winning in the competitions of the individual clubs will go onto county competition, followed by districts, and finally, states. For Hempfield and many other home economics departments, these competitions are an anxiously awaited for event in which the girls learn how their projects rank among the work of their peers, and how well their garments suit their figures in the eyes of the judges.

As compared to Farm Show competition in which the garments are judged solely on workmanship, Tuesday's competition was also based on a fashion show in which the girls modeled their garments to demonstrate fit, and the girls' ease of carriage.

Twenty Hempfield girls entered this year's competition out of which the top six were given prizes.

The first place award winner in "general sewing" was Diane Harnly, the daughter of Mr. and Mrs. Raymond Harnly, Manheim R1. Diane modeled a three-piece gray outfit with a fitted, lined gray vest in a wool blend gaberdine with front princess seams. Under the vest, she wore a soft gray, silk-like, tailored shirt with a buttoned band closing and a tucked painted collar on a band. And, completing the ensemble, was a plaid, bias cut, slightly flared skirt.

Taking second in the general sewing category was Shari Andrews, the daughter of Mr. and Mrs. Dale Andrews, 6300 Jackson Drive, East Petersburg.

Shari wore a corduroy-look denim jacket and pant outfit. The pants were straight leg and were completed with a matching shirt jacket - totally man-tailored and finished with topstitching cuffed sleeves, and flat-fell seams.

Kay Harshman, the daughter of Mr. and Mrs. Jed Harshman, 2685 State St., East Petersburg, took the third place in navy gabardine pants and a navy floral designed shirt.

A second class of competition at the women's club judging was "student tailoring." The first place winner in this category was Jeanne Sawicki, the daughter of Mr. and Mrs. Albert W. Sawicki, 72 Country Court, Landisville. She modeled her own version of an Anne Klein traditional suit. The semi-fitted blazer was made of a bold brown plaid as was the bias cut knee length skirt.

Second place in the student tailoring division went to Kim Albright, the daughter of Mr. and Mrs. Ronald Albright, 663 Gentry Drive, Lancaster. Kim modeled a green heather wool coat in a Christian Dior design which featured gathers in the back with a self-tie belt at the waistline. Kim completed her outfit with a coordinated four-gore shirt and cream colored shell.

June Grube, the daughter of Mr. and Mrs. Weidler Grube, Manheim R7, took third place in this division. June wore a wool plaid suit with a fully lined jacket and raglan sleeves. Completing the outfit was a matching skirt with a front-inverted pleat, and a burnt orange bow blouse.

The above girls are winners in the East Petersburg Women's Club sewing contest. They are from left to right: Kim Albright, Jeanne Sawicki, Kay Harshman, Diane Harnly, June Grube, and Shari Andrews. Each is enrolled in home economics classes at Hempfield High School.

Farm Women Societies

Lancaster Co. Society 1

The Lancaster County Society of Farm Women 1 met on Saturday, February 5, at the home of Mrs. Betty Sheaffer, S. Broad St., Lititz, with Mrs. Ann Shreiner as co-hostess.

Rachel Bollinger, president, was in charge of the business meeting. The Society voted to give $10 to the United Cerebral Palsy fund. Reports on the state convention were given.

Society 1 will sponsor a bus trip to the Philadelphia Flower Show on March 15. The bus will leave the Cloister Shopping Center, Ephrata, at 7 a.m. Anyone interested, call Mrs. Amy Brubaker at 733-7425.

The next meeting will be held on March 5 at the Good Will Industries.

Lancaster Co. Society 6

The Lancaster County Society of Farm Women Society 6 met at the home of Mrs. Katie Brandt in Elizabethtown on Saturday, February 5 at 2 p.m. with Mrs. Murial Saylor presiding. Fifteen members answered the roll call by giving a Valentine verse.

Two pupils from E-town Middle School, Ann Mumfert and Lisa Hollinger, rendered several musical selections on the flute.

Society 18 will entertain Society 6 at the Farm and Home Center on February 19 at 1:30 p.m. Four of the members of Society 6 have volunteered to prepare envelopes for mailing Easter Seals on February 15.

The next meeting will be held on March 5 at the home of Mrs. Emery Wolgemuth, Elizabethtown R3.

Lancaster Co. Society 10

Farm Women Society 10 met at the home of Mrs. Raymond Dixon of the Village of Old Hickory.

The president, Mrs. Jay Habecker, conducted the business session when reports of the state convention at Harrisburg were given.

Speaker at the meeting was Mildred Zink of Donegal Mills Plantation. She gave an interesting account of the origin of the Plantation dating back to the 18th century It consists of a mansion house, mill,millers house, bake house, and farm buildings.

Samples of some of the herbs grown in the garden were displayed and described, and references in the Bible to them were presented.

The March meeting will be held in the Neffsville Fire Hall

Lancaster Co. Society 12

Lancaster County Farm Women Society 12 met at the home of Mrs James Fry, for their January meeting Dessert was served by the hostess followed by a business meeting with Mrs. Willis Glick, presiding. The state convention program was presented. Plans were made for a bus trip to the Philadelphia Flower Show for Monday, March 14. Anyone desiring to make a reservation for the trip should call Ethel Kindig at 872-8139.

A period of sharing handwork helping ideas followed.

The February meeting will be held at the home of Mrs. John C. Kindig on February 16. This meeting will be a sewing day for making cancer dressings and bed pads.

Lancaster Co. Society 22

Raelene Harbold, International 4-H Youth Exchange program delegate, brought her experience to life for members of Farm Women Society 22 as she told of her four month visit to the Islands of Jamaica, Trinidad and Tobago in the West Indies during their regular meeting Tuesday.

Through slides and with native articles she helped members understand the people of the country and their agriculture.

The meeting was held at the home of Mrs. Donald Herr, 2125 South View Road, Lancaster, with Mrs. Jacob Houser, Jr. acting as co-hostess.

During the business meeting the group discussed plans for an April 28 visit to the Harrisburg State Hospital. They will charter a bus to travel there to entertain patients.

President Mrs. Lester Landis announced that any son or daughter of a member of a Farm Women Society is eligible for the Farm Women scholarship and should apply now.

Cookbook committee chairman Mrs. Paul Witmer announced that the assembly of cookbooks was progressing well, with work days planned for February 15 and 28.

Further plans were made for the March meeting which is being held March 8 at 1:00 p.m. at the Willow Street U.C.C Church. Society 22 will entertain Society 10.

Lancaster Co. Society 29

The February 7 meeting of Lancaster County Farm Women Society 29 was held at the home of Mrs. Marcella Myer, Manheim R5, with Mrs. Janie Garber serving as co-hostess.

"Candy making" was the program for the evening with Mrs. Erma Hollinger of Mt. Joy. Mrs. Hollinger informed the group that fudge is the most widely eaten candy. She also treated the group to six different delicious samples of her candy cookery.

Mrs. Marti Bixler, the group's new president, conducted the business meeting. On December 18, four food boxes were donated to needy families of Maytown area. On February 9 the group served lunch at Wyeth laboratories.

Berks Co. Society 3

The Berks County Society of Farm Women 3 held their monthly meeting at the home of Mrs. Lydia Cleaver, Orchard Hills Apartments.

Mrs. Ernest Hartline, president, reported on the state convention. Mrs. Joseph Bartholomew, Boyertown R2, was elected to a three-year term as state director. Mrs. Bartholomew is a past local and county president and a member of Group 3 for 18 years.

The group will have a food stand at a public sale on April 14 at Greshville.

The group voted to donate $25 to the national foundation of the March of Dimes.

The entertainment for the meeting was "Memories of Old." Miss Hilda Hartman read newspaper clippings of the first years that the group was formed, beginning in January 1954. The meeting closed with all members reading the by-laws.

The next meeting will be held on February 22 at the home of Mrs. William Moyer, Boyertown R4. The program will be on macrame.

Berks Co. Society 8

Several donations were approved by the members of Berks Co. Society of Farm Women 8 at the monthly meeting of the group held at the home of Mrs. Bonnie Rentschler in Bernville.

A $200 donation will be given to the 4-H Development Fund. Monetary donations will also be given to two fire victim families in the area and to a local fire company.

Mrs. Shirley Stricker, president, conducted a review of the constitution and the by-laws. The 12 members present also approved the motion to have the group treasury pay for members tickets to the county convention and to pay for the president and vice president's tickets to the state convention.

A report on the state convention in Harrisburg was given by Mrs. Viola Yost, Mrs. Darlene Yost, Mrs. Barbara Kauffman, and Mrs. Shirley Stricker.

A visit to the craft shop in Shartlesville will precede the next meeting on February 22. Group members are to meet at the craft shop at 7:30 p.m. after which a meeting will be held at the home of Mrs. Joyce Deisemann, Shartlesville

York Co. Society 1

On February 2, the York County Society of Farm Women 1 met at the home of Mrs. Ethel Baker, 1010 North George St., York, with 16 members and three guests present.

Mrs. Grace Bentzel and Mrs. Nora Baylor celebrated birthdays.

A quilting meeting will be held on February 16 starting at 9 o'clock at the home of Mrs. Iva Craft, York Haven, Pa. Bring a sandwich for lunch.

The next meeting of the group will be held at the Barley Convalescent Home on 2618 E. Market St. The hostess will be Mrs. Lida Bear and Mrs. Esther Seitz.

The group will celebrate its 47th birthday at the March meeting with a birthday cake. Prizes were won by Mrs. Mary Decker, Mary Margaret Craft, and Mrs. Evelyn Dallmyer.

Chester Co. Society 1

The Chester County Society of Farm Women 1 met recently at the home of Mrs. Mary Young, Chatham. Programs for 1977 were distributed. Items being made by members for Embreeville State Hospital were demonstrated. Members volunteered to work at the County Convention to be held April 12 in Red Men's Hall, Oxford.

Trudy Dougherty of the county Extension office

Don't let winter put a freeze on your milk production.

This year don't let your dairy cows get into that usual cold weather production slump Add Mol-Mix Liquid Feed Supplements to your feeding program

Mol-Mix is the quality Liquid Feed Supplement that stays in suspension and won't freeze or become too thick even in the coldest temperatures It is the supplement that helps you keep production up while holding costs in line. Plus you get savings in time and effort.

This winter convert to our liquid concept. You'll be glad you did.

Mol-Mix liquid supplements the liquid leader

Now, from Beacon--
Super-Pels*
--the proven feed with more usable protein.

*available in pellets or mash

Cows need protein for milk production. Agreed. But all protein is not usable protein.

The amount of soluble protein a cow can use is definitely limited. Many cows today may get too much soluble protein and the excess may be wasted. That's expensive!

The current trend is to feed more fermented roughage and high moisture grains and less dry hay, dry grains and commercial formula feeds. The combination of fermented roughages and fermented grains may have a higher level of soluble protein than the cow can use. This decreases efficiency and lowers milk production.

To balance roughage programs high in soluble protein, Beacon has formulated Super-Pels, a high-quality grain ration low in soluble protein levels, to compensate for the highly soluble roughage. The Super-Pels formulation is constant. It will never change, and it's one of the most palatable feeds ever produced.

Super-Pels have been tested for two years on farms in two states. The result? Significantly higher production.

WHO NEEDS SUPER-PELS?

Super-Pels is only for the herd that meets all of these qualifications:

- A well-managed herd of 15,000 pounds or more production average.
- Fed a diet which, in large part, is high in fermented roughage.
- The farm is on a roughage analysis program.

Beacon Super-Pels, fed properly, is just one more example of why so many dairymen look to Beacon for **"No-Nonsense Feeding."**

Consumer adviser offers ideas to cut high cost of coffee

WASHINGTON, D.C. - "If the price of coffee is taking the lift out of your coffee break, you should take a look at alternatives," says Nancy H. Steorts, consumer advisor to the Secretary of Agriculture.

Citing figures prepared by Agricultural Research Service's Consumer and Food Economics Institute, Mrs. Steorts said that a cup of regular coffee made with some brands costs about six and a half cents. A cup made from other brands costs about five cents, and a cup of coffee made from regular instant coffee costs less than two and a half cents.

"Even with inflated prices, most people are likely to drink coffee," Mrs. Steorts said. "But there are things they can do to hold down the cost. They can also switch to beverages that might cost more but will provide nutrients that a cup of black coffee will not."

For those who intend to go on drinking coffee, Mrs. Steorts has these recommendations:

Avoid wasting it. Brew as much as you will drink and no more;

Try coffee that is a little weaker than usual. You may like it just as well;

Compare brand prices;

Use regular instant coffee. Per cup of beverage, it costs only half as much as ground and less than freeze-dried coffee, too; and

Compare the unit prices (cost per ounce of per pound) of different size cans and jars of coffee to find the best buys. Unit prices are shown on the display shelf in many supermarkets.

And for those who are cutting down on coffee and trying another beverage, Mrs. Steorts suggested:

Use bouillon occasionally, unless you are on a low-salt diet;

Drink milk made from nonfat dry milk powder. It costs less than coffee. Unlike coffee, it provides important nutrients—calcium, protein, riboflavin and many others. A six-ounce cup of milk made from non-fat powder provides about 70 calories, too. Coffee, without milk and sugar added, provides essentially no calories;

Use hot chocolate made from a home recipe or a commercial mix. It costs a little more than coffee. But for the extra cost it furnishes the nutrients of milk as well as some iron (from the cocoa). A six-ounce cup provides 140 calories or more; and

Use fruit and vegetable juices. Some cost no more than coffee and provide vitamins and minerals.

Home workshops available

WEST CHESTER, Pa. - A Workshop for the home will be conducted by the Chester, Delaware, and Montgomery Counties Cooperative Extension Services.

The Workshop will be held at two locations on March 9, at Holiday Inn, 1124 West Baltimore Pike, Media, just across from Granit Run Mall or on March 10, at Bentley's Restaurant, Gwynedd, about six miles north of Norristown from 10 until 2:30 p.m.

The Workshop will discuss the design principles of interior decorating and the practical application of these principles in renovating and maintaining a home. Mary Saylor, related arts specialist from Penn State University, will give a slide presentation on how to coordinate the design principles in room decorating. Short talks by Southeast Region Extension home economists will include "Care of Wood Furniture," Hanging Wallpaper, Care and Selection of Upholstered Furniture," selecting furniture to fit your Lifestyle" and "selecting accessories for the Home.

Educational materials will be distributed with these short demonstrations. There is a small registration fee which will include lunch. Registration deadline is March 1, 1977. For further information contact the Extension Office at 235 W. Market St., West Chester or call 696-3500.

Matthew Brady, the famous Civil War photographer, took over 7,000 photos while traveling with the Union army.

Societies

(Continued from Page 54)

spoke on Nutrition. She showed a film and distributed recipe booklets.

The Feb. 23 meetings will be held at the home of Mrs. Charles Sproat. There will be sewing for Needlework Guild and more items made for Embreeville.

Chester Co. Society 21

Chester County Society 21 met at the home of Mrs. Willis Rineer, Quarryville, on Thursday, January 13 with the president, Mrs. Robert Rohrer, presiding.

Donations were voted by the Society to be given to the Solanco Fair Association and the Meals on Wheels program.

Mrs. Daniel Jackson of Nottingham demonstrated cake decorating.

The Society's next activites will consist of attending a hockey game at the Hershey Sports Arena on February 12 at 8 p.m.

Co-hostesses for this meeting were Mrs. Charles Tindall, Jr., and Mrs. Howard Steinberg.

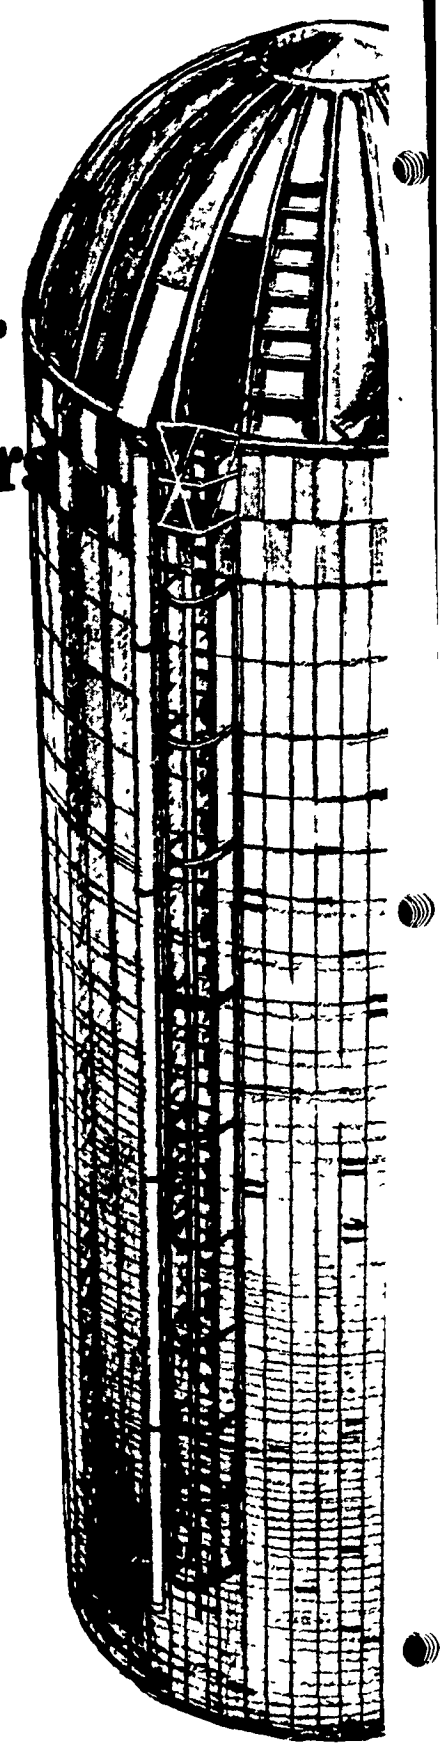
You'll brag for months about the deal you got on your Madison Silo.

You'll brag for years about the quality.



The sooner you order your 1977 Madison Silo, the more you can save. Madison's Winter Purchase Plan is on! And getting an especially good deal is important these days.

However, long after you've forgotten the good deal you got on your 1977 Madison Silo, you'll be enjoying the extra quality that came with it. Look at just some of the ways you get a *full measure of value* from Madison:

Vibra-Cor® Stave: Unique, bridge-truss beam design . . . thickest stave in the industry . . twice the lateral strength of other concrete silo staves

Hoops: 9/16" high-strength steel, specially galvanized and dichromated to fight rust. We don't skimp!

Interior Finish: Vibra-Cor staves' serrated inside surface really holds our durable, long-life interior finish, carefully troweled *all over!*

Madison-bilt Accessories: Top quality from roof to safety cage, all manufactured in our own plants.

Turnkey Construction: Professional Madison crews take pride in being the best. There's nothing for you to do No hidden extra costs

Eight Key Questions Answered:

Questions you really should ask before you buy *any* silo are answered in our new Madison Silos booklet. Send the coupon below for your copy. Even better, ask the Madison Silos dealer near you. No obligation! Ask him about Madison Silos' full "System of Choice," too. It adds Nutri-Matic, Grain-O-Matic and Manure Bank to your Madison Silo.

IFYE experience had impact on Raelene Harbold

By SALLY BAIR
Feature Writer

"Actually living in another culture helps you get to know the people. And while you're learning about other cultures you learn about your home as well," Raelene Harbold said thoughtfully to a group of Lancaster County Farm Women Society 22 members last week. She was guest speaker at their monthly meeting.

Raelene returned in December from a four month visit to the islands of Jamaica, Trinidad, and Tobago as a delegate in the International 4-H Youth Exchange (IFYE) program, sponsored by the National 4-H Club Foundation.

She said the experience was a good one for her, but added that she doesn't think she realized how it was affecting her until she returned home.

"After being away for four months, coming back was a big adjustment - just as much as going to the other country. I had just adjusted to the people there, and then had to get back into this society."

Adjustments for Raelene began before she even left this country in the summer. She had been assigned to East Pakistan but because of a diplomatic difference between Pakistan and the United States that trip was canceled. She was quickly re-assigned to Trinidad and Tobago, and spent a two and a half week period in Jamaica while the program was fully arranged. About the switch, Raelene said, "I think Trinidad was a good replacement. I wasn't disappointed."

Raelene explained to the assembled group that Trinidad and Tobago are two islands, but one country. They are the most southern of the West Indies chain, with the westernmost tip of Trinidad just seven miles off the coast of Venezuela. The two islands are about the size of Delaware.

Trinidad is the more industrial of the two islands, and Tobago is the more agricultural. Trinidad is also one of the richest of the West Indian Islands because of off-shore oil drilling. Trinidad is seventh in the world in oil production, exporting 370,000 barrels of oil daily.

The second largest industry on the island - and the largest agricultural industry - is sugar cane. Said Raelene, "Sugar cane growing there is like seeing corn growing here." Sugar is the country's third highest export and it is exported in a rough state.

Another important export for Trinidad is pitch. Raelene saw the "Pitch Lake" which is the area where pitch is dug - it is hard in its natural state. She explained that it is taken to a factory, melted down, and loaded in barrels for export. This brings in millions of dollars annually, she said adding that Pennsylvania Avenue is made with Trinidad pitch.

Because of their exports and the money earned from them, there is a large middle class on the islands without the extemes of very wealthy and very poor.

Raelene lived with 10 host families, and explained, "I moved pretty fast, spending only 7-10 days with each family The people were so friendly and were very willing to host me. Each family was connected with 4-H in some way."

She said her host families varied from families in homes which featured all the convenienced to some which had no running water in the house. "All my homes had electricity and television," she noted, however.

Raelene said, "I lived with families of every race." In addition to large black and East Indian populations, there are communities of Chinese, Trinidad White and Spanish. She said, "All cultures are woven together there."

Because of the wide range of cultures, there were also many religions, with Roman Catholicism being the most widespread. There was also a lot of Hindu and Muslim religions and protestant sects such as Methodists and Presbyterians.

Raising beef cattle is a large industry on the island, but Raelene said that tics are a big problem because of the heat. At least once a week the animals are sprayed for this parasite so they do not get tic fever.

Because of the hot climate, a pole barn is the only shelter necessary for animals. Raelene said that farmers with less than 15 cows do their milking by hands, but larger herds had electric milking machines. The milk is stored in milk cans and taken twice daily to a central milk house. From there it goes to a processing plant.

Raelene said goats are

Looking at a map of Trinidad brings back pleasant memories of her IFYE experiences for Raelene.

MR. DAIRY FARMER . . .

LET US ALL GET ENERGY SAVING CONSCIOUS

DUE TO THE HUGE RESPONSE TO LAST WEEKS OFFERS WE WILL CONTINUE OUR SPECIALS ONE MORE WEEK.

ADD A THERMA•STOR TO YOUR PRESENT SYSTEM

You as a dairy operator do not necessarily have to own a new milk tank to use Therma • stor to cool milk with. As this photo indicates in this instance this was an old pointed Girton. The point that we wish to stress on you is that we will install and guarantee Therma • stor on most makes or model of milk tank. AND PROVE TO YOU THAT YOU WILL CONSERVE ENERGY.

To Our Non-Electric Users

SPECIAL - WEEK OF FEBRUARY 14TH TO 19TH

If order placed this week for a new or used milk tank, compressor, or Slanzi diesel, we will plumb your milk house FREE.

Plant lovers' corner

Be careful when mail ordering

NEWARK, Del - This is the time of year to browse through garden catalogs and plan next summer's garden. It's easy to do, sitting in an armchair in front of the fire while the wind blusters outside. All kinds of plants, including trees, shrubs, hardy perennials, bulbs and, of course, seeds can be ordered through the mail. You can even buy garden tools and supplies this way

Shopping by mail is convenient. But how reliable are mail order purchases?

According to University of Delaware extension horticulturist, Dr Charles Dunham, old established firms like the Burpees, Kelly Brothers, Buntings, Parks and others have reputations built over many years They wouldn't be in business unless they continued to provide good service.

On the other hand, be wary of the firms that advertise in the Sunday magazine sections and other pages of otherwise reputable newspapers, cautions Dunham. Most newspapers take no responsibility for their advertisers, he explains. These advertisers often make extravagant claims, such as "the world's fastest growing" shade trees, fruit trees that bear huge crops the first year, and flowers that produce "hundreds and hundreds of blooms" and will be the "envy" of all your neighbors.

Unfortunately experience does not always bear out these claims. For one thing, always be sure the size of the plants you order is clearly stated. Otherwise, you may be surprised to find that what you bought for $10 to fully landscape your lot arrives in a package small enough for the postman to deliver along with the regular mail. They may get there in good shape, but it will be several years before the plants are big enough to landscape anything.

Garden catalogs are a valuable source of information, giving descriptions of the kinds, colors, and sizes of plants, as well as comments about their outstanding merits. They also contain valuable cultural information, such as which plants need shade or sun, when they bloom, and whether they are hardy in your climate area. These catalogs can be a great aid to garden planning.

The advantages of ordering by mail are the convenience and the great variety offered. Many times the only way to get certain desired plants is to order this way. Mail order houses may offer a bewildering number of options, but most of their catalogs indicate the most popular, or recommended varieties.

When you order by mail choose an established firm, preferably one that has a catalog. Get your order in early. This will help both you and the company. Be sure to read the instructions for making out the order and include the necessary postage. If you want your order on a specified date, indicate this and most companies will oblige. Otherwise, they will send the order at the time they deem proper for your area.

Addresses for mail order catalogs can be obtained from most garden magazines and many house and garden publications.

Agricultural Pests

Starlings, sparrows, Japanese beetles and roughly half of the United States' major agricultural pests have come from foreign lands On the other hand, the North American muskrat overran Europe and the European rabbit nearly ruined Australia

---

Raelene

(Continued from Page 57)

were given for agricultural projects.

On the island of Tobago, a 4-H club sponsored her and showed her the island during her stay. This very ambitious club also started and operates a cooperative grocery store in their village.

Raelene said her experience helped her develop new interests, including one in politics, which meant little to her before she left. She was away during our presidential election and during an election on her host island. She said, "The people there were very interested in our government because it plays a role in their existence."

She said, "My attitudes are different now. I notice materialistic things more."

"I also appreciate what I have - my family and friends. It helped make me aware of how interdependent we are. I realize how much you are dependent upon others - in some way we all depend upon other people."

Her goal? "I hope to go back," she says with a smile.

very popular because of the hilly terrain, and they are considered a dual purpose animal as are dairy cows. She said, "I ate a lot of goat - it was very good."

Open markets were held every day, and Raelene said her host mothers would usually shop about twice weekly. Nearly everything can be purchased at these markets, including meat, fish and poultry. Chicken is a very popular food, according to Raelene.

In Trinidad and Tobago there are 3500 4-H'ers in 36 clubs, Raelene said. The clubs are organized by the schools, and each club is required to have a gardening project which is planted at the school. She said this is done to encourage agriculture-related projects because there are plenty of handcraft projects. There are also many small animal projects, she said.

Raelene said she found it interesting that at achievement days handwork was not judged, but awards

Zero – PIONEER OF FARM BULK MILK COOLERS

Our liquid starter can help you save your most precious commodity.

Nothing's more precious at planting time than time. This has been a major reason why so many farmers have switched to liquid starter.

One man can load liquid starter two thirds faster than two men can load dry bulk starter. With liquid, he can load three-and-a-half times faster than one man loading dry bagged fertilizer.

Besides speed and ease of handling, ARCADIAN® liquid offers other advantages at planting time. Pesticides can usually be added to ARCADIAN liquid for a free piggyback application.

And because our liquid fertilizers made with ARCADIAN POLY-N® are rich in polyphosphates, they supply more available nutrients. So your crop gets a head start and you get reduced weed problems, earlier harvests, lower drying costs and greater efficiency from your fertilizer dollars. So if you want a better starting starter, stop in and see us today.

Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

Doris Thomas

1976 TAX REFORM ACT - IT COULD AFFECT YOU

With so much consumer legislation being passed, it's increasingly difficult for the average American to keep up-to-date with current rights and responsibilities.

One law you should check into quickly, though, is the Tax Reform Act of 1976. From senior citizens to single working parents, almost everyone is affected in one way or another. For example, alimony is now deducted from gross income, rather than being an itemized deduction. The retirement income credit for the elderly has been broadened. Major child care expenses for working couples or single parents have now become a tax credit.

Business-related moving cost deductions have been liberalized. On the other hand, home office deductions have been tightened to the point of near elimination. Depreciation and maintenance deductions for vacation homes rented out during part of the year are also more stringent.

The booklet mailed to you along with your tax return forms contains all of the ins and outs of the new law and would be well worth studying before you start your computations for 1976.

When you do begin, the American Bankers Association suggests giving a second thought to your banking relationship.

Here's why:

Interest earned on deposits must be counted as income.

You may deduct the interest paid on a personal bank loan from your gross income if you itemize your deductions.

Interest paid on overdraft or "line-of-credit" checking accounts and credit card finance charges are also deductible.

Don't forget the interest on your home mortgage - it's usually your biggest interest deduction.

If you withdrew funds from a certificate of deposit before it reached maturity you lost interest in the form of a penalty for early withdrawal. That amount is deductible from gross income.

Bank customers who opened an "individual retirement account" (IRA) during 1976 must file a separate form No. 5329 to claim the deduction for the amount contributed.

And of course, if you need additional copies of the more commonly used forms, they are available in many bank lobbies.

A few final tips. Start saving and collecting your deduction and interest income records for 1977 now. If they are in one place for next February, your job will be half done. To help keep track of charitable contributions and other deductible expenditures, some banks now offer "tax-saver" check registers with spaces for deduction notations. And, finally, keep all cancelled checks for a minimum of three years. In case of a dispute, you may need them to verify any deductions you claimed.

Craft courses offered by York Extension

YORK, Pa. - The York County Extension Service is now scheduling classes through March and April covering a variety of craft skills. Although some classes are limited in size, they are open to all interested persons on a first-come, first-serve basis.

A six-week course in reupholstery will be held at the 4-H Center, beginning March 8, 9:30 a.m. to 2:30 p.m. A charge of $27 is being made for the class, which is limited to 10 participants. The instructor is Ruth Benedick.

Chair caning is a second six-week class offered, also beginning March 8 at the 4-H Center. This class will meet from 9:30-11:30 a.m. Participants must have a chair cleaned and ready for the caning procedure. Fee for this course is $15, and there is a limit of 10 participants.

Two free classes, each running three weeks, are also being offered. Beginning Knitting will be instructed by Mary Ellen Schmidt at the 4-H Center, beginning March 8 at 7:30 p.m. The class, limited to 15, will learn basic stitches, pattern reading and will knit a simple article in the class.

Beginning Crochet is open to 15 participants and will meet March 15, at 9:30 a.m. for the first session. Mary Ellen Schmidt will instruct the course, scheduled to meet at the 4-H center. There is no charge for the knitting and crocheting classes.

York countians interested in any of the above instructional courses are asked to contact Marceil Seckman, Court House, York, for registration.

On being a farm wife - and other hazards

By Joyce Bupp

Farm machinery can be hazardous! Four-year-old Richard discovered, again, that careless use of equipment can get a little farmer into big trouble.

Attached to our basement is my small hobby greenhouse. Although the low temperatures have been hard on some of the plants, it's usually a cheerful green retreat, especially on a bright February morning with snow on the ground outside. It's also a great place for the youngsters to operate their toy machinery.

After having had a bench of plants bulldozed out last winter, I carefully roped off a construction area this fall for play. Explicit instructions warned little hands to keep out of the other portions filled with potted houseplants.

All went reasonably well until a young visitor and Richard decided to "farm" on a recent Sunday afternoon. They played for several hours, while we entertained the parents. Too busy talking, we neglected to ask ourselves why they were so quiet.

Late afternoon, the two wandered back upstairs to the living room.

"What's on your hands?" I questioned Rich. It smelled like tar. It looked like tar. It stuck like tar.

Then we spotted tracks on the carpet. For a change, I actually hoped it was manure that had accidentally been tracked in. It wasn't.

It was - you guessed it - tar. The boys had it on their shoes, clothes, hands, all over the downstairs carpet and in a path up through the house. Even without checking, I knew what had happened.

In order to moisture-proof a shelf at the bottom of the glass windows in the greehouse, we had covered it with a thick layer of tar-base calking cement. Although very soft and smeary when trowled on, my husband Leroy had assured me that it would harden. Well, four months later, it still hadn't set.

The boys had run their machinery all over the benches, building runways and roads of boards and crawling through the potted plants, all forbidden, of course. In the process, they got their shoes in the "gook" and then decided it was great stuff to push and poke in with my plant support sticks.

Gasoline took the tar stains away, and I took the machinery away. It remained impounded for a week - the punishment must fit the crime.

The greenhouse has now been declared a wilderness area. Only Mother Nature plays there from now on.

Smyser to head York Co. DHIA

YORK, Pa. - Robert Smyser, Dover, has been elected president of the York County Dairy Herd Improvement Association. Larry Amspacher, York, R7, will fill the office of vice-president; and Leo Rutter, York, has been chosen secretary.

Recent action of the board of directors of the DHIA raised testing fees for county dairy participants by five cents per cow. The increase became necessary after the state association raised fees to all county members.

Effective January 1, charges for listing new cows on test sheets was dropped.

Other countians serving on the board are: Robert Mays, New Freedom R1; Rodman Thompson, East Berlin R1; Donald Fantom, Delta R1; William Fanton, Delta R1; George Knight III, Airville R2; and Clair Myers, Dover R6.

Officers elected

ELVERSON, Pa - Kevin Biler was elected president of the Chester County Black and White 4-H Club at the January meeting of the organization held at the home of Mr. and Mrs. Jefferson Yoder, Elverson.

Other 1977 officers elected were: Lane Keen, vice president; Tim Kurtz, secretary; and Don Stolsfus, treasurer.

Refreshments were served after the business session.

Is the grass really greener in the middle of the Pacific?

By JOYCE BUPP
York Co. Reporter

WAINANAE, Hawaii - So you're tired of frozen water pipes, snow blowing down your neck, and tractors that won't start? How would you like to farm in year-round 70-degree Hawaii?

Larry DeHart is the assistant manager of Bob Toledo's Dairy Farm, located on the west coast of the Island of Oahu, Hawaii, near the town of Wainanae.

A former Californian, DeHart has been managing the Toledo farm for 10 years. He formerly worked for American Breeders Service, and first came to Hawaii while covering the Oahu area for a breeder who was temporarily working on a neighboring island.

Toledo has the second largest dairy operation on the island, with 2500 head of cattle including bulls and calves. There are approximately 1600 cows in the milking string, an almost 100 per cent commercial Holstein herd. Two farms house the milking operations, with 500 head in one lot and the other 1100 in a lot just a mile away.

The exercise lots are hidden in the high brush at the foot of the rugged volcanic cliffs of the island's western mountain range. Just a mile or two away, the blue Pacific can be glimpsed above the bushes. Land here is a most precious commodity; steep volcanic slopes, supporting only cactus and dry brown scrub brush, sells for $20,000 an acre. Much of the ground is government owned; and farm operations must settle for leasing what amounts of land they can contract. Even private homes are built on land leased from the state, with a 99-year lease agreement.

Bob Toledo owns 37 acres, where the milking operations are located, and leases an additional 144 acres from the state. Part of that leased acreage is a rugged, mostly barren hill directly behind the dairy set-up on the larger farm.

"We leased that mountainside to store our manure against," commented DeHart. "Our operation grows no crops, so we have no place to dispose of cattle wastes. We've finally convinced the pineapple growers over the mountain to start using manure on their fields. We were starting to worry about what we were going to do with the wastes - they kept piling up year after year."

The exercise lots are hidden in the high brush at the foot of the rugged volcanic cliffs...

The pineapple plantations are a good 20 miles away. Toledo willingly hauls the manure that distance just to be rid of it.

Cows in Hawaii have learned to eat a unique diet. Practically all feedstuffs must be shipped from the mainland; therefore, they don't come too cheaply. Although there are four feed companies on the island, Toledo bulk purchased the ingredients and mix his own rations.

In a huge lean-to structure are piled mountains of strange looking commodities. Tons of whole cottonseed, with white fluffy fibers still clinging to it, makes up one pile. It comes by ship at $192 per ton, with $37.50 going for freight costs. A large pile of green chunks turns out to be alfalfa cubes, coming in at $132 per ton. Cottonseed meal costs $202 per ton. Other ingredients may include cottonseed hulls, rice hulls mixed with barley, and brewers mash.

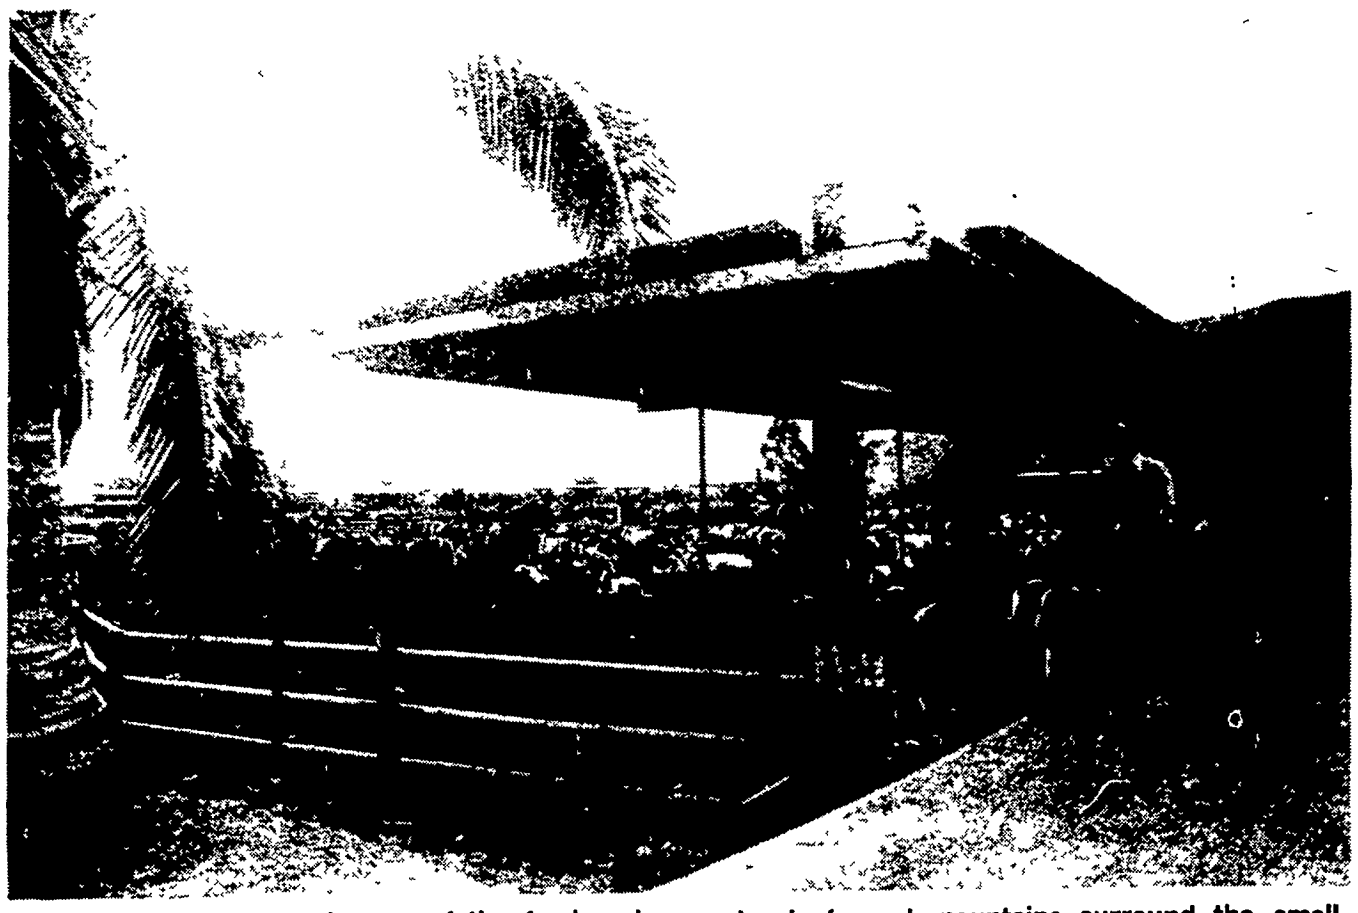
But what about pineapples? Isn't there something of use to cattle from this famous island crop?

"We do mix some pineapple bran in our rations," explains DeHart. "That's the cooked outside waste of the pineapple fruit; that costs us $100 per ton."

"You're not going to believe it when you see our silage," laughed the farm manager. The slippery greenish matter turned out to be chopped pineapple leaves, which are 90 per cent water and only 10 per cent fiber. Brewer's mash mixed with the mass soaks up some of the liquid.

Feed is mixed on the spot at the dairy, using a large payloader to scoop and dump from the assorted commodities into a giant mixing truck. While being blended, molasses and heated animal fat are added to the ration.

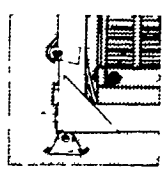
[Continued on Page 64]



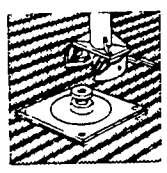
Larry DeHart pauses by one of the feed and exercise lots for Toledo's 1600. Ancient, rugged volcanic formed mountains surround the small seaside valley where the farm is located.

BIG TRUCK HAULING WITH YOUR PICKUP AND THE...

WINNEBAGO® Agri-Trailer™



Two-speed landing gear provides easy hitching.



Easy hook-up with wide-opening jaws of Pin & Plate.

Hitch this versatile trailer to your truck for road travel, switch it to your tractor for field loading. The Winnebago Agri-Trailer can carry as much as a 3-ton truck. It can haul over 7½ tons. Or 285 bushels of grain.

Winnebago's 5th wheel design gives unique stability. It turns short, backs up easy, and trails true at highway speeds without fishtailing.

AGWAY 840 X

"The best hybrid Agway has ever offered my growers."

NICK FERRANT, JR. AGWAY CROPS SPECIALIST

If you grow corn in Delaware, Maryland, Jersey or southeastern Pennsylvania, take a tip from Nick Ferrant. Be sure to include Agway 840X in your planting plans for '77.

In Nick's words, "In long-season areas, I doubt if any corn will beat this one when well grown. High yields of silage and grain, excellent standability and high-population performance . . . and medium-low ears that harvest beautifully."

Nick also suggests you try new Agway 827X because "It looks like a real winner for this area."

This year, put both in your corn program. Agway 840X and new 827X will come through with the energy results you need, and you'll find out that Nick really knows what he's talking about.

Agway Energy Kings... more milk making power.

AGWAY

The pineapple plantations are a good 20 miles away. Toledo willingly hauls the manure that distance just to be rid of it.

Is the grass

(Continued from Page 62)

The blend is mixed according to current DHIA recommendations and is constantly monitored. After preparation, the freshly mixed feed is run directly from the truck into each lot.

The large herd averages 40 pounds of milk production per animal daily. Milk is processed through the farm's Foremost dairy, and is hauled to the bottling plant by Toledo's large bulk tank trucks.

"Our milk price here reflects our high costs," figures DeHart. "First class pays $16.44 per hundredweight; we get $9.43 for second class." During school months, utilization reaches 78 per cent first class, but drops considerably to 60 to 65 per cent first class sales during student vacation periods.

In addition to coming under local inspection requirements, Toledo is subject to Federal inspector jurisdiction because of selling directly to some of the many United States military installations on the island.

Three separate milking parlors handle the large herd, with one man milking six cows at a time. Automatic take-off milkers have already been installed in a new parlor at the smaller facility and are scheduled to be included in renovation at the large farm, enabling each man to handle eight cows in the future.

DeHart oversees the farm's 35 employees, who belong to the Teamsters Union. There are 12 milking employees, 10 regular and two reliefers. Average salary is $750 per month, with overtime paid over 40 hours weekly and double and a half time for major holidays. Benefits include houseing, insurance, retirement, two weeks vacation for all employees and three weeks after 10 years.

Constant warm temperatures may sound inviting to ice-bound northern dairymen, but in reality it's a mixed blessing.

"You probably can see the cows huffing and puffing," DeHart pointed out. "The heat is rough on them; and

"The heat is rough on the cows; so most of them don't last beyond three or four lactations."

so most don't last beyond three of four lactations." The hot, humid weather takes its worst toll in breeding problems, with an average of two and one-half services needed to settle a cow. All cows are artificially bred, with sires from the Curtiss Breeding Service used most heavily.

Replacements must be obtained, like feed supplies, from the mainland. Most are purchased from large operations in California, and then shipped by boat in containers developed by the Hawaii dairy farmers in conjunction with the University of Hawaii

"The container idea came about because of the extremely poor beef prices for cull animals and bull calves. There were only two slaughterhouses on the island, and we took a beating on beef prices," explained DeHart. "We found that we could ship the animals to the mainland and get a better price, even with shipping costs figured in.

Cattle making the container trip have the comforts of self-feeding and watering equipment. Units carry animals to California feedlots and auctions, and return loaded with replacement springing heifers, carrying a price tag of about $800 per head.

There are 22 dairy farms on the island, with an average of 250 cows per farm. Marketing is handled by two cooperatives. One is comprised of seven of the larger dairy operations. The other cooperative's membership is made up of the remaining 15 farms across Oahu. Advertising is as upbeat an any done on the mainland; and Toledo's milk trucks feature the slogan, "Every Body Needs Milk," with attractive decal decorations. Funds for the program are raised through an advertising checkoff.

Larry DeHart didn't hesitate a moment when questioned about the Hawaiian farmers' single biggest obstacle.

"Being out here in the middle of the Pacific is by far our biggest problem," he immediately responded.

"There is not one single machinery dealer on this island," he continued. If a machinery part breaks, you call the mainland and have it flown over on the first available plane. If it's too big to send by plane, the machinery sits until the part can arrive by ship, a several-days process. Also, there's no competition among agri-businesses. Only one business handles a service -

Remember-if you are looking for farmland, we put service first. I have knowledge of a lot of farms for sale in Cumberland, Perry and Centre County. Most of these farms are in the Amish and Mennonite sections.

PERRY COUNTY

80 acre farm - this farm is a sweet dream! Has a stone farmhouse and spring house. Has some Amish families living not far away. 65 acres tillable. This house features a family room with wall-to-wall plush carpet and fireplace. Has a bank barn with 15 stanchions.

CENTRE COUNTY

Looking for a farm in Centre County with Amish neighbors? Here is one that has 105 acres, 98 tillable. There is a possibility of selling off some frontage for development. Has a possible potential of $130,000 for the lots along the road. Has public water lines along the frontage.

24.5 ACRES AND INDEPENDENCE
in Northern Lancaster County. Presently hog and beef operation. Very adaptable for large poultry houses. Sandstone ranch home, well constructed, 3 to 4 bedrooms, 1½ baths, large eat-in kitchen, large living room, full basement, improved.

A PRODUCTIVE DAIRY FARM
236 tillable acres, possibility of renting adjacent land; 2 very nice homes, 2 barns - 1 with pipeline milker for 37 cows, the other for heifers; 93 stalls, 5 Harvestores. A very desirable farm, also has pasture and woodland - total 330 acres. Dauphin County

123 ACRE FARM NEAR MYERSTOWN
110 Tillable productive acres, balance pasture, Barn for either beef or dairy, 2 large trench silos, large milk house, a very good large brick home completely renovated. Ask Jesse for an appointment to see this one.

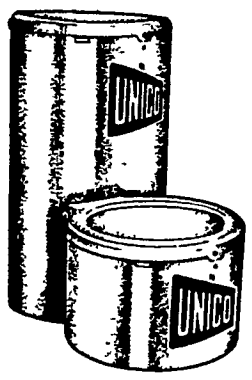
AGWAY

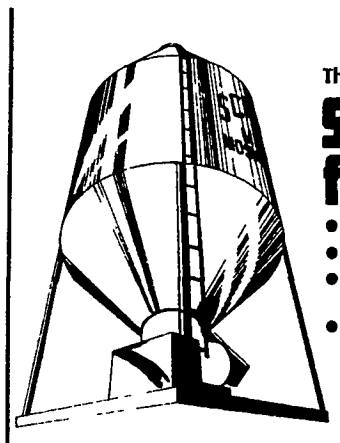
HEADQUARTERS FOR LABOR SAVING EQUIPMENT

Easy answers to winter watering!

Heated Automatic Stock Fountains



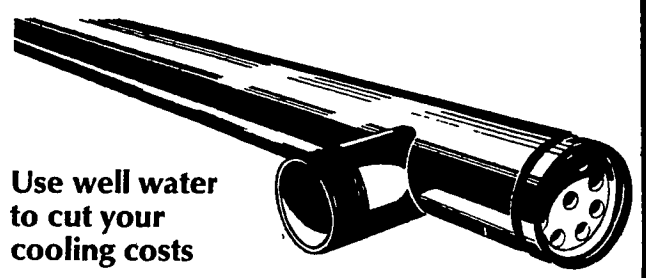
- electrically heated with 4 gal./min. flow
- non-siphoning, easy-clean aluminum bowls with plastic liners
- double-acting valve above water level
- operates at 5-120 psi
- hot-dipped, galvanized steel housing
- heaters guaranteed 3 full years
- 13" diameter, 8" or 24" high



The right feed bin for you

Schuld bulk feed bin

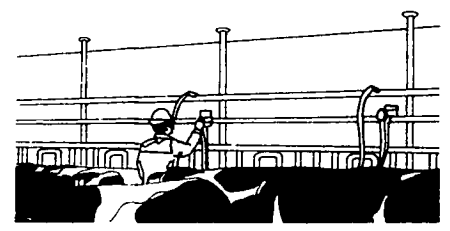
- Capacities from 3 to 125 tons
- Unique free-flow design
- Free erection (all but largest)
- Heavy galvanized steel



Use well water to cut your cooling costs

PRE-COOLING SYSTEM by Top Line

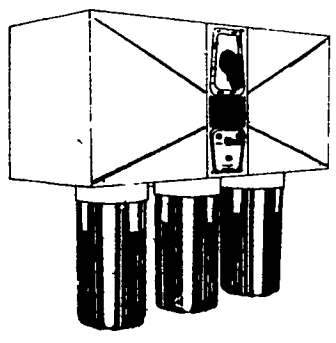
Uses your well water to pre-cool milk by 20-25° in the line! Saves money, cuts compressor time in half. Simple, effective, economical.



Give up lugging milk forever!

Agway Pipeline System

- Pumps milk from stanchion to bulk cooler automatically
- Helps maintain milk quality and reduce bacteria count because milk cools faster
- Reduces costly manhours



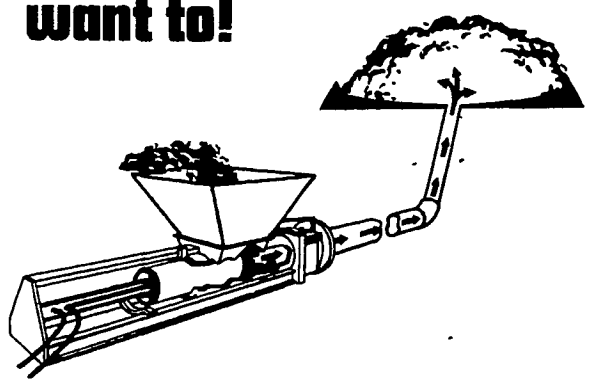
Get pipelines clean . . . automatically!

You pre-program it to sanitize at your convenience. Sanitizes in just 30 minutes! Automatic adjustable failsafe timer protects against malfunctions. With 3 large chemical dispensers.

Universal deluxe full convenience washer

Hydra-Ram

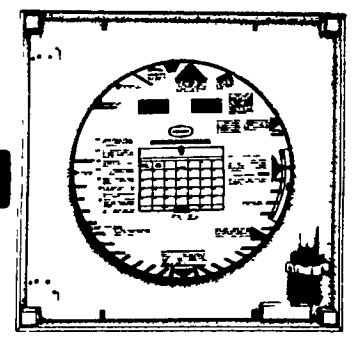
Lets you spread when you want to!



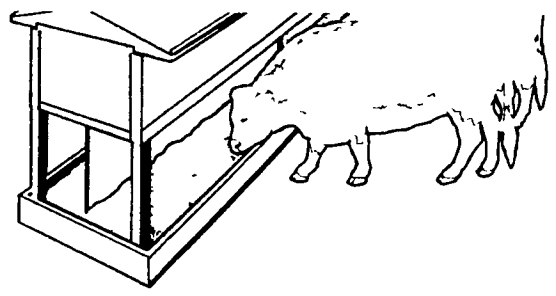
- 5 hp variable-volume hydraulic pump requires less electrical energy than 10 hp fixed units
- moves manure, as is or with bedding, to outside storage up to 250' away
- no need to add water at the pump or in the storage
- manure crusts over to conserve nutrients, squelch odors and discourage flies
- works with barn cleaners or scrapers, in freestall or confinement barns

It belongs in every barn!

Agway Breeding Control Center



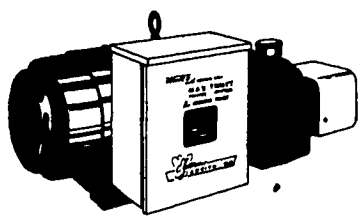
Large, easy-to-use wheel tabulator shows gestation stage of every cow in the herd at a glance. Simplifies the keeping of permanent records. Made of moisture-resistant materials covered with clear glassene for good visibility. Includes 100 numbered pins.



Faster feeding . . . effortlessly!

Farm-Eze belt conveyor bunk feeder

Exclusive Farm-Eze plow provides even feed distribution for each foot of bunk regardless of length! Quiet, safe and simple-to-operate Farm-Eze delivers a minimum of 250 pounds of feed per minute! 1½ hp motor powers lengths to 165'.



Will a sudden storm wipe out your profit and power?

Not if you have a Winco! 20KW Generator provides power where and when you want it. Starts a 10 hp motor with ease. Built-in Maxi-Watt® power control system delivers maximum power quickly.

Shuttle Feeder #85

Save labor and up to two-thirds less power than your present feeder may use!

Starline 85 Sweep Shuttle feeder

- Uses about one-third the power required for conventional feeder of the same size
- Handles all types of silage and ground feed
- Double action discharge
- Whisper quiet operation
- Available up to 150' long

Heifer management is topic of Garden Spot farmer meeting

NEW HOLLAND, Pa. - The Garden Spot Young Farmers will sponsor an educational meeting on the management of dairy heifers on Tuesday, February 15th, at 7:30 p.m., at the agriculture classroom of the Garden Spot High School. Speakers for the meeting will include Gerald Bodman, Extension agricultural engineer from Penn State, and Jess Smith, nutritionist from Agway, Inc.

The objectives of the meeting will be to make dairymen aware of the problem areas in heifer management from weaning to freshening. Bodman will examine and present slides of various types of housing facilities for heifers and discuss the management of facilities with respect to ventilation, feed and manure handling efficiency, space requirements for various age groups, and equipment to catch and hold heifers. Calf hutches will also be discussed for use with younger replacement stock.

From the feeding viewpoint, Smith will discuss feed requirements for heifers at various age levels, suggested age groupings for different feeding programs, proper worming programs to follow, as well as other miscellaneous management tips to get heifers to adequate size to breed and freshen in an acceptable time span.

All interested dairymen are invited. Refreshments will be served.

Beaver season begins today

HARRISBURG, Pa. - Pennsylvania's 1977 beaver trapping season will open at 7 a. m. today (Feb. 12) and continue throughout the state until noon on March 12.

Game Commission field reports indicate there will be a fairly good supply of beavers available to trappers this year, especially where there were large populations of North America's largest rodent in 1976. The daily and season limit for beavers will be three.

Beaver trappers are reminded of special regulations governing the taking of these furbearers.

Any questions which concern beaver trapping should be directed to game protectors.

Rural population growth continues

WASHINGTON - Jan. 31 - Between 1970 and 1975 rural areas and small towns in the United States grew by 3.6 million people. This was an increase of 6.6 per cent, compared with a 4.1 per cent increase for metropolitan areas, according to the U.S. Department of Agriculture.

The trend toward renewed rural population growth, first reported in the 1970-72 period, thus continued through 1975, reports demographer Calvin Beale of the Department's Economic Research Service (ERS). His analysis is based on Census Bureau county estimates.

The new trend reverses the massive rural-to-urban migration that occurred from World War II through the 1960's. Nonmetro counties had lost three million people through outmigration in the 1960's.

Some of the rural growth in the 1970's is due to sprawl from metro areas into neighboring nonmetro counties, which grew by 7.4 per cent between 1970 and 1975. However, suburban sprawl does not explain the whole phenomenon, according to Beale. Nonmetro counties that did not border on metro areas grew by 5.7 per cent, substantially exceeding the national growth rate of 4.8 per cent for the same period. None of these growth rates is particularly high - historically, because the U.S. birth rate has been low in the 1970's.

The rural revitalization is not a back-to-the-farm movement. In 1970-75 the U.S. farm population declined by about 850,000 or 8.7 per cent. Although more Americans are living in rural areas, an increasing proportion of them are not farmers. Agricultural employment is now small enough that further reductions have little effect on total nonmetro population change, says Beale.

Both economics and attitudes are causing people to move into nonmetro areas. A key economic factor: employment there has increased faster than in metro areas in every major industry except government.

About half the migration to nonmetro counties in 1970-74 was to retirement counties, where people usually go by choice rather than for employment. These retirement counties were the fastest growing group of nonmetro counties in 1970-74. Their population increased 14.5 per cent (triple the national average) for a net gain of 932,000 people.

Another reason cited for the movement to nonmetro areas is the narrowing gap between urban and rural quality of life. Conveniences such as water supply, plumbing, heating, electricity, roads, and communication are available now in rural areas. A "City Limits" sign no longer signals a striking difference in lifestyle or convenience.

Other factors enter into the population change, also: the end of significant additional losses in farm employment; the revival of mining; continued growth of a retired population, which favors small communities and recreational areas; the impact of the environmental and ecological movements on residential preferences; the unfavorable image of big cities in such areas as crime, drugs, pollution, race conflict, school troubles, and finances; the high cost of metropolitan housing; and the emergence of an adequate system of higher education in nonmetro areas.

There seems to be a general trend toward living in smaller places - in both rural and urban categories. Small metro areas (50,000 to 750,000) are retaining or attracting population much more than larger areas, which are growing slowly or diminishing. And the most rural counties, with no place of 2500 people, had the highest nonmetro growth rate in the 1970's, after having declined in the 1960's. Also, the trend of people into nonmetro areas is no longer toward higher income areas, as it was in the 1950's and 1960's, Beale notes.

The current urban-to-rural trend is likely to continue at least into the next decade, although its length and extent are hard to predict, says Beale.

The urban-to-rural trend is not peculiar to the United States. The decentralizing pattern is showing up among other developed nations, according to Beale. When rural areas attain the material conveniences characteristic of cities, and urban ills increase, the influx to big cities seems to slow and even turn around.

A potential problem that could lessen the urban-to-rural trend, Beale notes, is gasoline costs and supply. "The new trend is not energy conservative. Rural people use considerably more gasoline per capita and have fewer public transportation alternatives during an emergency," he points out.

Grange suspicious of Ag-Land Trust

The National Grange has called for investigative hearings of Ag-Land Trust, a new financial investment plan for investors of pension funds and profit sharing plans.

Developed by Continental Illinois National Bank and Trust Co. and Merrill, Lynch, Pierce, Fenner and Smith, Inc., the plan involves the direct purchase, with mutual funds, of $50 million worth of prime farmland across the country. The farms would then be leased to local farmers with the bank supervising him on the basis of over-all management.

John W. Scott, head of the nation's oldest farm organization, said, "This raid on productive agriculture land is outrageous and must be stopped . The long range effects could be devastating to both our family farm system and thousands of small businesses in rural communities."

Scott said the Grange has asked the Internal Revenue Service to delay its ruling on the tax exempt status of the plan until Congressional hearings can be held. He said, "Tax exemptions for a land grab of this kind are totally unfair to every tax paying citizen and the Grange is prepared to take the matter to court, if necessary."

Scott also said, "The plan pits the resources of two, multi-billion dollar corporations against individual family farmers which could hardly be called fair competition." He said the Grange feels the two financial giants are not concerned about actual agriculture production but are more interested in taking advantage of rising land prices. The value of cropland has doubled in the past five years. The U.S. Department of Agriculture is currently estimating an annual rise of nine per cent or doubling of land values every eight years.

Deadline extended

HARRISBURG - Pennsylvania motorists whose cars carry the No. 2 sticker have an additional two weeks in which to have their vehicles inspected.

Transportation Secretary William H. Sherlock announced today the new inspection deadline: Midnight, February 28, 1977.

The extension is the second announced in connection with the current No. 2 stickers. At the height of the heavy snow period an extension was granted because of the backlog of inspection appointments brought on by the brutal weather. Similar reasons are given for the latest change of date.

Pollution control programs received additional funding

HARRISBURG - Pennsylvania farmers now have a new source of funding for their erosion control and pollution prevention projects through a Small Business Administration and Environmental Protection Agency program, according to Walter N. Peechatka, director of the Department of Environmental Resources' Bureau of Soil and Water Conservation.

Peechatka said funds under the program will be made available to owners or operators of small farms, with gross sales not exceeding $275,000 annually, who might not have adequate resources to deal with water pollution problems effectively.

There is no formal limit on the amount which can be borrowed, he said, but a certification from EPA's regional office is needed to indicate that the steps to be taken are both necessary and adequate to meet clean water and public health requirements.

The SBA, after receiving the EPA certification, will make low interest loans with repayment terms of up to 30 years and an interest rate set at 6-⅝ per cent, although the lending rate may fluctuate from time to time. Individual farmers as well as corporate and other farming concerns are eligible to participate in the program that, before 1974, was available only to small businessmen.

Peechatka pointed out that DER has developed programs to prevent water pollution from non-point sources such as farming, forestry activities, construction and mining activities which in the past have contributed substantial amounts of sediment, organic waste and chemical pollutants to the State's streams.

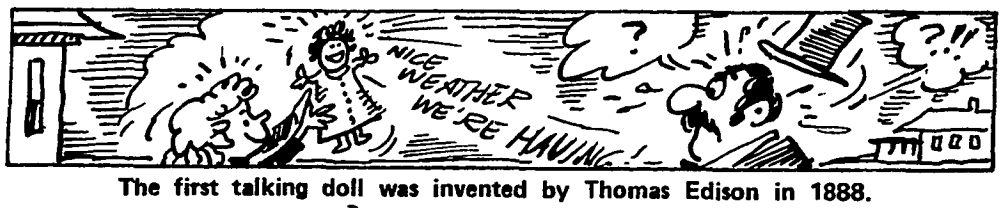
"We must explore every opportunity to reduce the non-point source pollutants entering Commonwealth waters," Peechatka said, "because as progress is made in dealing with point source such as industrial plants and municipal sewage outfalls, the non-point sources will be contributing an even greater percentage of the State's total load of water pollutants."

The Federal Water Pollution Control Act Amendments of 1972 call for states to prepare detailed plans to solve their water pollution problems.

Pennsylvania's erosion and sedimentation control program has been in operation since September, 1972, when the Environmental Quality Board adopted rules and regulations for prevention of water pollution from sediment to be implemented by DER.

Peechatka noted that other sources of pollution including pesticides, animal manures and agricultural wastes also are being studied by the Agricultural Advisory Committee to the Department. This new funding, along with regular funding mechanisms of the U.S. Department of Agriculture, agricultural conservation program and conservation loans from the Farmers Home Administration will provide financial assistance to farmers to control most of these sources of pollution, he said.

Farmers interested in more information should contact the regional coordinator of the program for the U.S. Environmental Protection Agency, Matthew Miller, staff environmentalist, EPA, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106, telephone (215) 597-3635.



The first talking doll was invented by Thomas Edison in 1888.

SOYBEAN ROASTING ON YOUR FARM

For peak feeding value have your soybeans roasted.
(To kill toxic enzymes in raw soybeans.)

1. Roasted soybean (not just cooked), increases digestibility by 15 percent.
2. Increases weight gain for beef & hogs.
3. Increases butterfat in milk & egg production.
4. Improves animal health, reduces vet bill.
5. Eliminates hauling to the mill & back to farm.
6. Feed your own grown grain. (Not exchanged with others).
7. Beans remain whole. Store for months without losing any feeding value.

VALUE OF A FARM INVENTORY

As farmers file their income tax for 1976, many will compare the net farm income from this year to that of previous years and pass judgement on the success or lack of success in their farming operation for the year. But, is this a fair evaluation of a farm operation? Certainly receipts minus expenses (net farm profit) is necessary in any determination of profitability, but it alone is not enough. Without consideration to the change in inventory, a true measure of progress is not possible. Just how does this work? Let's look at a simplified example and see.

Dairyman Jones had gross receipts of $42,560 for sale of dairy products, cull cows, and calves. His total expenses, including depreciation, were $31,320. At the beginning of the year, Dairyman Jones had 40 cows and 31 heifers on hand worth $33,000 as well as $18,000 worth of stored feed, silage, and hay. At the end of the year he had 38 cows in the herd and 26 heifers worth $30,600 and $16,500 worth of stored feed, silage, and hay.

With the above information, if Dairyman Jones used only receipts minus expenses, he would be under the impression that he made a profit of $11,240. But, considering the change in inventory value ($51,000 beginning minus $47,100 ending), he would have a profit of $3,900 less or $7,340. In other words, over one-third of his "apparent profit" was actually "living off his inventory".

Of course the above example was much simplified but illustrates the point that all is not what it appears to be. In these days of declining profit margins and increased costs, the use of good business analysis practices is becoming more and more important.

The keys to taking an inventory are: 1.) Consistancy - taking the inventory at approximately the same time each year, 2.) Accuracy - using precise measurements and counts as opposed to sitting at the desk and guessing, 3.) Fairness - using fair market values for livestock, grains, and feeds, and depreciated values for equipment. You will need some good charts to help you determine amounts of silage in silos, corn in cribs, grain in grain bins, etc. but most good records books will have such charts to help you.

This is just the beginning of good farm business management and analysis. To be sure, a lot more is involved with a total records program and analysis - but if done correctly, this type of record system and analysis can be a "road map to the future".

Promotional programs studied by Penna. Egg Marketing Assn.

HARRISBURG - The Research and Consumer Education Committee of the Pennsylvania Egg Marketing Association has reviewed six potential projects for egg promotion, finding value in all of them but considering just one to be most advantageous. Institutional and restaurant promotion was given top priority. Reviewing all areas that were given consideration, the committee formed the following conclusions:

Egg Princess

The committee felt the limited promotional value of this concept did not justify the difficulty in selecting and maintaining such an individual. Costs were estimated at approximately $4,000 and the concept was rated as a low priority.

May is Egg Month

The committee estimated an approximate cost of $5,000 and felt the required supportive services for industry backup would be more demanding than we could guarantee for its success.

Billboard Advertising

The committee decided this was the most preferable means of promotion but its effectiveness would require a stronger financial committment than is practical for this organization. Costs of billboards in the Philadelphia and Pittsburgh areas are $250.00 per month, Harrisburg area $185.00 per month, and smaller cities $165.00 per month. To cover the major market areas in the state of Pennsylvania would require $35,000 per month. The committee although very enthusiastic about this advertising approach felt that time was too limited to develop a proposal that could both be funded and yet have some respectable impact. However, the committee is going to bring the whole concept of billboard advertising to the attention of the American Egg Board Advertising Committee.

Public Service Messages

The committee discovered that a direct relationship to the American Egg Board program was not possible since The American Egg Board is presently buying time on radio and television for these same advertisements. General public service announcements were considered but material and distribution of material were larger problems than could be resolved at this time.

Promotion to Reach Home Economists and Food Editors

The committee discovered in their research that the American Egg Board is presently covering the entire state of Pennsylvania with this program and no supporting services are necessary.

Institutional and Restaurant Promotion

The committee learned from the American Egg Board that in the future they will need some assistance with the distribution of quantity recipes. Therefore, the committee turned its attention to restaurant promotion.

Lancaster County once had 400 mills

The Brownstown Mill, on the Conestoga River, as it appeared in 1924. Paes has been calling the Conestoga a "river" for all of his life, a designation which it didn't officially receive until just a few years ago.

By DIETER KRIEG

LANCASTER - Fifty years ago Chester Paes was told to "either leave the farm or push daisies."

The young man was having difficulties with his back, an ailment which had the potential to kill him, according to doctors. So Paes left the former Henry B. Esbenshade farm near Eden and went to work in town for the Hamilton Watch Company.

But he couldn't get the country out of himself and so his interest in agriculture remained. A hobby developed as a result of the illness and in the oncoming years Paes photographed and documented nearly all of the mills which stood in Lancaster County. His collection encompasses 375 mills, 200 of which he was able to record on film. Paes, now 83 and retired in Lancaster, did more than just take notes and pictures of the old mills which were in Lancaster County and fringe areas. He's likely one of very few men who'll be able to unhesitatingly tell his visitor that Lancaster County has 18 streams running through it which are large enough to support a water-powered grist mill.

Furthermore, Paes has other historical information, ranging from the old bridges across the Susquehanna to farm prices 100 years ago. Oats sold for 44-48 cents per bushel in Baltimore 101 years ago, for example. In September of 1875, flour sold in Philadelphia's export trade for $5.25 to $5.75 per barrel. Old red wheat that Fall was listed at $1.48 to $1.50 per bushel; new red wheat ranged from $1.35 to $1.90. A bushel of corn was worth about 82 cents. Oats could be purchased for 60 cents per bushel and rye was anywhere from 90 to 93 cents.

Paes' unusual hobby emerged as a result of his once having lived next door to Umble's Mill near Eden. Owner Chris J. Umble, since deceased, assisted the young man with his research on mills, as Paes claims he didn't know anything about mills. But they fascinated him and he wanted to learn all he could.

The octogenarian noted that even in the early days it was required by law that a potential mill owner apply for a permit before he constructed his mill. But, according to Paes, there might as well not have been any such regulation - it was merely a formality and permits were always granted.

Paes traced the development of the mills through their various power stages - first came the undershot wheel, then the overshot, and finally the side-driven turbine. The overshot wheel had more power than the undershot version, but it also required more investment on the part of the miller. He needed a dam, as well as a head and tail race. When the turbine arrived, millers had to use a more sophisticated configuration of gears and shafts than what they had used before. But the result was greater efficiency and more power, and in an age of growing agricultural production and demands, more power and efficiency is what the "game" was all about. It's a trend which is as true today as it was then.

Another similarity between then and now is bad credit, said Paes, whose eyes sparkle with delight from behind his glasses whenever he talks about his favorite interests. "Some fellows would run their bills up to several hundred dollars and not pay," said Paes in a concerned tone of voice.

Crownvetch fits into no-till program

UNIVERSITY PARK, Pa. - Using crownvetch as a cover crop for no-tillage corn can help solve the age-old problems of soil erosion and weeds, a plant scientist at The Pennsylvania State University declared recently.

Dr. Nathan L. Hartwig indicated experiments at Penn State and elsewhere found that crownvetch reduces surface water runoff and improves water storage in the soil. And he reminded farmers that every farm in Pennsylvania must have a soil conservation plan this year to prevent the polluting of streams with silt, plant nutrients, and pesticides carried in surface water runoff.

"Crownvetch in no-tillage cornfields could provide the dollar's worth of prevention needed for a water runoff problem that now is treated with millions of dollars in cures," Hartwig affirmed.

He claimed a cover crop of crownvetch also improves the nitrogen fertility of soil, since crownvetch "fixes" nitrogren from the air when inoculated with the right bacteria. And he said research shows that 100 bushels per acre corn yields are possible for no-tillage corn planted into a three to five year old stand of crownvetch, without being given any additional nitrogen.

By using herbicides in the spring, growth of crownvetch is slowed down sufficiently to allow the emerging corn plants to become established. During the Summer, the crownvetch forms a cover to keep out weeds. By Fall this legume has formed a dense cover for Winter and a living mulch for next year's corn crop.

The Penn State weed scientist said established crownvetch will not be wiped out by any of the presently recommended herbicides used with no-tillage corn. Once the crownvetch is growing actively in late May, it takes only 1-10 pound per acre of active dicamba or 2,4-D to suppress crownvetch enough to release the corn.

"Crownvetch that has been established for two years or more will tolerate atrazine, simazine (Princep), cyanazine (Bladex), alachlor (Lasso), or penoxalin (Prowl) in amounts suggested on the label for specific soil types when treating annual weeds or quackgrass in no-tillage corn," Hartwig stated.

He believes simazine is "too hot" to use on one-year-old crownvetch. However, atrazine can be used at a rate not to exceed 1 pound per acre. If weeds such as fall panicum, witchgrass, or crabgrass are problems, use a mixture of atrazine and cyanazine (Gladex) at the lowest rate recommended on the label for a particular soil type. Another method, he said, is to use Prowl or Bladex plus Prowl at recommended rates for the soil type.

"Always be ready to come back with one-tenth pound per acre of 2,4-D or dicamba if the crownvetch appears to be getting ahead of the corn," he advised.

And he said the best control for quackgrass in crownvetch seed fields is two pounds of atrazine per acre in early spring - March or April - before planting corn. As long as the corwnvetch is not growing, it will not be injured by this treatment, Hartwig noted.

If there is a lot of green quackgrass or weed growth at corn planting time, he suggests applying a pint of paraquat per acre with a wetting agent in the mixture with atrazine and simazine. Hartwig cautioned farmers to follow carefully the directions on product labels.

Part-time farming studied

Approximately 25 per cent of the farms in Pennsylvania with sales over $2500 are operated by part-time farmers, farmers who have income from off-the-farm sources. Successful operations are usually dependent on the families, because it takes similar values and goals to make them work.

Penn State's popular course on "Farm Management for Part-Time Farmers" explores the pros and cons of this arrangement for individual farm families. Land, labor, management, capital, and market requirements and the advantages of 18 livestock and 18 crop enterprises are discussed. Lessons on record keeping, tax considerations, budgeting, and insurance needs are geared to the part-time farm business.

If you would like a copy of this course, either as a reference or to enroll as a correspondence course student, write to "Part-time farmers," Box 5000, University Park, Pa. 16802. Make your check for $5.50 payable to Penn State.

Barn meeting scheduled

The Lancaster County Holstein Association is sponsoring a barn meeting at the home of Jay E. Landis, Lancaster R6, on Friday, February 25. Farm visitation will begin at 1:00 p.m., with the meeting getting underway at 1:30 p.m.

Clarence Stauffer, HFAA program director, will discuss the grade identification program. Refreshments will be served.

Traveling south from Millersville on the Millersville Road, the Landis farm is located on Short Lane which is the first road to the right after passing Circle M Ranch.

Traveling north from New Danville on the Millersville Road, the farm is located to the left on Short Lane.

Barn Meeting chairman is Nelson Wenger with committee members J. Robert Kendig and Roger Mills. For further information contact any committee member.

Chester Paes

400 mills

[Continued from Page 94]

"Then they'd go to another mill and do the same thing," he added.

Early mills were equipped with burr stones, two flat surfaced round stones which were grooved and designed to crush grains between them. Allowing them to run without grain between the surfaces could result in a fire, declared Paes. It was a slow method of grinding flour and feed and due to it being slow, the final product was generally very fine in texture.

The first roller mills were introduced at the 1876 World's Fair in Philadelphia, Paes commented. They caught on quickly, and once again the mills became more efficient than ever before.

According to Paes, 60 pounds of wheat yielded 45 pounds of flour, 10 pounds of bran, and five pounds of middlings.

Few of the old mills remain standing today, in comparison to how many there once were. Some were burned down, some were taken down to make room for urban sprawl, and still others sunk into ruins due to the effects of time.

The millers often worked day and night, especially during the busy Summer, Paes said. During "slower" times of year, the mills were pressing apples for cider or sawing logs for lumber. In their twilight years, some were turned into light plants, and a few were transformed into licquor distilling businesses. Several were put to use as woolen mills, Paes' research concluded.

A farm correspondent to the Lancaster New Era from 1920-1928, Paes has maintained an acute interest in history and the research of it, especially as it pertains to rural Lancaster County. What he'd like to do yet is to publish a book on his research findings, especially the old mills.

The old Hottensteins Mill near Mechanicsville.

Pseudorabies in swine worries NPPC

NEW YORK, N.Y. - The U.S. Department of Agriculture has been asked by the National Pork Producers Council and other swine industry representatives to study the feasibility of a plan to combat pseudorabies in swine - a disease that also affects cattle and sheep. Humans are not susceptible to pseudorabies.

Officials of USDA's Animal and Plant Health Inspection Service (APHIS) met in Washington, D.C. with swine disease experts and representatives of the pork industry in early January to review the present incidence of pseudorabies in swine and to consider what could be done to combat this disease which appears to be on the increase. Also known as Aujeszky's disease or "mad itch" in cattle, pseudorabies is a virus disease that causes death losses of up to 100 per cent in pigs less than two weeks old.

At the meeting, it was concluded that before a nationwide program could begin, there would have to be support from the entire swine industry, states would have to have the legal authority necessary to carry out a cooperative state-federal program, and state and federal funds and personnel would have to be obtained. It was estimated that this could take two or more years to accomplish.

A recent survey of the states by APHIS shows a sharp increase in pseudorabies in swine. During 1976, the disease was confirmed by laboratory tests on 714 swine farms in 22 states. This is three times the 225 cases reported in 1975 and more than five times the 125 cases in 1974.

APHIS officials note, however, that increased awareness of the disease may have partially contributed to the increase in cases. Also, officials believe that many more herds are affected than the survey indicates because not all cases are confirmed in the laboratory.

The states most severly hit last year were Iowa with 225 cases, South Dakota with 148, Indiana with 116 and Illinois with 75. No outbreaks were reported in Pennsylvania, New Jersey and Delaware, Maryland had two cases.

Pseudorabies is caused by a herpes virus. Since pseudorabies can occur in swine with few, if any, visible symptoms, hogs serve as a natural reservoir for the disease. Swine can transmit pseudorabies to cattle and sheep, where it causes a fatal encephalomyelitis with signs of severe itching and self mutilation - hence the name "mad itch."

In swine, pseudorabies can cause sows to abort or produce stillborn or mummified pigs. In baby pigs, pseudorabies may cause sudden death with few, if any, clinical signs. More often, death is preceded by fever which may exceed 105 degrees, dullness, loss of appetite, vomiting, weakness, lack of coordination, and convulsions. When vomiting and diarrhea occur, the disease in baby pigs closely resembles transmissible gastroenteritis (TGE).

Swine producers are urged to call their veterinarians if they suspect pseudorabies. The clincial signs of the disease in swine are very variable. Diagnosis should thus always be confirmed in the laboratory; this takes approximately 10 days.

Producers selling breeding stock are being required in many states to produce a health certificate showing the animal is free of pseudorabies within 30 days of sale.

State's wildlife doing well

HARRISBURG, Pa. - Wildlife in Pennsylvania is in remarkably good shape despite severe winter weather conditions according to game protectors.

In fact, birds and animals seem to be coping with the snow and cold better than humans.

Except in a few isolated areas, snow depths are not exceeding two feet. And there is no extensive crusting on top of the snow, except in a few pockets. This makes it possible for deer to move about freely, and whitetails are having no trouble finding food.

Wild turkeys are probably showing more signs of stress than deer. The big birds are not particularly fond of deep, dry, powdery snow, preferring to feed in open spring seeps. Where tubers and roots and other vegetation are frozen in spring seeps, game protectors for several weeks have been providing corn to help the turkeys.

Wildlife went into this winter in exceedingly good shape. When the snow and cold moved in, birds and animals started to restrict their activities and movements, thereby preserving their strength and energy.

Recently-autopsied deer show extensive fat deposits in the body cavity and on the saddle, an indication that they are in good shape.

A few late-born fawns have succumbed, but mortality as of early February, 1976, was just as extensive as it has been this winter.

One of the best things that can be done to help wildlife now is to let the birds and animals alone. Turkeys and deer disturbed by snowmobiles have in some instances been run to death.

Additionally, snow compaction by snowmobiles and attendant glazing and icing makes it impossible for vehicles used to feed wildlife to get to the scene.

Food inspections save consumers over $1 million in 1976

HARRISBURG, Pa. - Kent D. Shelhamer, Pennsylvania's Acting Secretary of Agriculture, today announced that seizures made by food agents of the Department's Bureau of Foods and Chemistry amounted to over two million pounds of food in 1976. He said that the food removed from the market, assuming it was intended for sale, amounted to a savings of $1.55 million for Pennsylvania consumers.

The Bureau of Foods and Chemistry serves as a consumer protection agency in regard to possible health hazards and economic frauds connected with the sale of food, whether for human consumption, domestic and farm animals, or plants.

Food agents made more than 24,000 inspections of food processing plants, warehouses, food vehicles and retail food establishments, and investigated 1,380 consumer food complaints during the year, Shelhamer said.

Seizures of food are due to suspected contaminated and adulterated foods, lack of registration or licensing and a lack of labeling. Most of the suspected foods were voluntarily destroyed, Shelhamer said, by denaturing and burial in landfills. Unregistered products were returned to out of state distributors in some cases. Unlabeled or mislabeled products were returned to the shipper, relabeled or destroyed.

Inspection of the food distribution process is only one of the jobs of the Bureau of Foods and Chemistry, Shelhamer said. The Bureau also licenses bakeries, frozen dessert manufacturers, bottlers, cold storage plants and milk producers.

The Bureau also conducts inspections of fruits and vegetables, milk, meat, pesticides, feed, fertilizers and limes, and grades poultry and eggs.

Agway local meets

MOUNT ZION, Pa. - Members of the Lebanon and Hanoverdale Agway held their annual meeting here on Feb. 4 and elected four farmers to the store's member committee.

Elected to three-year terms were: Robert Oellig, Jacob Smith, Kenneth Sellers and Ray Sattazahn.

Elected to the petroleum committee were Marlin Hitz and Orville Stauffer.

Member committees were responsible for guiding local management, evaluating the store's service to members and other customers, and nominating candidates to the 18-member Agway board of directors.

A report covering the Lebanon and Hanoverdale store's operations for the past fiscal year was given by manager Jack Reed. He told the 200 members present that sales volume for 1975-76 amounted to $4,316,324.

The Agway petroleum operation for the year was reviewed by plant manager Dave Schwoyer.

Committee chairman Robert Oellig, who presided at the meeting, reported on the Agway annual meeting held in Syracuse and a recent Agway Council meeting. The Agway Council serves as an advisory group to the Agway Inc. board of directors and is made up of chairmen of Agway store and representative committees.

A report on developments within the entire Agway system was given by Director Ralph Heffner of Pine Grove, Pa.

Reproductive failures cost over $2 billion annually

Parasite causes abortion in cattle and sheep

BELTSVILLE, Md. - Undiagnosed abortions in cattle and sheep may be caused by a parasite which infects nearly all cattle and sheep in the United States, says Dr. Ronald Fayer, a zoologist with USDA's Agricultural Research Service. Until recently, the parasite, Sarcocystis, has been considered harmless to cattle and sheep.

Though the existence of Sarcocystis has been recognized for over 100 years, little else was known about it until 1970 when Dr. Fayer discovered that it is a coccidian parasite and determined part of its life cycle. Further research by Dr. Fayer and his colleagues has demonstrated that the parasite can cause abortion, illness, and death in cattle and sheep.

Reproductive failure, which includes abortion, annually costs beef producers $1.5 billion to $2 billion and dairymen about $500 million. The causes of more than 75 per cent of abortions in cattle and more than 60 percent in sheep are undetermined.

At the Beltsville Agricultural Research Center in Maryland, Dr. Fayer and his colleagues infected six pregnant Holstein cows with Sarcocystis sporocysts, the infective stage of the parasite. All infected cows became ill. Of the six, one died, two aborted, two did not calve, and one delivered a normal healthy calf. No illness or abortions were observed in 25 other non-infected cows within the herd. Similar results were obtained with 12 experimentally infected Jersey cows in another experiment conducted cooperatively with the National Animal Disease Laboratory, Ames, Iowa.

Dr. Fayer and zoologist Robert Leek also studied the effects of Saracocystis on sheep. Eleven pregnant ewes were experimentally infected with the parasite. One of three receiving low doses of the sporocysts aborted; eight others receiving higher doses aborted, died before lambing, or had stillborn lambs. Three uninfected control ewes had healthy lambs.

Though the parasite caused the abortions, it did not cross the placenta, so none of the aborted fetuses or fetal membranes were infected with the parasite. Lack of evidence of infection in the fetus may explain why scientists and veterinarians have not implicated Sarcocystis as a cause of abortion.

Sarcocystis not only causes abortions and illness in mature sheep and cattle but it can cause severe illness in calves and lambs as well. When Sarcocystis sporocysts were fed to lambs and calves, the animals exhibited signs of disease including anemia, emaciation, elevated temperature, and often death.

Dr. Fayer says the major economic losses from Sarcocystis may come from mild, subclinical infections which cause cattle or sheep to go off feed, lose weight, or gain weight slowly, symptoms which could go unnoticed by the livestock producer.

Dr. Fayer is continuing his investigations to determine how Sarcocystis is spread and how cows and sheep become infected.

What's new

POWER MOVER

The number of jobs handled by one man can be greatly increased through use of one of two new Elston three-point power mover systems, according to the Rue R. Elston Co.

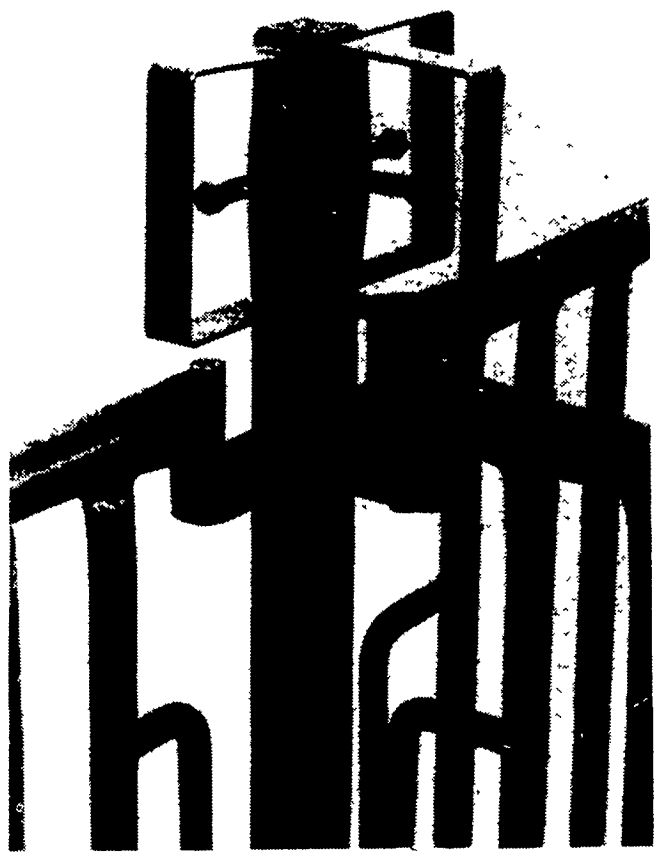
One system the company manufactures and markets is designed primarily as a round bale mover. The other power system is designed to lift round bales six feet off the ground for stacking, the manufacturer said.

Accessories are available so each three-point power system can adapt to many different jobs, Elston claims.

A steel pallet with wood floor that fits either unit is available to move stacks of feed, seed, or fertilizer. Quick and safe transportation of animals is possible by adding expanded metal sides to the steel pallet, according to Elston.

Each three-point mover is available as a basic unit or with as many optional attachments as desired.

Further information is available from the Rue R. Elston Co., 815 East 79th St., Minneapolis, MN., 55420.



NURSERY PANELS

Ag Best Corporation of Nappanee, Indiana, recently announced the development of newly improved nursery and finishing panels for use in swine confinement buildings.

Incorporating square rigid parts for added strength, the newly designed panels are built in just one integral piece which are easily assembled without cumbersome pins and removable parts. Custom made to any length, to fit both existing buildings or new facilities, the panels feature easy open design with a special new latch offering instant release, or positive catch, with a single "pull and twist" action. Completely dipped in high quality lacquer, the wire welded panels open from either end and swing in any direction because of their solid steel special hinge construction.

A full line of portable and modular confinement buildings, for swine and calves, and the new improved nursery panels are all designed and manufactured at the Ag Best Corp. Literature and distributorship information may be obtained by writing or phoning the Ag Best Corp., P.O. Box 223, Nappanee, Indiana 46550 (219) 773-7961.

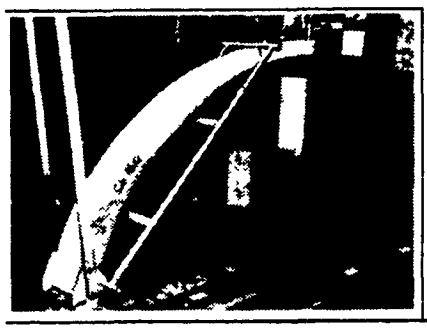
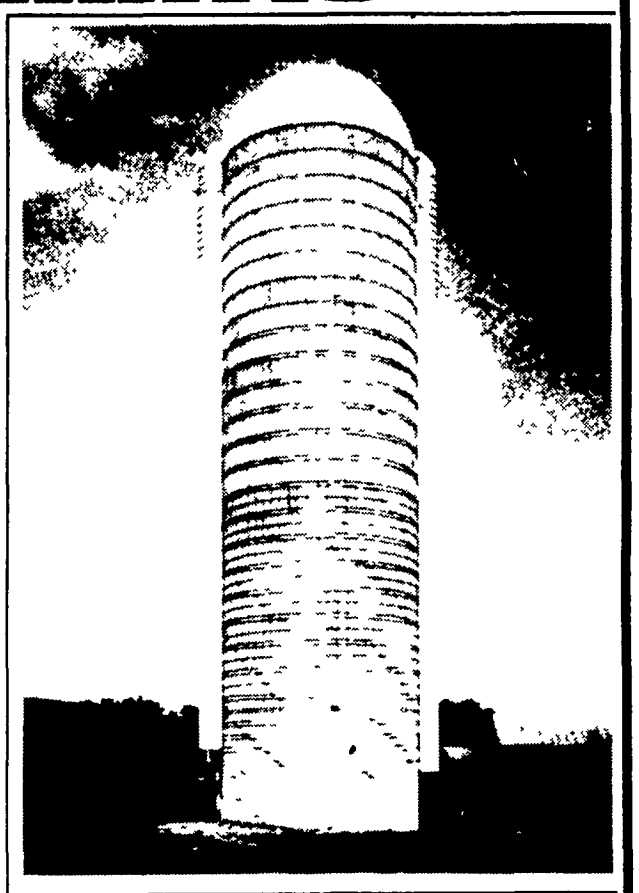
The PROVEN Fickes
MASTER-MATIC SILO SYSTEM

Master-Matic is the proven automatic silage handling system first introduced in the eastern United States by Fickes over a year ago. There's no longer any need to enter the silo. Once filled, the silo can be unloaded from top to bottom—automatically. The Silo-Matic Continuous-door Unloader moves down the continuous doors to unload haylage, corn silage or high moisture corn. It operates effectively, efficiently and without mechanical problems.

The Fickes-Master-Matic Silo System offers you:
CONVENIENCE—Puts an end to the chore of climbing the silo every few days
TIME-SAVING—Keeps you out of the silo so you can spend your time to more profitable advantage
CLEAN ENTRY CHUTE—Continuous door chute used for unloading. Second chute doors remain in place always clean



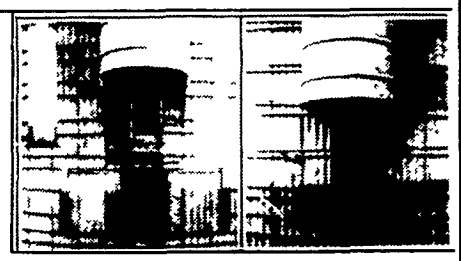
SILO-MATIC CONTINUOUS-DOOR SILO UNLOADER
This exclusive unloader design has been in use on continuous-door silos for more than a year. It has been thoroughly tested and proved under farm-operating conditions with haylage, corn silage and high moisture corn. The Silo Matic Continuous Door Silo Unloader automatically moves down the silo from door to door. The gooseneck stays in perfect alignment with the chute doors and hood remain in ideal position for maximum silage carrying efficiency.
There are no springs, ropes, cables or pulleys to adjust since the downward movement of the unloader operates by gravity. The electric cable is plugged into a power source at the top of the silo. The electric cable automatically uncoils as the unloader moves down the silo.



Silo-Matic TRAVELING BELT FEEDER

FAST, HIGH VOLUME CATTLE FEEDING WITHOUT SEPARATION

- Smooth Slip Proof Fixed Speed Drive
- Even Distribution—No Feed Build Up
- Belt Glides on Plywood Trays
- Self Tightening Self Cleaning Feed Belt
- Low Horsepower Requirements
- No Separation of Mixed Feeds
- Optional Automatic Reversing Switch For Continuous Feeding



Clean Chute—This photograph shows the clean chute side of the Fickes silo. This system provides clean entry to the silo at all times. Doors are refrigerator tight Fickes Swingback hinged doors.

Unloading Chute—The continuous door column chute shown here with continuous door covers in closed position for loading silo.

CONTINUOUS DOORS—The Fickes Continuous Door can be placed at almost any location desired in the circumference of the silo. This requires no special tool or spreader. The small door (8" wide x 15" high) are wedged tightly against the steel jamb. The silo is loaded with doors in place.

Dairy seminar is S.R.O.

Dr. Prewitt

By DIETER KRIEG

INTERCOURSE, Pa. - A standing-room-only crowd gathered here at the Harvest Drive Restaurant on Wednesday afternoon to participate in a Ralston-Purina Company sponsored dairy business management seminar. An estimated 270 people were in attendance. The meeting was one of several the giant feed manufacturer sponsored in the southeast Pennsylvania area this week.

Primary topics of interest to dairymen were presentations on vitamins and minerals, dry cow management, health products, record keeping, and high energy feeds and their relation to top milk production. A question and answer session rounded out the program.

Reminding those in attendance that dairy rations should be carefully formulated to supply cows with adequate nutrients and balanced minerals and vitamins was Dr. Prewitt from the Purina Company. Using slides to illustrate his points, the Purina dairy specialist explained why it is so important to have proper amounts of vitamins and minerals entering the cows' bodies. Too little or too much of an ingredient can bring on metabolic difficulties, he stressed.

Purina representative Gene Hubbard followed Prewitt with a presentation on one of the two most neglected animals on the farm - the dry cow. He noted that the non-lactating cow has different requirements from the cow which is producing milk, but that, nonetheless, she should receive careful attention in order to achieve maximum production when she comes fresh. Proper care for dry cows is also known to be very helpful in overcoming high stress periods once lactations begin.

Next in line in the day's presentations was Don Ward who spoke on Purina's line of health products, notably those for fly control. He declared that better fly control programs could result in a 15 per cent increase in milk production.

Following lunch, Penn State's Herb Gilmore talked on the importance of production records. The head of the DHIA program in Pennsylvania, Gilmore calculated that the program is worth $128 million annually to DHIA members. Details on his presentation can be found in a separate article on the following page.

The Purina people repeatedly referred to research done at the company's research farms, and showed numerous slides depicting dairy farming at their Gray Summit, Mo., and Arkavalley, Ark. dairy facilities. A trip to the latter is being sponsored by the company early next month.

It can sometimes seem to rain frogs because their lightweight embryos can be carried into the air by winds.

DHIA valued at $128 million

By DIETER KRIEG

INTERCOURSE, Pa. - Pennsylvania's DHIA program is worth an estimated $128 million annually to its members in milk production alone, according to Herb Gilmore who heads the state-wide milk testing program. Gilmore made the comment in a speech he gave here Wednesday during a Purina dairy business management seminar.

Explaining how he arrived at the monetary figure, Gilmore pointed out that the average DHIA record in the state stands at 13,469 pounds of milk produced per year. Production for cows which aren't on DHIA cave in at an average of 8564 pounds. That leaves a difference of 4905 pounds and multiplying that times the current average value of milk, one comes up with $494 per cow. That figure times the number of cows on DHIA test in Pennsylvania yields the $128 million.

Gilmore supervises the DHIA testing program at Penn State University, where all such testing is done. Although only DHIA and DHIR records are recognized as being official, Gilmore made it clear that whether the records are official or not is not as important as their being accurate and reliable. The purpose for the records, whether DHIA or owner-sampler, is to give the dairyman a better idea of what his cows are doing. wrecords are a management tool which should be used. While noting that DHIA records have more to offer for the money that do other records, Gilmore also pointed out that some dairymen in the program fail to make use of the money they have ivested in the testing program.

Herb Gilmore

The average cost per cow in the standard DHIA program was $9.72 last year. "An investment of $10 and a return of $494 looks pretty good to me," he declared.

Gilmore said that the computerized records at Penn State have given dairymen access to a variety of information on their cows which can help them become better dairymen. The University processes 10 to 11 thousand records per day. Major purposes of the program are to 1. identify animals, 2. record data, and 3. provide information for analysis. Dairymen use the information to upgrade their management, such as culling, breeding, and feeding.

The Penn Stater also considered the DHIA testing program to be "good insurance program" for better prices if and when the herd is sold. In 1975, for example, cows with DHIA records outsold those without official records to the tune of $640 per head. But, on the other side of the coin, Gilmore advised owners of low DHIA herds to hide their record books when they decide to sell.

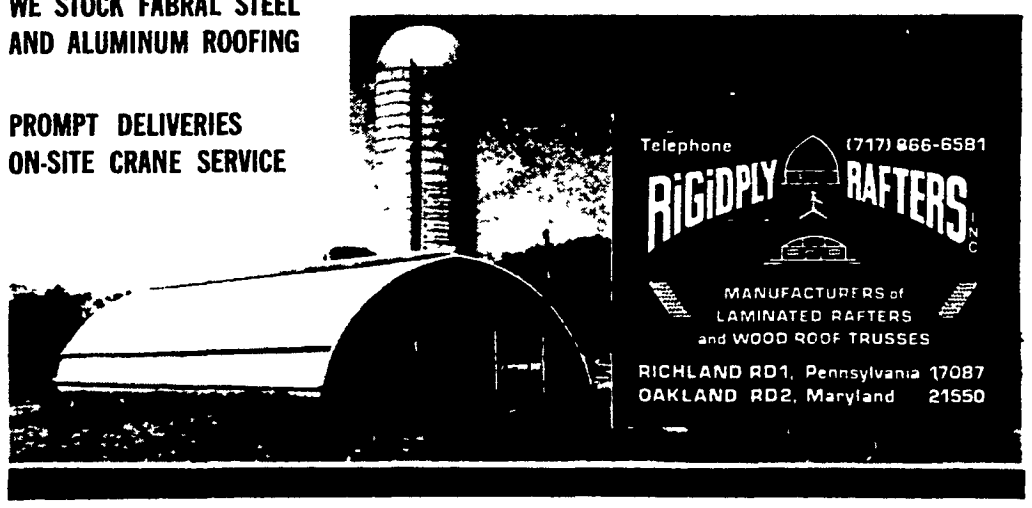
The flexibility of the arch extends also to construction: often the arch and wood decking system will permit construction to continue into peak winter months.



Reading Fair cancelled

By LAUREL SCHAEFFER
Berks County Reporter

READING, Pa. - The Reading Fair has been cancelled for 1977. This decision was made recently by the 12 member board of directors. "June is not a good month," Wayne Readinger, vice president of the Fair, told Lancaster Farming. "It is too early for farm crop displays and also too early for 4-Her's. The people are not fair minded this early in the season. Schools are just ending and vacations are on everyone's minds."

Also cited as reasons for the decision were the problems involved with Muhlenberg Township's curfew. Readinger said he felt all the directors regretted the move and he felt the fair wouldn't be very successful in June. Also, it was too late to move it to another more suitable date.

The directors are planning to resume the fair in 1978, however. They are going to try to move it back to the original date which is the second week of September or to the latter part of August. The fair was originally moved to June because the school cooperation wasn't very good, Readinger said.

When asked if there would be a substitute for the 4-H and FFA members, Readinger explained that they couldn't do it. This was because the prize money comes from the state and from the fair on a 50-50 basis and there would be no way to raise the money this year. The fair has built a new livestock barn in recent years and plans to use it in 1978. There are plans to expand the building in the future so the fair may be bigger and better when it returns. "To have a successful fair" Readinger said, "you need a midway carnival, a good farm crop, and livestock display and the peoples interest."

Pa. cattle and calf inventory unchanged from year ago

HARRISBURG, Pa. - An estimated 52,000 Pennsylvania cattle farms had 1,960,000 cattle and calves on hand January 1, 1977, unchanged from a year earlier, ccording to the Pennsylvania Crop Reporting service. The inventory value of $656,600,000 compares with $607,600,000.

The milk cow inventory on 24,000 dairy farms was 706,000, the same as a year earlier. Milk replacement heifers 500 pounds and over at 221,000 were also unchanged.

The inventory of beef cows at 196,000 was down six per cent, while beef cow replacement heifers 500 pounds and over at 51,000 were down four per cent. Other heifers 500 pounds and over numbered 69,000, unchanged from a year earlier, while steers 500 pounds and over at 294,000 were up 20 per cent. Bulls 500 pounds and over were also up to 51,000 or nine percent over a year ago. Calves, steers, heifers and bulls under 500 pounds, at 372,000, were off nine per cent.

The 1976 Pennsylvania calf crop was 790,000, down one per cent or 10,000 from the 1975 crop.

All cattle and calves in the United States on January 1, 1977 are estimated at 122.9 million head, down four per cent from a year earlier and seven per cent below January 1, 1975. This is the sharpest percentage decline since 1948 and represents the second consecutive year of herd reduction in the current cattle cycle.

All cows and heifers that have calves, at 52.4 million head, are down four per cent from January 1, 1976. The number on July 1, 1976, at 53.9 million, was down seven per cent from a year earlier.

Beef cows at 41.4 million are down five per cent from January 1, 1976 and nine per cent below January 1, 1975. Milk cows at 11.0 million are down one and two per cent from January 1, 1976 and 1975, respectively.

The 1976 United States calf crop is estimated at 47.4 million, down six per cent from 1975 and seven per cent below 1974.

Fireplare safety stressed

With the ever current fuel crisis and deep freeze temperatures, fireplaces and contemporary stoves are being used with increasing frequency. A number of home fires, often involving fatalities, occur each year during the winter season because too many people believe "it just won't happen to me" and ignore common sense fire precautions.

Flues, vents, and chimneys should be checked periodically throughout the winter season to ensure they have not become plugged or clogged. Flammable liquids should never be used to start fires nor stored in the vicinity of fireplaces or stoves. Free standing, or contemporary, stoves with self venting flues are popular, but should be installed according to the manufacturer's recommendations regarding clearances for combustible walls, partitions, and supporting members.

A very important rule is to never leave a fire unattended. Too many people retire for the night or go away from the house leaving a fire smouldering, thinking it is harmless. Smouldering fires can burst into flame, spitting sparks out to ignite such nearby combustibles as rugs, draperies, and chairs.

Other safety practices for families who enjoy the warmth and energy savings of fireplaces and contemporary stoves are:

—Always keep a screen in front of the fireplace to prevent sparks from spraying into your home.

—Check flue and vent joints to be sure they have not come loose.

—Never place light combustibles such as papers, clothes, toys, and cardboard on or against contemporary stoves.

—Don't burn your garbage in fireplaces or stoves as you may release toxic gases or excessive amounts of heat.

FFA officers begin month-long tour

FFA OFFICERS BEGIN MONTH-LONG TOUR

ALEXANDRIA, Va. - National FFA Officers will leave here on February 7 to begin an annual tour that in three weeks will take them to 14 cities in six states. During the month-long tour of businesses and industries that support the FFA through the National FFA Foundation, Inc., the six national officers are scheduled to visit 57 agribusiness firms, civic clubs, and educational centers.

"The purpose of the annual tour is to give people involved in agribusiness and education an opportunity to meet and visit with members of the FFA organization," says 20-year-old National FFA President James Bode. A native Oklahoman, Bode is looking forward to traveling as one of the six officers who represent half a million FFA members. Bode says he is particularly eager to meet and visit with agribusiness executives. "The tour has become a highlight of the year for National Officers," he says.

This will be the 30th tour of national officers in the organization's 50 year history. The 1977 tour is scheduled to begin in Richmond, Virginia, on February 7 with visits to the Commissioners of Agriculture and Education and the Governor. From there the team will fly to the midwest where the majority of visits have been scheduled this year. Major cities on the schedule include Indianapolis, Ft. Wayne, Madison, Racine, Milwaukee, Chicago, Peoria, Quincy, Bloomington, Detroit, and Kalamazoo. The tour will conclude in Kansas City, Mo.

"We try to concentrate the tour in different areas of the nation each year," says Coleman Harris, associate FFA executive secretary, and coordinator of the Tour. "That way we can make more visits and keep travel costs to a minimum," he explains.

FRANKLIN COUNTY

FARM SALE

FEB. 19th, 1977,

At 10:30 A.M.

Having sold my farm will sell the following located along the Marion Rd. ¾ mile south of New Franklin, is 2 mile east of Chambersburg's Rt. 81's Wayne Exit on Rt. 316.

PUBLIC SALE

On the farm located at Broad Run on Route 383 two miles from Route 17, five miles from Jefferson and five miles from Middletown in Frederick Co., Md.

WEDNESDAY, FEBRUARY 16

12:00 Noon

COMPLETE DISPERSAL

38 Cows - 21 Heifers - 1 Reg. Holstein Bull

16 Registered Holstein Cows
13 Registered Holstein Heifers
29 Grades - all Holsteins except
2 Guernseys, 1 Jersey & 1 Ayrshire

Tested for Interstate Shipment

Nearly all are artificially sired including daughters of Elevation, Lucky, Rebel, Countdown, Merry King, Happy Raven, Galaxy, Royal Pontiac, Elevator, and others. Nearly all are bred to A.I. sires including five to Elevation, five to Job, four to Jet Stream, three to Fury Ivan, etc.

Many recently fresh or close - 6 fresh in January, 5 due in February, 4 due in March and 7 due in April. The herd is young with many milking as first and second calf heifers. It is a home raised herd with very desirable udders and lots of dairy character.

Excellent Bloodlines and several good cow families are selling, including a Zeldenrust Royal Pontiac daughter who was purchased from Locvale Farms, and her milking Elevation daughter along with her son who is by Elevation also.

Sale Manager's note - This is a good young herd showing lots of quality and they will please you, both the registered and the grades of all ages.

70 Cows and Bred Heifers
and 5 Young Bulls
Classified - DHIR tested -
Ready for Interstate Shipment
A Sale that offers "Some for everybody"

INCLUDING:

A sensational EX Matt with records to 991 F already has one son in AI and carrying a contract calf now.
Two more young EX cows - 1 by Kingpin the other by Astronaut, both bred to Elevation.
Nineteen VG cows, many with records well over 20,000M and up to 848F.
A number of young cows, many scored Good Plus, and a fancy group of bred or fresh heifers with solid pedigrees.
Most of those selling are recently fresh or springing, however, some are due throughout the year.
Five bulls sired by Astronaut (2), Elevation (1), Gay Ideal (2) from outstanding dams who are members of exceptional cow families.
Some excellent show prospects and many potential VG's will be sold.

Sale Manager's note - I personally have inspected every animal and the pedigrees of all animals selling. The cattle certainly are a fine group from one of Maryland's best known herds. Plan to attend - you'll find them here no matter what your needs.
